It's a good thing most xian frootloop churches today
either videotape or audio record their church services.

I for one am LOOKING FORWARD to seeing a
possible videotape of Rev. Cleetus BugZapper getting
juiced with single-phase 125VAC on a future www.ogrish.com
The final moments of a Baptist minister would make interesting
listening.....

"I think he was taking shits in the bathtub and covering it
with newspapers, like some kind of foul ungodly lasagna."

SHORTWAVE TRANSMITTER AIRTIME TO CIRAF ZONE 39
IRAQ, ISRAEL, JORDAN, KUWAIT, LEBANON, OMAN, QATAR, SAUDI ARABIA, SYRIA, TURKEY, UAE, YEMEN

== FAQ ==
* TDP is a global transmission service provider offering a distribution and delivery system for your radio program to any audience on earth.
* Our terrestrial transmission facilities are located around the world so that TDP as signal distribution operator can guarantee you the best possible programme delivery method.
* You can make your radio program being heard on every part of the globe you wish, or even worldwide, using shortwave.
* Shortwave radio signals can be picked up with a simple, inexpensive and portable radio receiver.
* If you are interested to know more about the possibilities of hiring airtime on shortwave to a certain target area, click in the map on the desired target area for more details and information.
* TDP offers you the largest pool of shortwave broadcasters located around the world. We have airtime available to any part of the globe.

== conclusion ==
I believe that it would up the moral of the US occupation troops in Iraq.

Overall,which type/kind of outside antenna for shortwave listening is the best/best design? I am not talking about a great big very expensive antenna,although I do have plenty of room in my back yard for a big antenna.Are there any kits or plans available for such antennas? I refuse to register at yahoo for reasons of my own,so antenna information at yahoo lets me out if it requires registering at yahoo or anywhere else.I only know two people (women) who use yahoo for emailing me and I once tried to get one of them (that married Irish woman wayyyy over yonder accross the big pond) to use a different email provider.

BTW... You'll notice I don't have a rotor...I need to get one...
The "rotor" is the white string you can faintly see to the left of
the tower in the pix. It hangs down kinda trailing off towards
the blue tent lookin thing. We just grab the string and start
walkin if we need to turn it. But in reality at field day, it points
towards the east coast/europe about all day, and then to the pacific
in the late afternoon/evening. Don't really turn it too much.

Tracy Fort's necrophilia and a deceased seventy two year old cancer
victim, who happened to be my mother:

==========
==========
I'm not drunk. I haven't finished my first 12 pak yet.
I'll get there and when I do it's back to the cemetary.

She gives great cancerous BJ's.....thanks Canucky boy!

How far north did the Katrina effect? I saw someone's mom floatin down
the mighty Mississippi!

Dug her ass right up! She was too damn ugly to have sex with before
she died. The old bag o bones fell apart in my hands! She didn't
complain about much either other than the lousy sex she got from those
foursomes with you, Mike and her husband.

love dem bones....dem bones....dem bones

rattllin' bones!

squeek...squeek...

Skeleton rides 50 cents a pop! If you can stand the smell....I wonder
is she stunk that bad in life?

hahahaha....I'm still laughin' at your sorry ass family! This is funny
stuff!

She is very fresh but not that fresh!

hehe...I love dem bony women....rotten to the core.....

um...umm....good!

I love it....did she do it for you too?

Please accept my apology for abusing her. I'm sorry that I did not
toss her back into the black depths that she came from. Next time,I
will be sure to take care of that. I promise that I will refill the
hole with the dirt that came out too. In addition, I will re sod the
plot at no additional charge. Let me also apologize for the milky
substance in her left eye socket, that was an unavoidable accident.

please feel free to include this post in your sig file!

You might as weel keep it up there...I love the ole boney bitch!

Dem Bones! Dem Bones! Dem Bones! I loved playing dem Bones!
Dem Bones! Dem Bones! Dem Bones!
I loved playing dem Bones! I ran my fingers uo and down dem bones and
she began to come alive!
I played dem bones like they never been played and she smiled for me all
the day.

Pork and bones....

DON'T HURT CANADA! I'll miss those nights with the ole bony lady!

The most fun I ever had!

Sporting a new moniker (GraveDigger) just for you and mommy...

He knows the inside of his mom's boney butt! hahahaha

hahahaha.....when you got thru lickin I was stickin.....

==========
==========

This .sig file will continue until Mister Fort posts a sincere apology
to all cancer victims and their families. His refusal to do so says more
about his attitude and upbringing than any of his thoughtless and
hurtful postings in rec.radio.shortwave. He seems to be very proud of
the fact that he can buy expensive radios using the refunded deposit
money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone
caring about his well-being should mention the good work of Alcoholics
Anonymous to him. They may be able to help him restore his self respect
and dignity so he stops posting this drunken garbage on the internet.

>That Yagi Antenna,that's a nice looking Antenna rig.How do you have it
>grounded for lightning protection? I need an Antenna like that.

It's not grounded in that case, being it's portable, and no wx
was in the area. But you would just ground the tower base
if you needed to ground it. Normally in a home install it would
sit on a slab, and would be grounded to the slab, which in turn
is well grounded, usually with rebar, etc.. You would use the same
suppressors, etc, as any other type antenna.
A beam can be handy if you are hard core dxing... Not only do
you have forward gain, but you have a f/b ratio which will
reduce "problem" signals, or noise in the other direction
which further improves the s/n ratio.
It's easy to build a single band yagi. A multi-band will take more
work. Probably the best overall "beam" for a wide tuning SWLer
would be a monster log periodic.
When using that yagi vs a dipole at the same height, it's like turning
on an amp. But the best part is you get the same increase in receive.
So it will always be better than just adding more power alone to the
dipole.
I've got that HF beam, and I've also got a 3 el yagi for 6m, a 3 el
yagi
for 2m FM, and a 7 el yagi for 440 mhz. I need to build a large yagi
for
2m SSB.. But I've been too busy to mess with it...

> 1967-1997, and can talk at length about the ELF system.

as a Yooper (a resident of the Upper Penisnsula of Michigan) the ELF
system is south of me and just barely within the UP, we were informed
the primary reason for the discomissioning of ELF is the various eco
gruops were making it too expenseive to use and maintain (both by court
chalangce and sabotage) but I am about 100 nw of the elf stie and still
a fair distance south of the Us canada border

All but the really cheap inverters are in metal boxes, so I don't think sheilding and such is an issue as much as the high slew rate on the mains.

I've designed DC/DC converters, though not in the hundreds of watts. I suppose you could do a DC/DC with a step wise sine wave, but it would have high frequency componenets as well that would have to be filtered.

Like I said about a thousand posts ago, run your gear on 12V. Wellbrook doesn't sell a cigarette lighter adapter, but you can make one that is postive ground. Just don't ever screw up and use it for something else.

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast bands used outside the USA. Also includes WARC-92 broadcast band extensions, which may be used before April 1, 2007 on a secondary (non-interference) basis. For multi-use bands, most common usage is shown. Some stations operate outside the official bands. Information is from Sep 2000 NTIA allocations table, see:
http://www.ntia.doc.gov/osmhome/allochrt.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is 5 kHz. Frequencies above 10000 kHz tend to propagate better during the day; frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

Phone line as SW antenna
Bill McFadden
billmc@agora.rdrop.com

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area. Telephone lines present a potential shock hazard. Do not use this antenna for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving antenna. Performance will vary depending on the kind of phone line you have. Overhead lines usually make okay antennas, while underground lines usually don't. A phone line antenna will generally pick up more power line noise than a dedicated antenna, so don't expect to use it for DX work. Nevertheless, I find that it outperforms the telescopic whip antennas built into most portables.

A reader sent in this suggestion: If you're concerned about connecting the phone line directly to the receiver, try wrapping the phone cord several times around the receiver's telescopic whip antenna instead. Performance may not be as good as a direct connection, but it will probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought much about it because thunderstorms are rare in my area. Most phone lines have lightning arrestors on them where they enter the house, but the lightning arrestors may pass enough energy during a lightning strike damage a receiver. My suggestion is to disconnect the antenna when not in use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and receiver. The capacitor eliminates all phone line voltages, including ringing, so that they will not harm the receiver.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be purchased from some shortwave dealers.

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

By the way, these filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)

Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Date: 12 Jan 91 00:44:25 GMT
From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB
1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

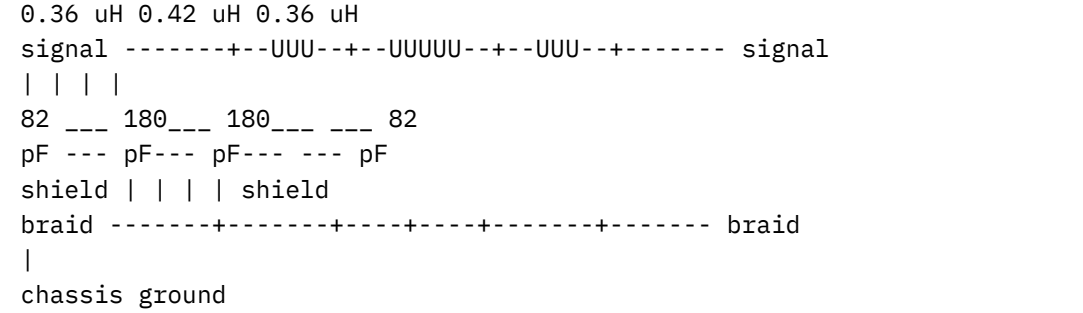
These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

Date: 22 Apr 92 08:59:33 GMT
From: johns@uhunix.uhcc.Hawaii.Edu (John Shalamskas)
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



I had to do a little more improvising at this point. I used .33 uH instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there are 4 lugs plus a grounded lug. All "ground" connections go to the lug that is mounted to the chassis, and the other 4 lugs are used for each of the connections on the signal line. One terminal strip is used per filter. Since both filters were necessary to clean up the hash, I am going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means you can't possibly hook them up backwards. (In the above schematics, left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

PARTS SOURCE

All of the parts for the filters can be obtained from the following source:

Digi-Key
http://www.digi-key.com/
701 Brooks Av S
P.O. Box 677
Thief River Falls, MN 56701-0677 USA
Voice: 800-344-4539
FAX: 218-681-3380

PART DIGI-KEY PART NO.
82 pF capacitor P4023
180 pF capacitor P4027
820 pF capacitor P4184
1500 pF capacitor P4187
0.33 uH inductor M8007
0.39 uH inductor M8008
2.7 uH inductor M8018

The cost of these parts is less than $1 each.

wheeeeeee wrote under the heading of "Re: Join "Halloween Party" tonight on SW":

> Ah yes! WWCR - The Paragon Beacon of HATE RADIO of North America.
> (with WWRB being a close second followed by World Harvest Radio 3rd ?)

"Wheeeeeee" - notice how "they" always attempt to hide their true identity behind phony names - just may be partially right in this case.

Consider this.

Can a person truly LOVE without HATING? Can a person truly love the Lord Jesus Christ, our soon coming King, without hating the things which He hated? Can they love the light without hating darkness? Can they love righteousness without hating unrighteousness? Can they love cleanliness without hating dirt?

Now, consider the reverse of the above - especially in the light of the venom which he spewed forth.

Can a person truly HATE without LOVING? Can a person truly hate the Lord Jesus Christ without loving the things which Christ hates? Can they hate the light without loving darkness? Can they hate righteousness without loving unrighteousness? Can they hate cleanliness without loving dirt?

Food for thought! Consider it the next time you "hate" something. Also, consider this in the light of some of the other things "wheeeeeee" said.

Gooood DAY! :-)

In Search Of : GE Superadio Model #3-5280 . . .
plus GE Super Radio Information and Links

ALAIN,

Good Luck with the Hunt ! :o)

About once-a-year a Digital GE Superadio (I) shows up on eBay.
GE Digital Superadio I {Single Speaker}
General electric Model # 7-2882

Then again, about once-a-year a GE Superadio Cassette (II)
will show up on eBay.
GE Superadio II with Cassette {Dual Speakers}
General Electric Model # 3-5280

There are Rumors of a few other GE Superadio 'types' out
there like an Eight-Track and Stereo BoomBox ? ? ?

Question - Anybody seen a GE Superadio Eight-Track Radio ?
Do you know the Model Numbers ? ? ?

Question - Anybody seen a GE Superadio Stereo BoomBox Radio ?
Do you know the Model Numbers ? ? ?

Hello, This 0,9W 6V audio IC is needed to repair a Sony PRO 80 shortwave-scanner. So far I've only been able to locate it in bulk quantities. Any sources for just a couple or so from anywhere are highly appreciated.

It may have been used in many portable radios and cassette players about 15 years ago so any recollections of what models I could possibly cannabilize would be also gratefully received.
Thanks.

Dear All,

First of all, I would like to thank you very much for sending me so many e-mails from all over the world to tell me how much you like IP1kC.

Sorry if I wasn't able to reply to all, but the two most common questions were 1) Do I need a Null Modem Adapter to connect my Palm with my PCR1000 / PCR100 ? and 2) Would you please send me the source code of IP1kC ?

Well, I'm pleased to answer YES to both questions.

YES, you do need a Null Modem Adapter and YES, I have decided to release the full source code.
Maybe somebody with more time than me will pick up from here, improve IP1kC and share it with the community :-)

http://www.geocities.com/jjintokyo/

Oh and check out my new IP1k2 page. It is a simple Windows version, but it does what I need and does it well. Also provided with the full VB6 source code.

http://www.geocities.com/jjintokyo/vb6.html

Please keep sending those e-mails. It is your words of support and encouragement that keep me going.

LONG LIVE THE PCR1000 + PCR100...

JJ in Tokyo.

45. "RICH WITH PAYPAL IN DAYS"

Newsgroup: rec.radio.shortwave
Date: 2005-11-01 14:29:41 UTC
From: carnavyboat@yahoo.com

Source record: 46843

"RICH WITH PAYPAL IN DAYS"

Do you want to be rich as soon as possible? Please read this-

A little while back I was browsing through a news group, just like you are now and came across an article similar to this that claimed you could make thousands of dollars within weeks with only an initial investment of $6.00.
So I thought, "Yeah right, this must be a scam.", but like most of us I was curious so I kept reading. Everyone has heard about PayPal(The simplest way of paying or recieving payment, safe an secure, online.) and when I came across this concept I knew it would work, because as a member of PayPal, I have already experienced their efficiancy and excellent standing. Anyone with an email adress can join for FREE.
Please read further before you go there...You can complete this whole process within an hour. Everything is done on the internet and by email, and if you bide by the rules it is not SPAM, so it is perfectly legal. Anyway it said that you send $5 through PayPal to each of the emails stated in the article. You then place your own email address at the bottom of the list at no. 5 and post the article in at least 200 news groups. So after thinking it over an talking to a few people first, who thought that I was nuts, I thought about trying it. I figured, what have I got to lose except $25 roght? I was a little sceptical and a little nervous about the legal aspects of it. It follwows the same regulation as te mail chain letters, which, according to the US post office is @!#$. And I invested my measly $25.
Well guess what?Within 7 days, I started getting money into my PayPal account! I was shoced and thought that it would end soon, but the money just kept rolling in. In my first week I made about $25 and by the 3rd I had a total of $2000. In my for weeks, I have managed $10 000 and it is still coming in rapidly.

Let me tell you how it works.(Print this page so that you can access the info as you need it.)

Requirements

You must have a verified PayPal account. Go to www.paypal.com and set up an account for free, how ever, if you are a new member to paypal, you'll have to get your accont verified to start making or recieving payments, this may take a couple of days, depending on your circumstances. * PayPal is an Ebay subsidiary and is 100% secure and is being used by millions of people.

Step 1 - Send through PayPal $5.00 to each of the members on the list below. Make the subject of the payment 'Email List' and in the comments

put 'PLEASE PUT ME ON YOUR EMAIL LIST.' What you are doing by this, is creating a service and you don't have to give your adress to someone you dont know. THIS IS ABSOLUTELY LEGAL BECAUSE OF THE ABOVE STATEMENT IN THE COMMENTS SECTION. DO NOT FORGET TO WRITE IT!!!!!!

Email List
1 - bede11@hotmail.com
2 - red_blu_money@yahoo.com
3 - carnavyboat@yahoo.com
4 - skyworldice@yahoo.com
5 - colorwordtime@yahoo.com

Step 2 - Now take the first email off the list and move the other adresses up so that 5 becomes 4, 4 go to 3 and so on. Whe you are finished, put your email adress at no 5.(This must be the email that you use for your PayPal account.)

Step 3 - Change anything you need to this article so it fits your bill, but try to keep it as near as the original as possible. Now, post your amended article to at least 200 newsgroups/message boards. There are about 32,000 of these things, you only need 200 though, but, the more you send the more money you will make. Now, copy this letter to a note/wordpad and put your own name on the list in pos. 5, and save your file as a txt. file.

Step 4 - Use Netscape or Internet explorer and search for newsgroups. Example, go to your search engine of choice and search the subjects, millionaire message board, money making message board, employment message board, money making discussions, money making forum or make money quick etc. You'll find 1000's of these message boards. Click on them 1 by 1, and on each one, locate the post new message option

Step 5 - Visit these message boards and post this article as a new message, by highlighting the text of this letter and selecting paste from the edit menu. Fill in the subject, this will be the header that everybody sees as they scroll through the list of postings in a particular group, click the 'post message' button.

You are done with your first 1. Please be honest and it will truly work for you. Good Luck!

I own three little (I think they are 250 watt inverters,I haven't used them in a long while,I have them put up somewhere around here) modern inverters and I own a big heavy sine wave 800 watt inverter (I gave it to my brother in law about six years ago,I bought it for $100.00 from a company that was going out of business) and I own a small old ATR D.C.A.C.model RMF inverter.Part of what it says on one of the metal plates on the inverter is,Type 6 C Input 6/12 volts D.C.Output 110 Volts Capacity 80 Watts Use 20 Amp Fuse Only ATR Manufacturing.,Inc St.Paul,Minnesota and I own another smaller old inverter,Terado model 50127 Trav-Electric Super inverter Input 12 Volts D.C.Output 110 Volts 60 Cycle A.C.75 Watts Continuos 100 Watts Intermittent MFG By Terado Co.,St.Paul 8 Minn.,U.S.A.
The old inverters probally aren't much worth using nowdays and I know the ATR would need rewireing and probally some other repair work,but I like them anyway because they are old,a piece of History.They are the old style vibrator invertes.

Where's that figure from? Did they relax the spec?

Still, 2% is cleaner than the power lines, so it's hard to argue with.

Noise *can be* an issue. One of my inverters -- the 500 watt one --
put out a fair amount of RF noise when running a 700 watt load. But
simple snap-on ferrites help if you have that problem.

The house inverter is much larger and rarely is pushed to rated load.

As for why... The Exeltech inverters use a high-frequency oscillator
and PWM to synthesize the waveform, as far as I can tell.

1933.Next the Trade Unions ,Oh he's started allready hasn't he.

I've just read Roseanne Catt's book, 'Ten Years'.

She was falsely accused of attempted murder by a corrupt NSW Detective - Peter Thomas, who had been disgraced before her trial.

The Judiciary completely failed in their duty of care as legal oversight of the trial process.

She was the longest serving woman prisoner in NSW.

It is still a public disgrace that this woman's witnesses are still being victimised.

If the new Terror Laws come into effect there will be many more innocent people put in gaol because they got in the way of corrupt police.

In fact the new laws institutionalise the process.

It can happen to anybody, any-time.

Australia will have prisoners of conscience also.

Today at 2:48am, Eddie wrote:I know I'm a bit thick but will JH try to put my mind at rest by telling me how these new laws will work to protect me and my family.How come the Opposition is going cap in hand, tugging forelock, and saying yessir we'll pass it 'cos most of the Nation don't give a f**k as long as the price of beer doesn't go up and they can watch Dancing with the Stars or some forensic fiction show. A mate of mine said the thing missing from Howard's face is a toothbrush moustache ,and he wasn't talking about Oliver Hardy but Germany in 1933.Next the Trade Unions ,Oh he's started allready hasn't he.

As Robert Menzies said in 1938:

" Mr. Hitler has a lot of good ideas. I've enjoyed my study of the new Germany, and I can say that we in Australia have a great deal to learn."

Then in 1939:

" As a result of Great Britain declaring War on Germany, Australia is now at War with Germany also."

Good thinking Bob!

Then Menzies proceeded to break the sacred understanding cast in WW1, that Australian Troops would only fight under an Australian Commander.

My Dad was livid at that !!
He'd lost his father in the twenties, to the gas eating his lungs away. He always said that Tobruk was won because Australian Troops were under Australian Command - Sir Leslie Morehead.

My Dad thinks Howard is worse than poison!!

Like Menzies our Johnnie has put Australian Troops into a situation where their Command is that of a Foreign Power, albeit an old ally.

Now we have Marshall Law being rammed through Parliament, and an inadequately trained and staffed AFP meant to do all the dirty work. Mick Keelty must have many misgivings over his new Gestapo role in Australian society. He isn't a Himmler or a Heidrich, and certainly doesn't want to end up like they did.

The New Terror Laws are guaranteed to create more enemies than it silences.
Instead of being able to easily know who's doing what as it is today, there will be created a new form of 'active dissent' which is based on action rather than words, because words get you in trouble. It will be argued that you will probably get away with actions..

So the very thing these new laws are meant to suppress, will actually be magnified, by their adoption.
Civil Society is based on civility between people, not dominance, fear, and distrust. Polite communication is the key to gaining good intelligence surely.

Letting people talk is surely the best way to know what people are thinking.
Letting people let off steam a bit is surely better than having it build up.

The Aboriginal People of Australia were 'moved' by the 300,000 people marching over the Sydney Harbour Bridge to honour the suffering and injustice and the making of a massive gesture to say - " SORRY "

Weren't our troops serving overseas afforded some protection by the 500,000 people at the NO WAR rally in Hyde Park Sydney? The people of Iraq must have got the news of that.

The simple emotional response of the people of Australia to the Tsunami tragedy of Aceh, had a big effect on the President of Indonesia did it not?

The Laws of ' Conspiracy ' are well entrenched in our Crimes Act. It is simply against the law to conspire to perform an illegal act. Modern surveillance equipment is so good that evidence for such conspiracies is not hard to obtain. These are practical police matters, not matters

of law.

Police could do with a bit of civility too.
They don't deserve to be sworn at and abused.
They face physical and moral dangers with which many of us would find great difficulty in coping.
In my experience, a bit of politeness goes a long way, with the necessary assertivenenss of course.
Police are human beings who respond to kindness, just like anyone else.

Thankfully, their name is generally not defined for them.
Po - Lice , the lice around the toilet pot(Po), comes from the East End of London, and described the 'Peelers'. It became so well-used that like O.K. it stuck and it's original meaning became irrelevant.

These proposed Terror Laws will betray the police of Australia, and make them hated living symbols of our lost freedoms. They don't deserve that!!

Agree with the batteries statement, but not with the charger
statement. My 800 AH bank has been put together from pulls out of
hospital equipment bought at hamfests. $20 for 80AH gel cells? Can't
beat it with a stick.

However, gel cells are delicate and should be handled carefully during
charging -- delicate in that an improper charge will destroy them.
I'd use a proper charger with temperature compensation rather than a
bench supply -- I have an el-cheapo bench supply that wouldn't take
kindly to the load a heavily discharged battery would put on it,
anyway.

Both my solar charge controller and my (almost never used) 120 VAC
charger are PWM types that do a nice fast job of charging but know how
to handle gel cells.

I have 12 and 24 volt gear that runs directly off batteries, but there
are times when equipment needs to be isolated or cannot be powered off
12 volt (such as my RX-340). For good or ill, the easiest way to
handle both issues is to go through an inverter, and, unfortunately,
often a wall-wart. Commercially built DC-DC converters give no
guarantee of isolation.

It's possible that everybody decided not to post that one day, but
when traffic drops by a factor of three, I get suspicious. No
postings by David, SeeingEyeDog, MikeW(?) or a bunch of the other
occupants of my kill file. Not even Steve calling anybody a
name. But no evidence that somebody sicced a canclebot on them
either.

I have the old Gates energy manual on SLA. You can float charge them
all day, all night, until the cows come home, and even then keep them
on the float. In fact, the best thing to do for these batteries is to
float them. [AS you probably know, the risk with the used batteries is
they sat around too long. I check the no load voltage before buying.]

Cyclic chargers will get you back up to full charge faster than a
float.

As with the Nigerian scams someone must respond to schemes like this for these guys to continue pitching them. Greed can indeed make some of us blind to the facts.

Actually a whole country was overtaken by a pyramid scheme that was sanctioned by the government. The residents of poor little Bulgaria in the 1990's were completely taken in by a pyramid scheme that was doctored up as investments with impossibly high returns. It was crowd mania on a level comparable to that seen with Dutch Tulips, Dot Com Stocks and Lousiana Land.

John S.,

Yes it is a "Chain Letter"; and as such is prohibited under
Federal Laws via the US Mail and under Federal Laws dealing
with Inter-State Commerce for Money Transfer "Pyramid Schemes"
between persons residing in different States. Farther, most
State have State Laws concerning Intra-State Chain Letter
"Pyramid Schemes". As a minimum these Money Transfers are
treated as Income and all Governments want their 'cut' of
any Income.

Hello.

I have one. I like it very much. It performs much better than the Sony AN-LP1, but it is not as convenient for travel, changing the battery is more difficult than it need be (and you need to use a "trick" to get the battery out of its holder), if you want to use AC power, you have to buy a Radio Shack (or equivalent) "after-market" AC adapter, and it is quite expensive.

That said, it is one terrific SW antenna!

Best,

Joe

Dear Cuhulin,

Probably, for general shortwave listening (not concentrating on one or two particular bands) and also for keeping expenses to a minimum, it is my opinion that the best outdoor antenna is the random long-wire. Note the word "long" - it has to be as long as is possible.

All you need is some heavy insulated wire, a couple of stand-off insulators, some rope or chain to attach the antenna to your supports on both ends (and they better be good supports), and some lead-in wire. (And a soldering gun!) Lightning protection is also necessary and probably you'll need a ground wire soldered to a copper stake driven into the earth as deep as possible.

I don't think the whole setup would cost much more than $30.00 (that's a "guestimate") and it might even cost less. You could get everything at a local hardware store.

Just remember - if you can't run a LONG straight wire, you'll need to try something else. 100 feet would be a bare MINIMUM.

(You do realize that all of the above applies to an antenna for a table-top shortwave receiver, or a sophisticated lap or porta-top radio, NOT a small portable.)

Best,

Joe

Actually 70' to 100' works well for all 'round use. If one starts to go longer than that you'll start to wind up with directivity issues the farther up the bands one goes.

>Just remember - if you can't run a LONG straight wire, you'll need to try something else. 100 feet would be a bare MINIMUM.<

OK, but I use a 60-footer to great advantage. If it were longer, it would (1) not fit in my yard; (2) exacerbate the horrid effects of nearby stations; and (3) sag a lot more than it does ;-).

You just don't need *that* much for general listening, and in a city with gobs of evil RFI, less could be better. I get loads of stations on it, although it is not good enough or high enough for consistent results below about the 49m band...which is not to say it doesn't work there too, because it does.

A random wire can work for a portable too, but some inductive coupling to the whip rather than a direct connection might be useful. This is very simple and effective to accomplish (just wrap the insulated end of your lead-in around the whip a dozen times), and it prevents staticky stuff, reduces overload and protects internal organs of your radio. I did this for years with a Radio Shack Astronaut-8 and got great results.

Single element common mode antennas are a poor choice for anyone that
lives in town. This type just picks up a lot of local noise. This type
works very poorly for me. If you live in at a semi-rural or rural area
it could be a good choice but that is not where most people live.

In addition if you live in a low noise area so this type of antenna is a
sensible choice then you should also have a good outside ground and use
a transformer to match the impedance of the wire. The transformer with
also prevent static electricity buildup on the wire from getting to the
radio input.

Hey, Dude. It's already November.

> Roger Wiseman has begun holding shiva and will not fuck sheep for 40
> days after the 4th as tribute.
>
> Now, where the hell will LLoyd Davies take his incessant whining?

NIM Busters will continue, but the location of the new board will be a closely held secret. According to the admin of the current board, Lloyd hasn't posted since last April. The posts allegedly by him are all by imposters.

The admin has not succeeded in dumping Wiseman in spite of eight months of trying, so the regulars will move to a new, secret board where Wiseman will not have access. The new board has added levels of security which will prevent uninvited posts from people like Wiseman, even if he does find its new location.

How do I know this? Simple: The new board has been in beta testing for the last eight weeks. That's why the NIM Busters board known to the public is receiving a much smaller number of posts than in the past. The regulars have gradually been invited to the new board and are posting there instead.

If you want access, install PGP on your computer, generate a key, and have your key signed by three other NIM Busters regulars. After that, you MAY be allowed to post to the new board.

Sorry, Woger. Your time is up.

One of the finest radios you will find. Many features. Several
different "front ends" for it. Very good reception and probably well
worth the money.

The World Can't Wait! campaign appears to be the brainchild of one Charles Clark Kissinger, a former SDS (Maoist) leader who today serves as a high-level organizer in the Revolutionary Communist Party. Kissinger created the anti-war coalition Not in Our Name, which is working closely with the World Can't Wait! campaign.

110. [OT] Rule #1

Newsgroup: rec.radio.shortwave
Date: 2005-11-02 02:45:55 UTC
From: SeeingEyeDog <lookin@u.org>
Message-ID: <11mga3f122pmaab@corp.supernews.com>
Source record: 47009

"One way or the other, we are determined to deny Iraq the capacity to develop weapons of mass destruction and the missiles to deliver them. That is our bottom line." - President Clinton, Feb. 4, 1998

"If Saddam rejects peace and we have to use force, our purpose is clear. We want to seriously diminish the threat posed by Iraq's weapons of mass destruction program." - President Bill Clinton, Feb. 17, 1998

"We must stop Saddam from ever again jeopardizing the stability and security of his neighbors with weapons of mass destruction." - Madeline Albright, Feb 1, 1998

"He will use those weapons of mass destruction again, as he has ten times since 1983."
- Sandy Berger, Clinton National Security Adviser, Feb, 18, 1998

"[W]e urge you, after consulting with Congress, and consistent with the U.S. Constitution and laws, to take necessary actions (including, if appropriate, air and missile strikes on suspect Iraqi sites) to respond effectively to the threat posed by Iraq's refusal to end its weapons of mass destruction programs."
Letter to President Clinton. - (D) Senators Carl Levin, Tom Daschle, John Kerry, others, Oct. 9, 1998

"Saddam Hussein has been engaged in the development of weapons of mass destruction technology which is a threat to countries in the region and he has made a mockery of the weapons inspection process."
- Rep. Nancy Pelosi (D, CA) , Dec. 16, 1998

"Hussein has chosen to spend his money on building weapons of mass destruction and palaces for his cronies."
- Madeline Albright, Clinton Secretary of State, Nov. 10, 1999

"We begin with the common belief that Saddam Hussein is a tyrant and a threat to the peace and stability of the region. He has ignored the mandate of the United Nations and is building weapons of mass destruction and the means of delivering them."
- Sen. Carl Levin (D, MI) , Sept. 19, 2002

"We know that he has stored secret supplies of biological and chemical weapons throughout his country."
- Al Gore, Sept. 23, 2002

"Iraq's search for weapons of mass destruction has proven impossible to deter and we should assume that it will continue for as long as Saddam is in power." - Al Gore, Sept. 23, 2002

"We have known for many years that Saddam Hussein is seeking and developing weapons of mass destruction."
- Sen. Ted Kennedy (D, MA) , Sept. 27, 2002

"The last UN weapons inspectors left Iraq in October of 1998. We are confident that Saddam Hussein retains some stockpiles of chemical and biological weapons, and that he has since embarked on a crash course to build up his chemical and biological warfare capabilities. Intelligence reports indicate that he is seeking nuclear weapons"
- Sen. Robert Byrd (D, WV) , Oct. 3, 2002

"I will be voting to give the President of the United States the authority to use force if necessary to disarm Saddam Hussein because I believe that a deadly arsenal of weapons of mass destruction in his hands is a real and grave threat to our security." - Sen. John F. Kerry (D, MA) , Oct. 9, 2002

"There is unmistakable evidence that Saddam Hussein is working aggressively to develop nuclear weapons and will likely have nuclear weapons within the next five years We also should remember we have always underestimated the progress Saddam has made in development of weapons of mass destruction."
- Sen. Jay Rockefeller (D, WV) , Oct 10, 2002

"In the four years since the inspectors left, intelligence reports show that Saddam Hussein has worked to rebuild his chemical and biological weapons stock, his missile delivery capability, and his nuclear program. He has also given aid, comfort, and sanctuary to terrorists, including al Qaeda members It is clear, however, that if left unchecked, Saddam Hussein will continue to increase his capacity to wage biological and chemical warfare, and will keep trying to develop nuclear weapons."
- Sen. Hillary Clinton (D, NY) , Oct 10, 2002

"We are in possession of what I think to be compelling evidence that Saddam Hussein has, and has had for a number of years, a developing capacity for the production and storage of weapons of mass destruction."
- Sen. Bob Graham (D, FL) , Dec. 8, 2002

"Without question, we need to disarm Saddam Hussein. He is a brutal, murderous dictator, leading an oppressive regime He presents a particularly grievous threat because he is so consistently prone to miscalculation And now he is miscalculating America's response to his continued deceit and his consistent grasp for weapons of mass destruction So the threat of Saddam Hussein with weapons of mass destruction is real"
- Sen. John F. Kerry (D, MA) , Jan. 23. 2003

Is Bill Clinton still president? Huh? What ever happened to taking
responsibility for your actions? It is Bush's watch, he takes the
blame. Period end.

The inspectors said Sadam didn't have WMDs. Bush chose not to listen to
them. He chose wrong. Now it is time for Bush to take his lickin' like
a man.

It's really time for you neocons to quit your whinin'. In neocon speak,
the end justifies the means, so Bill Clinton et all have no relevance.
You got the boots on the ground, but things didn't turn out so well,
did it. The locals throw IEDs, not flowers.

Cuhulin,

Consider a simple 'build-it-yourself' Shortwave Listener
(SWL) Antenna made from TV Parts.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6233

SWL ANTENNA PARTS - BUY THE FOLLOWING :

* 40 - 100 Foot Piece of TV 'type' 300 Ohm Twin Lead.
RadioShack Catalog # 15-1174
http://cgi.ebay.com/_W0QQitemZ5825567843
[Speaker Wire (24 AWG) or Landscaping Cable (16 AWG)
could also be used here for the Wire Antenna Element.]

* 300 Ohm to 75 Ohm Matching Transformer.
RadioShack Catalog # 15-1230
http://cgi.ebay.com/_W0QQitemZ5764013531
http://cgi.ebay.com/_W0QQitemZ5824268873
[Shortwave Longwire Antenna Balun Match 9:1 # SWLZ -or-
Shortwave Longwire Antenna Balun Match 9:1 # LMZ-75 made
by RF Junkie could be used with a Single Wire Antenna
Element instead by simply connecting the Two Wires
together at both ends.]
http://cgi.ebay.com/_W0QQitemZ5823838982
http://cgi.ebay.com/_W0QQitemZ5825174432

* 25 - 100 Foot piece of 75 Ohm RG6 Quad-Shield Coax Cable.
RadioShack Catalog # 15-1579 = 25 Foot Coax Cable
RadioShack Catalog # 15-1572 = 50 Foot Coax Cable
http://cgi.ebay.com/_W0QQitemZ5824932152
http://cgi.ebay.com/_W0QQitemZ5791766267

* One 2" Hose Clamp

* One Roll of Nylon-Poly Mason Line

* Some Electrical Tape and Plastic Wire Ties.

ASSEMBLYING THE SWL ANTENNA PIECES :

* Take one end of the Twin Lead and Strip-Off about
1 Inch of the Insulation and Twist the Two Wires Together
and Solder them; then Bend the Twin Lead back on itself
about 6 - 8 Inches and Wrap it with Electrical Tape and
Secure it with Plastic Ties. This is now your Far-End
of the Wire Antenna Element.

* Take the other end of the Twin Lead and Strip-Off about 1 Inch of the Insulation. Then take the TV Matching Transformer and Twist the Two Wires Together and Strip-Off about 1 Inch of the Insulation. Twist one Twin Lead Wire with one TV Matching Transformer Wire; and then Twist the other Twin Lead Wire with the other TV Matching Transformer Wire. Solder both sets of Twisted Wires, and wrap the joints with Electrical Tape. This is now your Near-End of the Wire Antenna Element with the Matching Transformer attached.

* Connect one end of the Coax Cable using the "F" Connector to the "F" Connector-End of the Matching Transformer.

RIGGING THE SWL ANTENNA :

* Find an OutSide Metal Cold Water Pipe going into the Ground that is under near some structure / object that can be used as a support for the Wire Antenna Element. [A Roof, the Eaves, a Tree, whatever; anything that is 8-12 foot High or Higher to Rig the Wire Antenna Element to that will keep it at least 8 Feet overhead.]

* Take a Brillo / Steel Wool Pad and clean an area about 2 Inches wide around the Metal Pipe.

* Place the Matching Transformer with the "F" Connector on the bottom along side the Metal Pipe. Use the Hose Clamp to Secure the Metal "F" Connector to the Metal Pipe and get a good Metal to Metal Electrical Connection. This is your Antenna Ground.

* Take the Wire Antenna Element and attach some Mason Line and Rig it to the First Antenna Support at/near the House; and Secure it in place.

* Take the Far-End of the Wire Antenna Element and walk stretch it to the point on the ground; where you Second Antenna Support is located overhead. [A Tree, Pole, Fence, whatever; anything that is 8-12 foot High or Higher to Rig the Wire Antenna Element to that will keep it at least 8 Feet overhead.]

* If there is going to be some left over Wire Antenna Element; then Coil it up in about a 6 Inch Diameter Coil with even and tight Turns and secure it with 5-6 Plastic Wire Ties.

* Now attach some Mason Line and Rig the Far-End of the Wire Antenna Element to the Second Antenna Support; and Secure it in Place

* Then Adjust the Rigging of both Antenna Supports so that the Wire Antenna Element is Tight and at least 8 Foot above

ground level. Use a Weight at the Far-End with the Mason
Line to allow for normal movement and loading of the Wire
Antenna Element.

* Finally run/route the Coax cable into your Radio Shack
and Connect it with the appropriate "F" Connector to ____
Adapter to your 'portable' AM/FM Shortwave Radio or Table
Top Shortwave Receiver as needed.
For Shortwave Receivers using a SO-239 Jack
for the SWL Antenna Input :
* * "F" Connector [Adapter] to SO-239 Connector
RadioShack Catalog # 278-258
* * For 'portable' AM/FM Shortwave Radios using a
1/8" Mono Phone Jack for the SWL Antenna Input :
* "F" Connector [Adapter] to 1/8" Mono Phone Plug
RadioShack Catalog # 278-257
* * Right-Angle "F" Adapter
RadioShack Catalog # 278-305
* * "F" Jack to Mini-Phone Plug Adapter
RadioShack Catalog # 278-267

I DON"T KNOW WHY THIS SWL ANTENNA WORKS :
But for some reason using about a Hundred Feet (100') of
Twin Lead or Speaker Wire seems to Cancel-Out a lot of the
local RFI / ENF Noise and yet still produces a fairly good
level of RF Signal for most Shortwave Radio/Receivers.
Think of it is a very long and very thin Loop Antenna.

CAUTION - You should have a Safety Ground for your Radio
Shack that is Bonded to your House's Electrical System.

hope this helps - iane ~ RHF

131. Workman BS-1 Dipole Antenna = Easy Mod to make it a Mini-Windom Antenna !

Newsgroup: rec.radio.shortwave
Date: 2005-11-02 11:14:04 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1130930044.904713.320520@g14g2000cwa.googlegroups.com>
Source record: 47030

For One and All,

- - - - Workman BS-1 Dipole Antenna - - - -
Easy Mod to make it a Mini-Windom Antenna !
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6232

First as many of your know, I am not a big proponent of Dipole
Antennas for Shortwave Listeners (SWLs). Mainly because Dipole
Antennas are generally : Frequency Specific; Bi-Directional;
and Require more Space and a 'relatively' High Mounting Height
to Function properly; as they were design. Often the Shortwave
Listener does not put them up high enough for effective operation
as a Dipole. This is especially true for Dipole Antennas that
are designed for use in the Lower-End of the Shortwave Band :
120 Meters = 195 Feet Tip-to-Tip and Mount at 98 Feet
90 Meters = 142 Feet Tip-to-Tip and Mount at 71 Feet
75 Meters = 119 Feet Tip-to-Tip and Mount at 59 Feet
60 Meters = 95 Feet Tip-to-Tip and Mount at 48 Feet

WORKMAN BS-1 DIPOLE ANTENNA :
Having said that - Here are some Antenna use 'ideas' about
the Workman BS-1 Dipole Antenna that comes complete with :
BS-1 => http://cgi.ebay.com/_W0QQitemZ5818266840
http://www.workmanelectronics.com/htmdocs/bs1.htm
http://www.workmanelectronics.com/htmdocs/bs1ham.htm

* Pair of 16.5 Foot "Arms" made of 12 AWG Insulated Wire
as Dipole Antenna Elements.
http://pix.auctiva.com/pix/03/32/77/__fp/bs1_ham_x.JPG
http://www.workmanelectronics.com/htmdocs/bs1.htm
http://www.workmanelectronics.com/htmdocs/bs1ham.htm

* Center Dipole Connector with Two Terminals and a SO-239 Jack.
http://pix.auctiva.com/pix/03/32/77/__fp/bs1_ham_hub.JPG
http://www.workmanelectronics.com/htmdocs/bs1.htm
http://www.workmanelectronics.com/htmdocs/bs1ham.htm

* Coax Cable 12 Foot RG58/U with PL-259 Connectors on both ends.
http://pix.auctiva.com/pix/03/32/77/__fp/bs1inst.gif
http://www.workmanelectronics.com/htmdocs/bs1.htm
http://www.workmanelectronics.com/htmdocs/bs1ham.htm

DIPOLE SIZE AND WAVE LENGTH {FREQUENCY} :
Remember the Workman BS-1 Dipole Antenna is 'only' 32 Feet Long
"Tip-to-Tip" and this would mean that this Dipole is a :

= Full Wave Length (1 WL) at 29.3 MHz
= Half Wave Length (1/2 WL) at 14.6 MHz
= Quarter Wave Length (1/4 WL) at 7.3 MHz
= Eighth Wave Length (1/8 WL) at 3.7 MHz
As a Dipole it should be mounted at about 16 Feet above ground,
but could be rigged as little as 8 Feet above ground.

WHY USE IT :
For those with limited space or restrictions this may be the
'small' Antenna for your Shortwave Listening (SWL) Needs.
There Reasons - Its 'complete' 'small' and 'low cost'.

HOW TO RIG IT :
Some Ideas on Rigging the Workman BS-1 Dipole Antenna using
the 'short' 12 Foot of Coax Cable. "IF" your Radio Shack has
a Window them Hang the Workman BS-1 Dipole Antenna outside
the Window :

* "UP" Under the Eaves of the House as a [Hidden] Shortwave
Listener's (SWL) Antenna.

* "From" the Eaves to near the Ground as a 'small' "Tilted"
or 'Sloper' Dipole Antenna.

* "From" the Eaves with the Center near the Ground as a
'small' "V" Dipole Antenna.

* "From" the Eaves by the Center with the Ends near the Ground
as a 'small' Inverted "V" Dipole Antenna.

"IF" you do not have a Window in your Radio Shack or can not
have an OutSide Antenna then Drill a Hole through the Ceiling
of the radio Shack and put the Workman BS-1 Dipole Antenna
In-the-Attic. Use any of the above Dipole Antenna Rigging
Schemes that meet your circumstances and individual needs.

TIP - For Multi-Story Apartment Build Dwellers - Hang
the Workman BS-1 Dipole Antenna outside a Window and
along side the building as a Vertical Dipole Antenna.

MAKING THE WORKMAN BS-1 DIPOLE ANTENNA INTO A MIN-WINDOM :
Fold one of the Wire Arms of this Workman BS-1 Dipole Antenna
over so that the "Arm" is Nine Foot (9') Long making the total
length of the Antenna 25 Feet Long and converting it to an
improved WINDOM Antenna.
Note - Don't Cut the Wire simply fold it over and back along
itself; and use a Plastic Wire Tie about every foot to hold
the two wires together -or- Make a 3.75" Diameter Coil with
the Extra Wire about Eight Turns and use Plastic Wire Ties
in 5-6 Places to hold the Coil together. The Coil can just
hang their on the end.

MINI-WINDOM SIZE AND WAVE LENGTH {FREQUENCY} :
If the Workman BS-1 is configured as a "Mini-Windom" Antenna
it would be a :
= Tip-o-Tip (25') Half Wave Length (1/2 WL) at 18.7 MHz
= Tip-o-Tip (25') Quarter Wave Length (1/4 WL) 9.4 MHz
= Tip-o-Tip (25') Eight Wave Length (1/8 WL) 4.7 MHz
= Long Arm (16') Quarter Wave Length (1/4 WL) 14.6 MHz
= Long Arm (16') Eight Wave Length (1/8 WL) 7.3 MHz
= Short Arm (9') Quarter Wave Length (1/4 WL) 26.0 MHz
= Short Arm (9') Eight Wave Length (1/8 WL) 13.0 MHz

TBL :
The Workman BS-1 Dipole Antenna is Complete and Ready to Rig !
When 'small' Is All You Can Do ! Just Do It ! ! !

READ - THE "IK-STIC" (One Kilo Watt Stick)
http://www.hometown.aol.com/realhamradio2/
This is essentially a Multi-Band Vertical Dipole Antenna which
is used in the field for quick set-up and quick band change.
Since operation on each band requires Antennas of different
lengths, I devised a quick method of modifying the Length to
suit the Band you choose to operate. There are NO Coils or Traps.
Each Dipole Band gives 100% Radiation, thereby allowing maximum
signal at maximum height.

It's interesting that all the stupid liberals were 'for it', and then when someone comes along with the guts to do something about what they were whining about then they are 'against it'.

Boggling!

Hi, im paulos

I was wondering is there a formula to help me find the distance of a shortwave transmitter. I have google it and couldnt find much, is there anyone out there who can help me on this little problem?

thanks in advance
paulos

P.S Whats the furthest groundwave can go?

Did you know that weapons of mass destruction have been found in Iraq?

Disinformation: 22 Media Myths That Undermine the War on Terror
by Richard Miniter

* 1.77 metric tons of enriched uranium
* 1,500 gallons of chemical weapons agents
* 17 chemical warheads containing cyclosarin (a nerve agent five
times more deadly than sarin gas)
* Over 1,000 radioactive materials in powdered form meant for
dispersal over populated areas
* Roadside bombs loaded with mustard and "conventional" sarin gas,
assembled in binary chemical projectiles for maximum potency

This is only a PARTIAL LIST of the horrific weapons verified to have
been recovered in Iraq to date. Yet Americans overwhelmingly believe
U.S. and coalition forces have found NO weapons of mass destruction.

The question is: WHY do they believe this lie?

Turn on the TV at any given moment, and you're likely to see some
earnest media "expert" telling you confidently that America faces a
serious threat from suitcase nukes, that Al-Qaeda terrorists are
streaming across the Mexican border, that there was no link between
Al-Qaeda and Saddam Hussein, and that Iraq is another Vietnam. There's
just one problem with all this: none of it is true. Richard Miniter
explains why these and other popular media factoids and urban legends
are not only wrong, but severely damaging to our war effort, in

Disinformation: The 22 Media Myths That Undermine the War on Terror.

In Disinformation Richard Miniter reveals:

* Three common myths about the Bush Administration that have been spread widely by Michael Moore's film Fahrenheit 9/11
* The 9/11 hijackers used box-cutters to take control of the four planes they hijacked, right? Wrong -- and how this popular myth got started
* How bin Laden declared war on America five separate times and pursued his jihad war against the United States throughout the 1990s -- contrary to liberal media claims that no one had heard of him before 9/11
* Bush knew? No -- as is clear from this close examination of the CIA memo that supposedly warned him about possible hijackings before 9/11
* Are U.S. troops in Iraq to make the world safe for Halliburton? No -- in fact, Halliburton has not made a fortune in Iraq, and is even trying to sell its division that runs Iraqi operations
* A war for oil? Why the U.S. is not fighting one in Iraq or anywhere else
* Clear, uncontested, proven links between Saddam Hussein's Iraq and Al Qaeda
* Suitcase nukes? Relax: most of the information causing the panic about them has come from one Russian general who has changed his story many times
* Borders out of control? How, as unlikely as it sounds, there are actually no known cases of Al Qaeda terrorists sneaking across the Mexican border
* Why so many people are so eager to believe these War on Terror myths, no matter how outlandish they are

Miniter marshals the evidence -- all the evidence -- that shoots down this dangerous disinformation and refutes the legions of shallow media talking heads who mindlessly repeat it. If you want the real truth about the War on Terror and what we must do in order to win it, Disinformation is the indispensable starting point.

> DRM. Universal-Radio has them for $328.00.
> Seems reasonable?

I think it's a great little receiver. I've had one for a couple of years now. Downside is lack of any knobs or lights on the front. Some like running their radio from their PC but I find it awkward most of the time. If I had the money I would've gotten a RX-350D or (gulp) a RX-340 but those are a LOT more money. Admittedly they also have better RF and DSP along with some whiz-bang features but overall I'm very satisfied with RF/IF/DSP capabilities in the RX-320D already.

I personally don't see any attraction to DRM so that's a non-factor to me, but if you're interested there are numerous software packages for doing so.

I don't care anything about DRM either.I guess I will check out Ten-Tec's website.Of course those Canadians will say Ten-Tec Radios aren't any good because they are made in the South in Tennessee,same as they will say MFJ products aren't any good because they are made in Mississippi same as they will say Nuclear Ships and Nuclear Submarines made in Pascagoula,Mississippi aren't any good same as they will say Nissan (there is talk Kia might build a factory here in Mississippi) cars and trucks and vans and suvs aren't any good because there is a Nissan factory at the Gluckstat,Mississippi I-55 exit exit same as they will say the Parachutes that landed the Rovers on Mars aren't any good same as they will say Military clothing articles for U.S.Military Troops made by Mississippi Industries for the Blind here in Jackson,Mississippi aren't any good same as they will say the parts for U.S.Air Force Fighter Jet Aircraft made in that factory near Meridian,Mississippi aren't any good same as m II said only people from the South do beastiality,but that fool won't check out things like that that goes on in Canada every day.

But SLA, AGM and gel cells all have different charge profiles and
float voltage requirements. SLA batteries indeed can be floated all
day, but wet-cells -- even sealed ones -- are far more tolerant than
AGM and gel cells.

Obviously you have not read the book, and yet you are ready to say
that it's a made up shit of rumors and innuendos. This is a proof that
your beliefs are based purely on a dogmatic faith (or rather, hatred)

than objective evaluation of all available sources of information.

>The French were right..

>The U.N. was Right

I prefer to make my own mind what I should accept and what not. Trendy and fashionable views, especially if pushed with a certain level of hysterical, impatient, unquestioning, patronising and dogmatic belief, are always suspect, no matter from which side of politics they emanate.

This is interesting. But unfortunately, this name is far from unique:
A Google search yields 240,000 hits. There are too many George Bells
around, and I am the least significant one by far.

George Bell

BWAHAHAHAHA Lloyd! Bell South can advertise anywhere they damn well
please, especially if they can't get enough linemen who stand up when
they pee. So they come here to Glendale and advertise in the place
where the most shemales will see it, the Shipwreck Lounge. I said
that they move south after they get a job, but you missed it. Looks
like you fucked up again!

I find some really hot dates in the Shipwreck Lounge myself. I moved
to Glen Haven Avenue because a lot of shemales live on that street.

178. Hal Turner Joins Nazis to March on Kingston

Newsgroup: rec.radio.shortwave
Date: 2005-11-02 15:47:59 UTC
From: NewsGuy <NewsGuy2005@gmail.com>
Message-ID: <1130946479.495282.220060@g43g2000cwa.googlegroups.com>
Source record: 47127

BREAKING NEWS - In an announcement made on the NSM podcast with "Minister of Propoganda" Vonbluvens, far-right Internet radio host Hal Turner has announced an alliance with the National Socialist Movement (NSM) for a protest rally in Kingston, NY against anti-White hate crimes committed by African-Americans.

A rally has reportedly been in the works after Turner interviewed the mother of 14-year old Robby Hedrick, who was savagely beaten by an African-American schoolmate on October 7th at Kingston High School. The African-American student, two years older and weighing in at 300 lbs., walked up behind the 130-lb. Hedrick, grabbed him by the hair, said "I hate you white niggers" and proceeded to beat him so badly his cheek bone was shattered and the orbit (bone socket surrounding the eye) was fractured in several places. Hedrick's friend, also White, was severely beaten by another African-American student during the assault.

Despite the African-American student's use of anti-White racial slurs while attacking the White Hedrick, police have refused to press "hate crime" charges against the attacker.

A second Black-on-White bias assault in Kingston, NY has forced Turner to stop talking and take action.

The rally is going to be held on Saturday, November 19th in Kingston, NY at 12:00 noon. Despite the NSM's October 16th Toledo rally turning into a race riot between police and African-Americans, Turner emphasises his protest is going to be a "peaceful and lawful" demonstration against anti-White bias crimes committed by African-Americans. "I have no intentions whatsoever of this becoming a criminal situation on our part or having any of our people injured or arrested," Turner wrote in a press statement on his website.

Turner makes his appeal to Whites of all backgrounds and ideologies to make a stand at the Kingston rally. "If we don't stand up as a group together, it very well may be your kid next. Because this racial problem is not limited to Kingston, NY," he said on the NSM podcast.

Further details can be found on Hal's website
http://www.halturnershow.com

Source record: 47134

For One and All,

The MAGIC of the Hundred Foot (100') Long {Random} Wire Antenna
for the Shortwave Listener (SWL).
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6237

Assuming that the Wire Antenna Element is 100 Foot Long and
strung-out Horizontal [Flat].
Reference => http://www.radiomods.co.nz/radiomath.html

* One Wave Length (1 WL) = 936 / 100 = 9.4 MHz
With 1 WL Harmonics at : 18.7 MHz and 28.1 MHz
Useable on the 31 Meter and 15 Meter Shortwave Bands

* Half Wave Length (1/2 WL) = 468 / 100 = 4.7 MHz
With 1/2 WL Harmonics at : 9.4 MHz, 18.7 MHz and 28.1 MHz
Useable on the 60 Meter, 31 Meter and 15 Meter Shortwave Bands

* Quarter Wave Length (1/4 WL) = 234 / 100 = 2.3 MHz
With 1/4 WL Harmonics at : 7.0 MHz, 11.7 MHz, 16.4 MHz,
21.1 MHz, and 25.7 MHz.
Useable on the 120 Meter, 41 Meter, 25 Meter, 13 Meter
and 11 Meter Shortwave Bands

OBTW ? ? ?

Which is the Right Number in the Formula for Calculating
the Wave Length in Feet and Frequency of an Antenna ? ? ?
http://www.radiomods.co.nz/radiomath.html

How do I find the Wavelength of a Frequency ?
= In feet: 984 divided by Frequency in MHz.

How do I calculate the length of wire I need
to build a wire antenna ?
= Full wave: 984 divided by Frequency in MHz
equals the length in Feet.

You must use the following Math to correctly cut an Antenna !
= Full Wave = 936 divided by Frequency.

So where in my mind did I get the :1005" for Calculating the
the Full Wave Length of an Antenna and its Frequecy ? ? ?

188. Hal Turner Joins Nazis to March on Kingston

Newsgroup: rec.radio.shortwave
Date: 2005-11-02 16:41:57 UTC
From: NewsGuy <NewsGuy2005@gmail.com>
Message-ID: <1130949717.501299.101610@z14g2000cwz.googlegroups.com>
Source record: 47138

BREAKING NEWS - In an announcement made on the NSM podcast with "Minister of Propoganda" Vonbluvens, far-right Internet radio host Hal Turner has announced an alliance with the National Socialist Movement (NSM) for a protest rally in Kingston, NY against anti-White hate crimes committed by African-Americans.

A rally has reportedly been in the works after Turner interviewed the mother of 14-year old Robby Hedrick, who was savagely beaten by an African-American schoolmate on October 7th at Kingston High School. The African-American student, two years older and weighing in at 300 lbs., walked up behind the 130-lb. Hedrick, grabbed him by the hair, said "I hate you white niggers" and proceeded to beat him so badly his cheek bone was shattered and the orbit (bone socket surrounding the eye) was fractured in several places. Hedrick's friend, also White, was severely beaten by another African-American student during the assault.

Despite the African-American student's use of anti-White racial slurs while attacking the White Hedrick, police have refused to press "hate crime" charges against the attacker.

A second Black-on-White bias assault in Kingston, NY has forced Turner to stop talking and take action.

The rally is going to be held on Saturday, November 19th in Kingston, NY at 12:00 noon. Despite the NSM's October 16th Toledo rally turning into a race riot between police and African-Americans, Turner emphasises his protest is going to be a "peaceful and lawful" demonstration against anti-White bias crimes committed by African-Americans. "I have no intentions whatsoever of this becoming a criminal situation on our part or having any of our people injured or arrested," Turner wrote in a press statement on his website.

Turner makes his appeal to Whites of all backgrounds and ideologies to make a stand at the Kingston rally. "If we don't stand up as a group together, it very well may be your kid next. Because this racial problem is not limited to Kingston, NY," he said on the NSM podcast.

Further details can be found on Hal's website www.halturnershow.com

The thought of getting away with an impossibly high return (aka greed)
is enough to blind many of us to the facts. There have been several
recent pyramid swindles of the very wealthy. Otherwise sophisticated
investors were taken in by someone who was recommended by a neighbor
who was amazed at the high return. Inevitably the scheme is nothing
more that money from later investors used to pay earlier investors. It
works until someone asks for their money back and the music stops. Out
of embarrassment the authorities typically have a very difficult time
getting any of the victims to talk.

People can make really irrational decisions when they get into a crowd.
A classic on this topic is Memoirs of Extraordinary Popular Delusions
and the Madness of Crowds by Charles MacKay in 1850. It recounts all
the classics including Dutch Tulip Bulb mania.

Oh, c'mon, Steve, that's not true. There are several members here
who are not only very liberal, but decent people, who can disagree
without invoking one's family tree, or mulitiplicative proclivities.

Truth is, that I'm a bit more conservative than most, to the degree
that Rush Limbaugh is too liberal for me, and yet, most of my closest
friends are very far to the left. And in the last two decades, despite
sharp disagreements, there have been no shootings.

Of course, I'm the only one that's armed....:)

It's not a matter of political preference that determines the matter.
It's how afraid of the other side one is that determines the stridency
of the argument, and the depth to which people of opposing views can
find unrelated common ground.

Cases in point: the number of us here who disagree in extreme
measures politically, but who find no difficulty in being of good
nature, and enjoying common interests. Or even the political discussions
themselves.

They are few, granted, but they do exist.

Here endeth the rant.

:::returns to 7030+ to find something that isn't Gene Scott's hat.:::

Holy Cow! Stop the presses!!!

Have you guys (Bell and Miniter) told this to the Shrub yet? If you recall, in December of 2004 the Administration themselves disavowed WMDs in Iraq, so I'm sure they would like to hear about this...

P-STYLE=azeqi>

> P.S Whats the furthest groundwave can go?

That depends on several things like frequency, ground conductivity,
transmit power and antenna pattern. AM broadcast is usually good for a
few hundred miles but you are asking about short wave. Short wave
broadcasters mostly uses the ionosphere to reflect the signal back to
the ground and do not depend on ground wave. Short wave antennas direct
most of the signal at an angle from the ground into the air to be
reflected by the ionosphere back to the ground over long distances.
This ground skip can be thousands of miles depending on time of day,
the antenna angle and frequency.

Why do you lie miso?

...
Iraqi intelligence documents seem to identify the Somalia ambush as the first incident of cooperation between Sudan, Iraq, and Osama Bin Laden. An Iraqi document signed by Saddam's secretary shows that the regime demanded that action was made to "hunt the Americans" in Somalia using "Arabian elements, or Asian (Muslims) or friends." The Iraqi documents list a range of groups available for participation in the operation. Muhammad Farrah Aidid, who led the ambush, even met with Iraqi intelligence in Khartoum.

From then on, there are periodic meetings between the Iraqis and Al-Qaeda officials. Training of Al-Qaeda operatives began in 1995 [during Impeached Clintoon's watch] as a result of meetings between the Iraqis and Abu Hajer al-Iraqi, known as Osama Bin Laden's "best friend." From then on, there would be a great number of meetings, participated in by many different leaders and officials of the Iraqi regime and Al-Qaeda. A stream of defectors would report cooperation between the two, as would many intelligence services.

Cooperation from the mid-1990s up until the war steadily increased, eventually culminating in Iraqi training of Al-Qaeda members in document forgery, bomb production, WMD development, and other activity. On more than one occasion, the Iraqis would go on alert and then an Al-Qaeda terrorist attack would be attempted. Iraq would also actively work with Al-Qaeda (and Syrian intelligence) to prepare the guerrilla war we're facing today.

I'm aware of new evidence that Iran played a direct role in 9/11 and sponsoring Al-Qaeda and this is not contradictory. In fact, documents brought to light by Ken Timmerman show that Imad Mughniyah of Hezbollah, high-level Iranian officials, high-level Iraqi intelligence officials and high-level Al-Qaeda operatives met in Iran in October 2001. So Bin Laden relied on several avenues of support, which made sense, as this meant he couldn't be held down by one state's interests.
...
Saddam passed his WMDs into other countries long before Operation Iraqi Freedom began. Iraq's WMDs have long been, all the way back to the 1990s, connected to other state's WMD programs. By the late 1990s, a great part of Iraq's nuclear program was based in Libya as a joint project. Iraqi WMD would be routinely moved in and out of Syria to avoid inspections.

So the fact that Syrian defectors, Iraqi scientists and foreign intelligence sources indicate the WMD was moved to Syria, Lebanon, Libya and Iran is not surprising at all. American satellites saw traffic moving from Iraq into Syria between January 2003 and the war's beginning, and at this time the Iraqi border guards were replaced with Iraqi intelligence. Iran has even

taken in some Iraqi chemical and biological weapons equipment, just like they took in Iraqi aircraft in 1991.
...
UN inspectors even CONFIRMED in the 1990s [during Impeached Clintoon's watch] this was going on. Iraqi WMD expertise has been confirmed to be in other countries as well (and Duelfer confirmed that Qusay Hussein prepared for such expertise to go to Syria) . This is not at odds with Duelfer or Kay, who both confirmed there were reports of WMD going to Syria and that trucks full of "Iraqi equipment" went to Syria but we don't know the contents. Duelfer even said there was evidence Syria offered to harbor Iraqi WMD, but he couldn't confirm that they did in fact do that because the insurgency stopped his team from completing the investigation.
...
Don't fool yourself, they [RUSSIA] are the ones arming Syria, Iran, and China. In my book, I chronicle how deeply involved Russia was in helping Saddam Hussein on many levels. The Russians, as part of their geopolitical strategy and because of the oil they got from Iraq, helped him at every end.
...
Former Prime Minister Yevgeny Primakov, a long personal friend of Saddam Hussein, went to Iraq before the war with two former Soviet generals that some suspect advised Iraq on how to fight the coming war. The highest ranking intelligence officer ever to defect from the Soviet Bloc, Ion Mihai Pacepa, has come out and said that the Soviets long had a plan entitled "Sarindar" or "Emergency Exit" for its third-world allies, originally Libya but later Iraq, to abandon evidence of their WMD activity if an invasion by Western forces was expected. Pacepa says he was personally consulted on the plan by Yuri Andropov, Yevgeny Primakov, Leonid Brezhnev, and other leaders. The aim was to rid the targeted country of Russian involvement in their WMD programs, as well as to "frustrate the West by not giving them anything they could make propaganda with." They [and Neo-Komms] aimed to discredit the West.

Why do you lie McDonald?

...
Iraqi intelligence documents seem to identify the Somalia ambush as the first incident of cooperation between Sudan, Iraq, and Osama Bin Laden. An Iraqi document signed by Saddam's secretary shows that the regime demanded that action was made to "hunt the Americans" in Somalia using "Arabian elements, or Asian (Muslims) or friends." The Iraqi documents list a range of groups available for participation in the operation. Muhammad Farrah Aidid, who led the ambush, even met with Iraqi intelligence in Khartoum.

From then on, there are periodic meetings between the Iraqis and Al-Qaeda officials. Training of Al-Qaeda operatives began in 1995 [during Impeached Clintoon's watch] as a result of meetings between the Iraqis and Abu Hajer al-Iraqi, known as Osama Bin Laden's "best friend." From then on, there would be a great number of meetings, participated in by many different leaders and officials of the Iraqi regime and Al-Qaeda. A stream of defectors would report cooperation between the two, as would many intelligence services.

Cooperation from the mid-1990s up until the war steadily increased, eventually culminating in Iraqi training of Al-Qaeda members in document forgery, bomb production, WMD development, and other activity. On more than one occasion, the Iraqis would go on alert and then an Al-Qaeda terrorist attack would be attempted. Iraq would also actively work with Al-Qaeda (and Syrian intelligence) to prepare the guerrilla war we're facing today.

I'm aware of new evidence that Iran played a direct role in 9/11 and sponsoring Al-Qaeda and this is not contradictory. In fact, documents brought to light by Ken Timmerman show that Imad Mughniyah of Hezbollah, high-level Iranian officials, high-level Iraqi intelligence officials and high-level Al-Qaeda operatives met in Iran in October 2001. So Bin Laden relied on several avenues of support, which made sense, as this meant he couldn't be held down by one state's interests.
...
Saddam passed his WMDs into other countries long before Operation Iraqi Freedom began. Iraq's WMDs have long been, all the way back to the 1990s, connected to other state's WMD programs. By the late 1990s, a great part of Iraq's nuclear program was based in Libya as a joint project. Iraqi WMD would be routinely moved in and out of Syria to avoid inspections.

So the fact that Syrian defectors, Iraqi scientists and foreign intelligence sources indicate the WMD was moved to Syria, Lebanon, Libya and Iran is not surprising at all. American satellites saw traffic moving from Iraq into Syria between January 2003 and the war's beginning, and at this time the Iraqi border guards were replaced with Iraqi intelligence. Iran has even

taken in some Iraqi chemical and biological weapons equipment, just like they took in Iraqi aircraft in 1991.
...
UN inspectors even CONFIRMED in the 1990s [during Impeached Clintoon's watch] this was going on. Iraqi WMD expertise has been confirmed to be in other countries as well (and Duelfer confirmed that Qusay Hussein prepared for such expertise to go to Syria) . This is not at odds with Duelfer or Kay, who both confirmed there were reports of WMD going to Syria and that trucks full of "Iraqi equipment" went to Syria but we don't know the contents. Duelfer even said there was evidence Syria offered to harbor Iraqi WMD, but he couldn't confirm that they did in fact do that because the insurgency stopped his team from completing the investigation.
...

CIA intelligence failures, Iraq War and the Democrats' treason

Gerard Jackson
BrookesNews.Com
Monday 26 September 2005
http://www.brookesnews.com/052609cia_print.html

The American public is still asking as to why the CIA failed to foresee and take counter measures against the attack on the Pentagon and the World Trade Centre? What was the FBI doing? Well, we have some of the answers: impeached Clinton's administration policy, which was reinforced by the thoroughly despicable Jamie Gorelick, of setting up a 'wall' between the CIA, the FBI and local law enforcement agencies destroyed interdepartmental cooperation.

However, this does not explain why US intelligence has failed so badly in dealing with Middle Eastern terrorists. The answer lies in Congress. To be more specific, Democratic Congressmen who went out of their way to cripple America's intelligence agencies. In this endeavour they had the aid and encouragement of the Washington-based Institute of Policy Studies (IPS); an extreme leftwing organisation that has not only supported every communist regime that ever existed but every leftwing terrorist organisation, specially the PLO.

For years the IPS waged a successful campaign of vilification against America's intelligence agencies, even as it was cooperating with the KGB, Castro's DGI and other communist intelligence agencies, including East Germany's STASI. Thanks to this treasonous campaign and its policy of exposing CIA operatives, one of whom was murdered, the CIA's international network of contacts was badly compromised with foreign contacts cutting off communications from fear of being exposed and possibly murdered.

In 1975 the Center for National Securities Studies (CNSS) ' an IPS front ' produced Abuses of the Intelligence Agencies a brazen piece of disinformation which influenced the infamous Church and Pike committees that had been set up to investigate American intelligence agencies. This was no surprise considering that not only were KGB agents Wilfred Burchett and Philip Agee mainly responsible for the contents of the publication but both committees, especially the Church committee, had a significant number of sympathisers and members of the IPS on their staffs.

When Carter became president in 1977 he appointed IPS sympathisers to the White House staff who were virtually given carte blanche to dismantle the America's intelligence structure, which is just what these America-haters did.

Without the activities of the IPS the 1974 Hughes-Ryan Act would never have come into existence. This pernicious piece of legislation crippled intelligence operations by guaranteeing they would be leaked to America's enemies. Thus the legislation was written with the intention of sabotaging American intelligence.

There are two common threads here: a) those who took measures to cripple intelligence gathering were all Democrats; b) they were all connected by one means or another to the pro-Soviet IPS. Opposition to the Intelligence Agents Identities Protection Act consisted entirely of hardcore Democrats like Pat Schroeder, Charles Schumer and John Conyers. The Act had been designed to protect the lives of American agents by preventing anyone from revealing their identities. Needless to say, opponents of the Act are IPS supporters. Just as one would expect, the leftwing mainstream media did not bother to ask them why they were opposed to protecting American agents.

(The ineffable anti-American Conyers is a Castro sympathiser who also supported the attempted Marxist-Leninist conquest of Central America. Needless to say, he hates Bush, defended Hussein, loves the Marxist Chavez of Venezuela and supports domestic terrorists like Peltier and Mumia.)

Because of the IPS and its congressional supporters American intelligence was put in a straitjacket that denied it the power to keep track of the Islamic terrorist network that has been formed in the US. Federal agents could not without great difficulty even attend conferences that pro-terrorist speakers address!

They could not even put these pro-terrorist groups under surveillance unless they provide the Attorney General with almost irrefutable proof that a crime, say the bombing of the World Trade Centre, is going to be committed. How this evidence was to be obtained without surveillance or infiltration was never explained by the likes of Charles Schumer, Schroeder, Conyers and the other Democrats that call themselves patriots.

And who was the driving force behind this legislation? That's right, the IPS. This is what the pro-Soviet, pro-Castro, pro-PLO Richard Barnet, one of the founders of the IPS, had to say about American intelligence: ''[it's] a criminal enterprise which must be dismantled.'

However, this is what General George Washington said in 1777 about the need for intelligence gathering:

The necessity of procuring good intelligence is apparent & need not be further urged ' all that remains for me to add is, that you keep the whole matter as Secret as possible. For upon secrecy, success depends in Most Enterprises of the Kind, and for want of it, they are generally defeated, however well planned and promising a favorable issue.

But then Washington was a patriot, unlike certain other so-called Americans, including some in Congress and the US Senate.

The situation under impeached Clinton's watch was no better. Under his stewardship the standard for the recruitment of foreign agents and informants was raised to a level so strict that John the Baptist wouldn't

have passed muster. This had the intended effect of crippling the accumulation of foreign assets. I say intended because what other explanation could there be for a policy that crippled foreign intelligence gathering? Moreover, people who were influenced by the IPS were recruited by the CIA, including many from the universities Middle Eastern Studies departments. These departments are notorious for being anti-Semitic and anti-Western.

Without sound intelligence the human cost of effectively dealing with terrorism is only going to rise, making the war against terrorism bloodier than it need be.

Interview with the "Butcher of Basra"

Ali Ibrahim Al-Tikriti:

During the revolution I played a 'strong man' approach. Saddam always admired the tactics of Joseph Stalin and he was my regional leader. He emphasized Saddam's tactics of striking fear into the population and forcing the population to fear us and give them only one option and that option being the Ba'ath Party.

We engaged in a heavily charged propaganda campaign speaking on the street, spreading information through any media or community event we could. Once our foot was in the door we would force the people through 'offers they couldn't refuse' to go along with our ideology.

During the actual revolution it was done in a manner not to really overthrow the government as much as it was to strike fear into the population, much like Adolf Hitler did with his brown shirts. Much aid was brought in from the Soviet Union at the time including propagandists and advisors of all sorts, similar to what happened in 1958 in Iraq during that coup.

We received smaller amounts of monetary support this time and it was limited to only propaganda and weapons. With help from the Nasser regime in Egypt the government was quickly and easily overrun which paved the way for the Ba'ath Party to maintain control through fear tactics adopted from Stalinist Russia.
...
I can personally vouch for Saddam's WMD programs. I helped protect his scientists and their documents while I was there. His nuclear program was at the top of his list and Saddam was very interested and sent out his security forces to hunt down a nuclear weapon when the Soviet Union fell. There were rumors amongst the inner circles that he had a crude nuclear weapon but I never saw it. I did handle as well as my units VX, Sarin and mustard gas. We were supplied with Russian NBC protective suits and they were always updated. Vast networks of bunkers were built to protect the military when such weapons were to be used. There were chutes built from the bunkers to the surface to launch these weapons in mortar shells in a surprise attack upon enemy forces approaching.

There is no doubt in my mind that Saddam had these weapons when the United States invaded. Saddam never did anything that he believed showed weakness. His weapons programs were also always a top priority for research and development because he knew he could always purchase conventional weapons abroad. The relationship between the Ba'ath Party in Baghdad and Damascus were one in the same. There is no doubt in my mind that if Saddam wanted to he could have sent such weapons and documents to Syria with ease. Assad and

especially his generals would have welcomed such an idea or proposal from Saddam.
...
...my life today is in danger from old Ba'athists as well as Islamic Jihadists and their ilk to silence me from speaking out against them and Saddam Hussein and supporting the United States liberation. We receive death threats and are told by law enforcement authorities to try in avoid public appearances and putting on spotlight on us. I choose not to along with many others because the truth must be said and proclaimed. The voices of murder and genocide must not be allowed to reign freely under the guise of 'freedom of speech'.
...

DemoKrats Unhinged

Recall that the removal of Saddam Hussein was demanded by two presidents, one of them -Impeached Bill Clinton - a Democrat, and was authorized by a majority of Democrats in multiple Congresses. The last three Democratic presidential candidates http://moonbatcentral.com/wordpress/?p=1711 have considered Saddam's WMDs a major national security threat. Recall that the authorization for the use of force to remove Saddam was passed by Democratic majorities in both houses and that John Kerry - a member of the Senate Intelligence Committee with access to all the intelligence information that the Bush administration had - spoke eloquently on behalf of the authorization to remove Saddam by force.

Old man Luke (sometimes,you might see him posting at
www.pipelinenews.org or it might be a dot com) lives in
Hattiesburg,Mississippi at 9 Southern Lane,if he hasen't moved already.A
couple of years ago he was gripeing about a section 8 houshing apartment
building that was built on the street right smack dab behind his house.
www.kagnewstation.com Luke was at Kagnew Station many years ago.He
worked in decypering radio signals at Kagnew Station.He is old and
senile too,sometimes he actually doesn't know just how old he really is.

Maybe a phone call to the local authorities might cure him of his peeping tomfoolery? There is absolutely no doubt that Cuhulin the Droolin' is one very sick deviant. Between his desire to be a young girl with a thing for german shepherds and his peeping tom act it would be for the best if he were to be institutionalized and get the help that he so desperately needs.

« Reply #4 on Today at 2:01pm »

Meeting GOD and DARWIN HALF WAY

Charlie seeks your Comments here or at

http://www.aussieseek.com

The Talk of the Web

As I was asked.

Firstly I understand evolution to be that mechanism in our and all DNA
that allows life to survive and continue to reproduce and prosper in
its environment as its environment changes slowly.

We did not evolve from todays monkeys as evolution assumes that some
long time ago we had the same ancester and we forked off to what we
have become today while the monkey became what it is today.

As we are destroying todays environment that allows the monkey to
prosper and we are destroying it faster than evolution works todays
monkeys will "die out".

Intelligent design is the irrational concept and strange belief that
man will never understand all natural concepts that allows our world to
work. It is the belief that our lack of understanding of these areas of
our world proves there is a God.

It will lead to a loss of religion and a loss of mans belief in a God
as man is everyday rolling back his ignorance of the physical world he
lives in.

Thus man is discovering the areas that Intelligent Design is using
today to prove there is a God. So tomorrow when we understand these
areas we will have no need for a God.

Intelligent design assumes that when man knows everything about how his
physical world works there will be no need for his spiritual world.

In good old Australian it is rubbish and has nothing to do with one's
belief structures.

I became aware of my God before I believed in his existance when I
studied the periodic table in Chemistry.

The table allows man to comprehend how all chemical elements exist and how these elements create compounds and why atoms of elements and compounds react with each other to create one or more stable compound(s). The end result is always stability or a balance that becomes stable until another compound is added. It is so wonderful and so simple I believed that it must have been created by a "FORCE" that wanted stability. That "FORCE" is my God.

Christ and many others have given us the rules for man to create stability in our world and we are not listening.

By his very nature man knows that the world will only prosper when we are not fighting each other.

We know what our God wants of us because our God has given it to nature and our Old Testament is full of the reasons why we turn our back on what our God wants of us time and time again.

The failures of Intelligent Design concepts are so obvious I fail to understand why one would think it was required.

Like all man made concepts it has within it its own destruction.

When I was first on my own I lived in Florida and I met a 37 year old blonde who hung out in the neighborhood bar and she took a liking to me. A little while later I found out that she not only hung out there but that she was hung if you get my drift. Then before anything could happen that shemale moved to Glendale, WV and I missed her and worried a lot about was I gay? So I went to WV and found her at the Shipwreck Lounge on Ohio street by the river.

I felt a lot better after she proved to me that I was a lesbian because lesbians like naked girls.

The Veteran's Administration would be a good start. They make house
calls to help the victims of mental breakdown. Once they see what he has
stacked up all over the house, Cuhulin will get a long needed rest in a
nice 'home'.

I'm not drunk. I haven't finished my first 12 pak yet.
I'll get there and when I do it's back to the cemetary.

She gives great cancerous BJ's.....thanks Canucky boy!

How far north did the Katrina effect? I saw someone's mom floatin down the mighty Mississippi!

Dug her ass right up! She was too damn ugly to have sex with before she died. The old bag o bones fell apart in my hands! She didn't complain about much either other than the lousy sex she got from those foursomes with you, Mike and her husband.

love dem bones....dem bones....dem bones

rattllin' bones!

squeek...squeek...

Skeleton rides 50 cents a pop! If you can stand the smell....I wonder is she stunk that bad in life?

hahahaha....I'm still laughin' at your sorry ass family! This is funny stuff!

She is very fresh but not that fresh!

hehe...I love dem bony women....rotten to the core.....

um...umm....good!

I love it....did she do it for you too?

Please accept my apology for abusing her. I'm sorry that I did not toss her back into the black depths that she came from. Next time,I will be sure to take care of that. I promise that I will refill the hole with the dirt that came out too. In addition, I will re sod the plot at no additional charge. Let me also apologize for the milky

substance in her left eye socket, that was an unavoidable accident.
please feel free to include this post in your sig file!

You might as weel keep it up there...I love the ole boney bitch!

Dem Bones! Dem Bones! Dem Bones! I loved playing dem Bones!
Dem Bones! Dem Bones! Dem Bones!
I loved playing dem Bones! I ran my fingers uo and down dem bones and
she began to come alive!
I played dem bones like they never been played and she smiled for me all
the day.

Pork and bones....

DON'T HURT CANADA! I'll miss those nights with the ole bony lady!

The most fun I ever had!

Sporting a new moniker (GraveDigger) just for you and mommy...

He knows the inside of his mom's boney butt! hahahaha

hahahaha.....when you got thru lickin I was stickin.....

This .sig file will continue until Mister Fort posts a sincere apology
to all cancer victims and their families. His refusal to do so says more
about his attitude and upbringing than any of his thoughtless and
hurtful postings in rec.radio.shortwave. He seems to be very proud of
the fact that he can buy expensive radios using the refunded deposit
money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone
caring about his well-being should mention the good work of Alcoholics
Anonymous to him. They may be able to help him restore his self respect
and dignity so he stops posting this drunken garbage on the internet.

10/3 90.1FM 10AM-NOON EST Special GUEST - Steve Lieberman -"The Gangsta Rabbi" on Jill Morrison Show

Thurs. Nov.3 from 10AM-Noon EST on 90.1FM WUSB Stony Brook NY or LIVE INTERNET STREAM via www.wusb.fm, The Jill Morrison Show - Back by popular demand, will feature Steve Lieberman aka The Gangsta Rabbi and the first ever airplay of his 8th album "Punkifier" was recently released 10/25/05.
www.gangstarabbi.com

"MOONDOG MEETS JETHRO TULL MEETS RICHARD HELL AND THE VOIDOIDS" was how I tagged him on the first listen in 6/04 - Jill Morrison

STEVE LIEBERMAN- One-man BASS Revolutionary, eccentric FLUTIST and exotic MULTI-INSTRUMENTALIST writes, performs and creates what has beencalled the most original brand of music on this side of the Diaspora,fusing punk, industrial,progressive rock,world/folk with Hebrew-American influence.

To further add to the craziness, he does this all with no guitars or keyboards! All the chords and leads are
performed on his now trademark 4-fold overdriven Bass supplemented by ahuge array of Transverse Flutes, Happy Flutes,Exotics as the Shahnai, Bombard, Dvoyanka, Chanter,Snake Charmer,Spike Fiddle, Clarinet, Trombone amongst others!!

Famed Progressive Music Expert Rafeal Almeida Gonzcalvez did an in depth analysis of Steve Lieberman's music in 2002 to determine what genre it fit in the Progressive scene. Big Surprise! He had to create a seperate genre PROGRESSIVE PUNK, adding "generally a very difficult listen" - but he did, nevertheless!

Richard L'Hommedieu will be on with the LI Music History segment and LI happenings and artists in addition to news about the LONG MUSIC HALL OF FAME (which he is Chairman of).

Future shows include on Nov. 17 - Co-Founders Maura Wachsberger and Billy Gaines of "CREATION" from the ADT at United Cerebral Palsy Association of Nassau County who will be performing at 15th Annual LI Festival of Trees - Thanksgiving Weekend - held at the LI Marriot in Uniondale, NY. This unique group of singers and musicians recently performed in concert with the Nassau Pops at Tilles Center at C.W.Post College, Old Westbury, NY. They are living proof that despite their physical disabilities, have honed their musical talents and

capabilities to the highest creative level and acheivement that are
totally awesome!
http://www.ucpn.org/adultservices/creation.htm
http://www.ucpn.org/Old%20Pages/festiva1l.htm
Other guestx, music and event TBA!

Thanks for tuning in!

cheers!

For Sale:
Cleaning out the shack:
Famous Icom R71 Shortwave receiver.
Qudruple coversion front end.
100khz to 30MHZ contiuous.
AM,CW, USB, LSB, RTTY, FM (with optional board - not included)
Ram card ok, 32 Memories (stores mode too).
General condition is good. Face plate and cabinet good with only very
minor scratchs on the top of the cabinet.
Missing VFO/M button cap. (Functions fine, just missing the tiny
plastic rectangular cap).
NB level knob missing.
Radio works very well. Audio in headphones or decent external speaker
is excellent. The factory top-firing speaker is not real great. This
was a known minor complaint on this rig and Kiwa has a kit available
to improve the audio if you feel it is needed.
This has passband tuning (some models didnï¿½t)
$295 plus actual shipping from 53406 Shipping weight is about 20 lbs
with bubble wrap.
Includes a bound 30page excellent reprint of operators manual.

I am not a peeping tom.I was over there earlier this evening while the 37 year old blonde woman's cousin (Adrian) was helping her install a new stainless steel sink and new faucets in their kitchen.I did mention about somebody said don't use a phone line for a transmitting antenna.All she did was shrug her shoulders.And I was over there again about fifteen minutes ago asking Adrian about doing some tree cutting on my big tall pecan tree in my front yard and my other big tall pecan tree in my back yard.He is about twenty five years old and he can climb up in those trees with his chainsaw and do some tree cutting for me.Both of those trees have a big fork that over hangs my house and I am worried they might fall over on my house.I don't want to get killed by a tree falling over on my house.

Is that really a good shortwave radio? I think Ten-Tec is located not far from Nashville.I need to buy some Jeep parts for my 1942 Willys Jeep and www.jeepdoc.com (Krage MotorSports) is located in Savanna,Tennessee.Quite a long ways from the Nashville area though.It would be a nice drive someday,last time I was in Nashville was 1974.I don't think I would be interested in a PC controlled radio.

Does anyone have a recent ILG Radio Database file they could
share? The text version. It have not received any response from
them at their website for a password request...

http://www.ilgradio.com/ilgradio.htm

ilgatext.zip
or
ilgstext.txt
or
ilgsteng.txt

or, since they are free, can anyone share the password...

This is purely for personal use of course...
I'm just tired of waiting for them to respond...

Thanks

Source record: 47179

BM - That would be my guess-a-mate ~ RHF

I still have an old AC Three Prong (3-P) Plug with just the
Round "Ground" connected to a 24 Inch #14 AWG Black Insulated
Wire with just the Barrel of an 1/8" Plug on the other-end.
Plug the AC 3-P Plug in to the Wall Outlet and plug the 1/8"
Barrel in to the Radio's External Antenna Jack or External
Speaker or Headphone Jack depending on your Radio. Sometimes
(not always) this added Ground would be just enough to made
the difference whether the Radio's Reception was just
'only fair' or "Very Good" !

Stand-a-Lone 'portable' AM/FM Shortwave Radio Test
Try a Ground for Improved Reception . . . . . .
http://groups.yahoo.com/group/ETON-E1-XM-Radio/message/1702
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6268

SIMPLE GROUNDED RADIO RECEPTION TESTING :

Start with the 'portable' AM/FM Shortwave Radio by itself :
* Powered by Batteries (DC Only)
* Whip Antenna Fully Extended.

1. Do your Basic Radio Testing
[Enjoy Listening to your Radio :o]

2. Next 'connect' the Radio to the Shack's Ground via the
Radio's Ground "Connection" : External Antenna Jack or External
Speaker or Headphone Jack depending on your Radio.

3. Do your Ground Radio Testing
[Enjoy Listening to your Radio :o]

YES - Sometimes a Ground will make the difference when running
on Batteries and only using the Whip Antenna with a 'portable'
AM/FM Shortwave Radio.

NOTE - Then again what you see as an improvement just may be
the increase in Power to the Radio from the AC-to-DC Adapter
(Higher Voltage and More Current); then the normal DC Power
that you get with a Set of Batteries.

e1'ing you all - iane ~ RHF

I have given up on the data. It took months to finally get a
login/password only to find out the next release required another
login/password.

As I have pointed out before I would pay for the data to get it on time
w/o all the drama involved in the passwords.

When women can do plumbing and remodeling that is a sign that they may
be shemales. It isn't definite but watch them carefully for signs.
If you go back to peeping, look for something like this when you look
in the bathroom window. It is a photo of a Glendale woman I dated last
year.

292. Grundig S350 Radio - FM Tuning and Sound

Newsgroup: rec.radio.shortwave
Date: 2005-11-03 14:11:21 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1131027081.130451.190260@g14g2000cwa.googlegroups.com>
Source record: 47193

Kevin,

Grundig S350 Radio - FM Tuning and Sound
http://groups.yahoo.com/group/SuperadioIII/message/1351
http://groups.yahoo.com/group/Grundig-S350/message/3472

One of the problems with the Grundig S350 AM and FM Radio
with Shortwave is the Tuning Knob Backlash and "Drift".

However, this is due to the fact that the AM Analog Tuner
and FM Analog Tuner each have a 'separate' Variable Tuning
Capacitor that is being mechanically driven by a double set
of strings and pulleys.

The AM Tuner and the FM Tuners are separate circuits some
what like my old Grundig RTV-320U Radio. They "Share" a
'common' AF Amplifier for the Audio Sound Output.

Yes - I would agree that the Grundig S350 is a good tuning
FM 'portable' Radio and it has very good sound.

BUT ! IMHO the GE Superadio III with a Pair of Speakers 6"
and 2" and crossover network is the better Sounding Radio.

That being said - it is also MHO that the Grundig S350 Radio
is the better overall AM/FM Radio then the GE Superadio III.

Had Eton Corp. put a Pair of Speakers 5" and 1.5" and crossover
network in the new Eton S350DL Radio it would be a real winner.

jm2cw ~ RHF
.
.
. .
= = = In SuperadioIII@yahoogroups.com,
= = = "Kevin R. in Gilbert, AZ" <amfmdx@f...> wrote:

I bought a s350 for a sw fix. My sr-III no longer gets
used, the s350 is 100 times better on am and fm, actually,
the s350 is "THE" best FM reciever I have ever seen.

The S350 is an EXCELLENT FM receiver. VERY GOOD. AM is real
good too. The S350 is very well behaved on an external
FM antenna as well.

The only portable I have that comes close on FM is the
original Superadio .

Kevin
.
.
. .
FWIW - There are two eGroups on YAHOO !
That are 'focused' on the GE Superadios (Super Radio).

* Here is a LINK to the "LongRange"
(GE Superadio Group for Connoisseurs) eGroup at YAHOO !
GoTo=> http://groups.yahoo.com/group/longrange/

* Here is a LINK to the "Superadio III" eGroup at YAHOO !
GoTo=> http://groups.yahoo.com/group/SuperadioIII/

BONUS: Then there is the Grundig S350 "Super Radio"
(aka: Tecsun BCL-2000) Radio which may be what everyone
was 'hoping' a GE-Superadio-IV was going to be.
Plus the Newer Eton S350DL and Tecsun BCL-3000 Radios

Here is a LINK to the "Grundig S350" eGroup at YAHOO !
GoTo=> http://groups.yahoo.com/group/Grundig-S-350/
The Grundig S350 has become . . .
The Next Generation of SUPER RADIO for the New Millennium.

Hi

I'm curently working on a project for college, I am thinking of building a portable shortwave transmitter that can send me gps cordanates to show me where it is. I face certain problems as im not sure what frequncy to use e.g groundwave or skywave. Aswell would it be possible to send data over a HF i heard that there is much interferance from it, is this possible? and how much power would you reckon i would need to transmit a fair distance say no more than 100 miles(considering this device has to be portable).
thanks in advance.

paulos

300. "Justice for Robby Hedrick" March Back On!

Newsgroup: rec.radio.shortwave
Date: 2005-11-03 15:17:44 UTC
From: NewsGuy <NewsGuy2005@gmail.com>
Message-ID: <1131031064.843814.39490@z14g2000cwz.googlegroups.com>
Source record: 47201

In a dramatic turn of events, conservative Internet radio host Hal Turner announced last night that his march against Black-on-White crime will in fact take place in front of Kingston High School on Saturday, November 19, at 12:00 noon in Kingston, NY.

Standing at ground zero of the controversy is Rebekah Hedrick, whose 14-year old son Robby was savagely beaten by an African-American male two years older and more than twice his size in a hate crime. Mrs. Hedrick has been severely pressured from neighbors, anti-racist losers, and even the FBI to call off the rally since calling into Turner's radio show on October 19th, which is why she wrote Turner to cancel the rally.

In a phone call to Turner's show last night, Mrs. Hedrick explained how the FBI visited her, and said Turner and associate "Yankee" Jim Leshkevich were "dangerous" and she should not associate with them. Mrs. Hedrick was especially surprised at the visit because the FBI never bothered to contact her after she contacted them to press "hate" crime charges against 16-year old Joseph Williams, who savagely beat her son.

Local law enforcement in Kingston, NY admitted off the record to Mrs. Hedrick that they are "overrun" and the crime situation in the New York suburb is "something they cannot handle". Crime in the area has risen three-fold in the past year. Although the police are good and trying their best at tackling the problem, "there is absolutely no help for these kids," Mrs. Hedrick said. She will be at the rally for her son.

Mrs. Hedrick has also written to the anti-racist loser running One People's Project to denounce hate and emphasize the rally is about a serious problem being ingnored by society. "I'm not a white supremacist or a neo nazi. I do not hate Jews or blacks or anyone else. All I want is a peaceful protest. I want other parents to know what is happening in the high school. I'm beside myself emotionally. I do not know how else to get results. I do not hate anyone. I thought if I can get the news around as to what is going on. I could get Hal to have a rally and get others in Kingston involved. I will not stand by and watch another child be beaten by these gangs of thugs. Another child just had his nose broken two days ago! It has to stop,"wrote Mrs. Hedrick.

Turner also made a daring public apology to the various pro-White organizations he has run afowl of in the past. With "hat in hand", Turner apologized to Don Black of Stormfront, Rich Lindstrom of the NJ National Vanguard Unit, among others.

Turner then asked members of various pro-White groups to "put aside any differences they may have with each other or any disdain they may have toward me and come together to help those white school children in Kingston, NY who are being brutally beaten, robbed and intimidated every single day in Kingston High School."

Turner also pledged to involve the local police and to invite the Police Chief and Mayor to speak at the rally, which will be "100% peaceful and 100% law-abiding".

You guys had better be careful with "bad mouthing" the pass word junk
for the ILGS database.

I had been happily downloading for a couple of years no problems. Last
year I think.....I had to get a new password????? OK I emailed for
one. Waited waited waited...no password after 6 weeks or so... I think
it was.

I then posted a negative remark about the situation here. With in a few
hours I received an email from the ILGS guy saying something like... I
was blacklisted from receiving the downloads.

He sure is slow to give a password but was very quick on a negative
comment.

I would also gladly pay a reasonable price for the database.

I just do not understand this guys thinking or lack there of.

A Grand Adventure - Except That It Isn't
by Fred Reed

A friend recently asked me what I would tell a young man thinking about enlisting in the military. (He had in mind his son.) I would tell him this, which I wish someone had told me:
Kid, you are being suckered. You are being used. You need to think carefully before signing that enlistment contract.

First, notice that the men who want to send you to die were draft-dodgers.
President Bush was of military age during Vietnam, but he sat out the war in the Air National Guard. The Guard was then a common way of avoiding combat. Bush could do it because he was a rich kid who went to Yale, and his family had connections.

He dodged, but he wants you to go.

Vice President Cheney, also of military age during Vietnam, also didn't go. Why? When asked by the press, he said, "I had other priorities." In other words, he was too important to risk his precious self overseas. He dodged, but wants you to go.

If you take the time to investigate, you will always find this pattern. The rich and influential avoid combat. Harvard, Yale, and Princeton do not send young men to Iraq. The editors at magazines that support the war, National Review for example, didn't fight. They are happy to let you go, though. The reason for the All Volunteer military was to let the smart and rich avoid service and instead send kids from middle-class and blue-collar families. It works.

In talking to recruiters, you need to understand what you are up against. You are probably nineteen or twenty years old, full of piss and vinegar as we used to say, just starting to know the world. Which means that you don't yet know it. (Do you know, for example, what countries border Iraq?)

You are up against a government that hires high-powered ad agencies and psychologists to figure out how to lure you into the military. Over many years they have done surveys and studies on the weaknesses of young males to find out what will get them to join. They know that young men, the ones that are worth anything anyway, want to prove themselves, want adventure, want to show what they can do. Everything a recruiter does is carefully calculated to play on this.

They go to recruiting school to learn how.

"The Few. The Proud." You don't think that came out of the Marine Corps, do you? These phrases-"An Army of One," "Be All You Can Be"--come from ad agencies in New York. Nobody in those ad agencies, I promise you, was ever in the Marine Corps. New York sells the military the way it sells soap. It has no interest in you at all.

Recruiters know exactly what they are doing. They are manly, which appeals to gutsy young guys who don't want to be mall rats. They are confident. They have a physical fitness, a clean-cut appearance that looks good compared to all those wussy lawyers in business suits. They invite you to come into a man's world. They promise you college funds.

(Check and see how many actually ever get those funds. Read the small print.)

And of course the military is a man's world, and it is an adventure, and it does beat being a mall rat-until they put you in combat. Driving a tank beats stocking parts in the local NAPA outlet-until they put you in combat. Days on the rifle range, running the bars of San Diego far from home and parents, going across the border into Mexico-all of this appeals powerfully to a young man. It did to me. It beats hell out of getting some silly associate degree in biz-admin at the community college.
Until they put you in combat. Then it's too late. You can't change your mind. They send you to jail for a long time if you do.

Combat is not the adventure you think it is. Know what happens when an RPG hits a tank? Nothing good. The cherry juice-hydraulic fluid that turns the turret-can vaporize and then blow. I saw the results in the Naval Support Activity hospital in Danang in 1967. A tank has a crew of four. Two burned to death, screaming as they tried to get out. The other two were scalded pink, under a plastic sheet that was always foggy with serum evaporating from burns where the skin had sloughed off. They probably lived. Know what burn scars look like?

The recruiters won't tell you this. They know, but they won't tell you. Ever seen a guy who just took a round through the face? He's a bloody mess with his eyes gone, nasty hole where his nose was, funny white cartilage things sticking out of dripping meat. Suppose he'll ever have another girlfriend? Not freaking likely. He'll spend the next fifty years as a horror in some forsaken VA hospital.

But the recruiters won't tell you this. They want you to think that it's an adventure.

Other things happen that, depending on your head, may or may not bother you. Iraq means combat in cities. Ordinary people live there. You pop a grenade through a window, or hit a building with a burst from the Chain gun, or maybe put a tank round through it. Then you find the little girl with her bowels hanging out, not quite dead yet, with her mother screaming over what's left. You'd be surprised how much blood a small kid has.
You get to live with that picture for the rest of your life. And you

will live with it. The recruiter will tell you that it doesn't happen, that it's the exception, that I'm a commy journalist. Believe him if you want. Believe him now, while you can. When you get back, you'll believe me.

A lot of things in America aren't what they used to be. The military is one of them. The army didn't always use girl soldiers to torture prisoners. For that they had specialists in the intelligence agencies. You won't get assigned torture duty, almost certainly, because the Army got caught. Ask your recruiter about it, just to be sure.

Don't expect thanks from a grateful nation. Somebody might buy you a drink in a bar. That's about all you get. Many will regard you as a criminal or a fool.

Wars seem important at the time, but they usually aren't. Five years later, they are history. About sixty thousand GIs died in Vietnam. We lost. Nothing happened. It was a stupid war for nothing. Today the guys who lost faces and legs and internal organs back then are just freaks. Nobody gives a damn about them, and nobody will give a damn about you. A war is a politician's toy, but your wheelchair is forever. If you want adventure, try the fishing fleet in Alaska.

Think about it.

Hmm.. WHY would you want to know where a transmitter is ??

WHat's the point of knowing GPS coordinates for a moving radio
transmitter..

??

++++++++++++++++++
Why reinvent the wheel?
Hams have used AX25 and GPS, APRS, for years.
There are many possible uses.
For a start check out: <http://au.geocities.com/vk3hjq/vk3hjq/aprs.htm>

The 100 miles will be difficult to do dierectly.
But easy with the use of a "repeater".

Terry

That's an amazing price for two valuable listening resources. And yes the Super Saving shipping is a good deal, but you have to remember toask for it - Amazon doesn't default to it as I found out last month.

I remember driving to the local radio store to buy those books at full retail. How times have changed since that local radio store closed......

This service has been going in Darwin for some time now, run by the
Aboriginal Resource and Development Service (ARDS). It is mainly in
the Yolngu dialect (I understand a little of it, but not much), but it
sometimes breaks into English.

In Darwin it's on 1530 Khz, with test transmissions happening in
Nhulunbuy on 1530 Khz, and a planned operating frequency of 1503 Khz.

Years ago he published the ILG in hard copy. One subscribed to it and it came out several times a
year. At some point he decided to stop publishing and said all would get a refund.

I never received mine and I don't recall if anyone did. Seems as though he owed me $15 or so.

I've about 10 issues of it here dating back to 87-89.

John S.,

The only "Local" Walk-in-Electronic-Store that
is left in the SF East Bay Area that I know of is :

Al Lasher's Electronics - Berkekey
http://www.allashers.com/index.htm

Are there any other 'local' Stores still out there
like Al Lasher's in Berkeley ? ? ? ? ?

The Ham Radio Outlet in Oakland is part of a Chain.
http://www.hamradio.com/web/stores.html

Then there is RadioShack :o)
http://www.radioshack.com/Locator/Locator.asp?
But I don't ever remember seeing a
Passport to World Band Radio -or-
World Radio TV Handbook there ever.

You have a more fundamental problem in how can you legally transmit the data. Parts 15 (no license) products are very low in power. I'm not sure how you could legally do this project in the ham band other than mimick APRS.

Regarding noise in the HF band, you have one thing in your favor, namely the data rate. If you don't need rapid updates, you can narrow the bandwidth. Remember, noise is proportional to the square root of the bandwidth. Your project could be done with FSK modulation with a demodulation scheme using mark and space filters. Rectify and low pass filter the output of each filter (mark and space), then compare the signal level at the output of each lowpass filter to determine if mark or space is being sent. Put forward error correction in the data stream to further improve the SNR.

If you want to use an off the shelf solution to the demod, use a HF receiver with a CW filter. While the intent of a CW filter is to pass one tone, the filter can be used for a very low datarate FSK. The demod could be done with DSP. In the dark ages, a modem project I worked on demodulated FSK by taking the digitized audio, computing an arcsin, then fitting a straight line to the arcsin data using a linear regression. You need to insure the number of samples used in the computation covers a few cycles of the sine wave. The slope of the line is a measurement of the frequency. This is similar to arbitrary sine wave generator using phase accumulation, but in reverse.

Even with this demod, you are still not home free since the data needs to be framed and the clock recovered. I'd suggest a preamble of alternating 0 and 1's. If you decide to skip the error correction, the framing is very important since your actual data may contain a stream of 0 or 1, which makes it hard to determine where to slice the data. With the preamble, you will have the timing established. You would probably want a start and stop code, i.e. follow the 010101 preamble with something like 00110011, dump your data, then terminate with 11001100. The advantage of the error correction is that it scrambles the data to avoid the long sequence of 0 or 1 and the associated clock recovery problems. There are other schemes to get around the string of constant values, such as duobinary encoding. While that wasn't the intent of the code, it would do the job. If you skip the error correction, you can use some scheme like sending the same data a number of times and then insure the values match.

As far as distance goes, ham QRPers have done communications across the Pacific on 5 watts. This is of course on CW with skip.

ARE WE ALL DOOMED? You will please note that I cunningly framed my post
as a question thereby ethically relieving myself of any obligation to
write a 20,000 word paper complete with graphs, charts and footnotes. I
had wondered if any of the group noticed that the Federal Reserve was
similar to a Ponzi scheme. "The beneficiaries of the newly created
money, i.e., "money out of thin air"- are always the first recipients
of money, and so they can divert a greater portion of wealth to
themselves. Obviously, those who either don't receive any of the newly
created money or get it last will find that what is left for them is a
diminished portion of the pool of real funding." (Mises)

The guy has a point about the spam problem, but why the hell should he
even require people to apply for a password in the first place? Just
make the database freely downloadable.

There used to be a Military Surplus store on Pearl Street in beautifull down town Jackson many years ago.There is an Army Surplus store in beautifull Pearl,Mississippi just across the Pearl River from Jackson.The guy and his wife have a little poodle doggy that will bark at you when you walk in the door.I once bought a pair of white Micky Mouse boots (I still have those boots too) at that store.Those Army boots are too heavy and clumsy to wear when I am driving my van or my car,they get in the way of the pedals too much.

What about Halabja? 5000 Kurds lost their lives when Sadams henchmen used
nerve gas on them, 75% were women and children. I guess you stupid assholes
don't figure 5000 in one shot justifies the term "mass destruction" I can
cite many more incidences of Sadams ability to cause MASS DESTRUCTION if you
want. Now go hide under your bed.

I bought a Ten-Tec in the first place when it first came out. But I ended up using a WinRadio because it is so much better - no apologies for that! :-)

I prefer putting my money on excellence, not on nationality. Rewarding a manufacturer with my hard-earned cash simply because he is based in America would be a false type of loyalty which can in fact only encourage mediocrity and decline.

I want the best product there is. If it's made in America, great, I'll buy it. If it's made elsewhere then fine, I'll buy it too. That's what competition and free enterprise means. That's what makes progress possible. That's what America is all about.

Or All Electric on Fourth St. in San Rafael. It used to be one
of the shops on Market St. (near Van Ness) in SF in the fiftiesbefore
it moved up there. I walked in one day a few years back and said it
reminded me of the place I used to go when I was a kid. The clerk
pointed me to the newspaper picture of the original store in SF.

You can also walk into Jameco's shop off 101 in Belmont.

Brian, please read this through and check the site. Thedre are so many
lies coming out the US State Department that you can't believe a word
they say. Even Colin Powell said he was sorry.

==========
The massacre at Halabja did not raise protests by the international
community in March 1988. At the time, it was admitted that the civilians
had been killed "collaterally" due to an error in handling the combat
gas. Two years later, when the Iran-Iraq War was finished and the
Western powers stopped supporting Saddam Hussein, the massacre of
Halabja was attributed to the Iraqis.

Some debate continues, however, over the question of whether Iraq was
really the responsible party, stemming from the fact that the United
States supplied chemical weapons which may have been responsible for
Halabja to Iraq. The matter is further complicated by the fact that the
U.S. State Department, in the immediate aftermath of the incident,
instructed its diplomats to say that Iran was partly to blame.

A preliminary Defense Intelligence Agency (DIA) study at the time
concluded, apparently by determining the chemicals used by looking at
images of the victims, that it was in fact Iran that was responsible for
the attack, an assessment which was used subsequently by the Central
Intelligence Agency (CIA) for much of the early 1990's. The CIA's senior
political analyst for the Iran-Iraq war, Stephen C. Pelletiere,
co-authored an unclassified analysis of the war
http://www.fas.org/man/dod-101/ops/war/docs/3203/ which contained a
brief summary of the DIA study's key points. In a January 31, 2003 New
York Times
http://query.nytimes.com/gst/abstract.html?res=F60816FC3D5C0C728FDDA80894DB404482
opinion piece, Pelletiere summarized the DIA's findings and noted that
because of the DIA's conclusion there was not sufficient evidence to
definitively determine whether Iraq or Iran was responsible. Pelletiere
also felt that the administration of George W. Bush was not being
forthright when squarely placing blame on Iraq, since it contradicted
the conclusion of the DIA study. However the DIA's final position on the
attack was in fact much less certain than this preliminary report

suggests, with its final conclusions, in June 2003, asserting just that
there was insufficient evidence, but concluding that "Iraq ..used
chemical weapons against Kurdish civilians in 1988"
http://www.iraqwatch.org/government/US/Pentagon/us-dod-iraqchemreport-060703.htm.
The CIA altered its position radically in the late 1990s and cited
Halabja frequently in its evidence of WMD before the 2003 invasion
http://www.cia.gov/cia/reports/iraq_wmd/Iraq_Oct_2002.htm#01

This .sig file will continue until Mister Fort posts a sincere apology
to all cancer victims and their families. His refusal to do so says more
about his attitude and upbringing than any of his thoughtless and
hurtful postings in rec.radio.shortwave. He seems to be very proud of
the fact that he can buy expensive radios using the refunded deposit
money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone
caring about his well-being should mention the good work of Alcoholics
Anonymous to him. They may be able to help him restore his self respect
and dignity so he stops posting this drunken garbage on the internet.

The trouble with Glendale Girls is that most have tenth grade educations and must take manual labor jobs to support their shiftless West Virginia husbands.
One such beauty
http://ww3.voyeurweb.com/main/fsg44/fs20051026-160079/index.html used to date Roger but left him after the third date. She said she "works too hard at my heavy equipment job to support a freeloader."
Why? She said she got tired of buying dinner and drinks at the Shipwreck Lounge while Roger spent most of his time in the men's room with his buddies.
She walked out after their last date and left Roger with the bill. Now, according to informed sources, the Shipwreck management has had to put a lien on Roger's house for payment.
Does she have tattoos on her belly button? Apparently not, but Roger never got close enough to find out.

Why do girls from Jackson Mississippi always have ugly tattoos under their belly buttons? If they would learn how to be ladies, I wouldn't have to date only local Glendale, West Virginia girls.

directory, thank you for the defense (it is appreciated). I do think I managed to get under someone's skin (and they didn't like it).

no worries though. He's got a rude surprise coming his way. :)

as for arguments and debates. I like debates. it keeps the brain from sinking under the load of all the daily stress that gets put upon it. Also helps to argue with facts. :) Since this guy couldn't do that, he decided to take the "cheap shot" and dig up an old (13 year old) forge posting (alleged to have been posted by me to a dating group of some sort).

What is interesting to note though, I dug up that original (thank you supernews archives) and did a header examination. What interests me the most about it, it was from an ISP that I had dumped some 4 months prior to the appearance of that posting. Guess I had an internet stalker (and still do from all appearances).

ah well, the last guy that stalked me anywhere (especially on the radio IRL) got himself fined a substantial chunk of change (>$4,000), then got "news 15'ed" on an investigation into the shady dealings of little "hole in the wall tv repair shops" and from the last I heard, ended up moving out of state, never to return. Now thats bad karma personified.

oh well, nuff of this. lets get back on topic with the groups, shall we?

Indeed, Brian, they do. And few of them can use their brains to make
an intelligent and respectful discussion. So they resort to shouting
expletives - not realizing that this is in fact music to my ears since
this indicates that they know very well that they have lost the
argument... :-)

392. Question is 'it' a Longwire {Random Wire} Antenna -or- Inverted "L" Antenna ?

Newsgroup: rec.radio.shortwave
Date: 2005-11-04 12:57:09 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1131109029.897203.144350@z14g2000cwz.googlegroups.com>
Source record: 47443

For One and All,

Question is 'it' a Longwire {Random Wire} Antenna -or- Inverted "L"
Antenna ?
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6300

AMATEUR [HAM] - INVERTED "L" ANTENNA :
The traditional Amateur (Ham) Inverted "L" Antennas used
as both a Transmitting and Receiving Antenna usually were
Symmetric Dimensioned Vertical and Horizontal Antennas.
Vertical - - - Horizontal - - - - Total
"Up Leg" - - - "Out Arm" - - Length
Half - - - - - - - Half - - - - - - - Full
1/8 WL = = = 1/8 WL = = = 1/4 WL for XX Meter Band
1/4 WL = = = 1/4 WL = = = 1/2 WL for XX Meter Band
1/2 WL = = = 1/2 WL = = = One WL for XX Meter Band

SHORTWAVE LISTENER {SWL} - INVERTED "L" ANTENNA :
However, the Shortwave Listener (SWL) Inverted "L" Antenna
is usually an Asymmetrical Dimensioned Antenna with a 'shorter'
Vertical "Up" Leg and a 'longer' Horizontal "Out" Arm. For
the Shortwave Listener (SWL) the Inverted "L" Antenna is
generally built as an "Available Space" Antenna for Receive
'Only'. It goes as HIGH as "I Got Something to Hang it From"
and as Long as "I Got Something to Hang It Between".
Most of the Time the "Up Part" is 10-15-20-25 Feet High.
Most of the Time the "Out Part" is 20-30-40-50 Feet Long.
Often the Horizontal Out-Arm is Two (2X) to Three Times (3X)
the Length of the Vertical Up Leg.
The Shortwave Listener (SWL) Inverted "L" Antenna is
usually described as
Vertical - - - Horizontal - - Total
"Up Leg" - - - "Out Arm" - - Length
(1/3) - - - - (2/3)- - - - Full
10 Feet + + + + 20 Feet = = = 30 Foot Long Random Wire
15 Feet + + + + 30 Feet = = = 45 Foot Long Random Wire
20 Feet + + + + 40 Feet = = = 60 Foot Long Random Wire
25 Feet + + + + 50 Feet = = = 75 Foot Long Random Wire
30 Feet + + + + 60 Feet = = = 90 Foot Long Random Wire
Vertical - - - Horizontal - - Total
"Up Leg" - - - "Out Arm" - - Length
(1/4) - - - - (3/4)- - - Full
10 Feet + + + + 30 Feet = = = 40 Foot Long Random Wire
15 Feet + + + + 45 Feet = = = 60 Foot Long Random Wire
20 Feet + + + + 60 Feet = = = 80 Foot Long Random Wire

25 Feet + + + + 75 Feet = = = 100 Foot Long Random Wire
30 Feet + + + + 90 Feet = = = 120 Foot Long Random Wire
The majority of these Shortwave Listener (SWL) Inverted "L"
Antennas "Fit" into the Sizing Range of 12 to 24 Feet High
by 24 to 72 Feet Long which is about 36 to 96 Feet in Total.

KC7NOD refers to the Shortwave Listener's (SWL) Inverted
"L" Antenna simply as an "Improved Random Wire Antenna"
http://www.kc7nod.20m.com/improved_rw.htm
Read his description he says it all very well and briefly.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/466

- - - - - TO QUOTE A PRIOR MESSAGE BY ME - - - - -
* * * EXTRACTED from Newsgroups: Rec.Radio.Shortwave
= = = From: rhf-say-bye-...@pacbell.net (RHF)
= = = Date: 11 May 2004 01:22:51 -0700
= = = Local: Tues, May 11 2004 12:22 am
= = = Subject: ABOUT - Inverted "L" antennas

This is why a Receive ONLY Shortwave Listeners (SWL) Antenna
one that is Omni-Directional generally works better then one
that is intended to be directional.
* The SWL Version of the Inverted "L" Antenna works well as
an Omni-Directional Antenna. The SWL Inverted "L" Antenna
usually has a Vertical 'Leg' that is 1/3 to 1/2 the Length of
the Length of Horizontal 'Arm'. Plus the SWL Inverted "L"
Antenna usually is lower to the Ground. This closeness to the
Surface of the Ground results in the SWL Inverted "L" Antenna
being a form of "Near Vertical Incident SkyWave" {NVIS} Antenna.
NVIS=> http://www.qsl.net/k5eph/nvis.htm
* These SWL Versions of the Inverted "L" Antennas can be any
size because they are in-fact simply Random Wire Antennas that
are designed to fit the available space.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/54
* The Inverted "L" Antenna 'Shape' lends itself to the Design
Concepts of a "Low Noise Antenna" that has been popularized
by John Doty; consisting of: Antenna Element; Matching Transformer;
Grounding Point; Coax Cable Feed-in-Line; Radio/Receiver.
DOTY=> http://www.anarc.org/naswa/badx/antennas/low-noise_antenna.html
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/2

http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/470
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/539
For those who want a 'Set of Numbers' to Build their SWL Inverted
"L" Antenna here are a few 'Sets of Numbers' to consider for your
available space:
- 10Ft High Vertical 'Leg' with a 20-30Ft Horizontal Arm
having a Total Length of 30-40 Feet. Also: 20x40-60 & 30x60-90
- 15Ft High Vertical 'Leg' with a 30-45Ft Horizontal Arm
having a Total Length of 45-60 Feet.
- 25Ft High Vertical 'Leg' with a 50-75Ft Horizontal Arm
having a Total Length of 75-100 Feet.
- 35Ft High Vertical 'Leg' with a 70-105Ft Horizontal Arm
having a Total Length of 105-140 Feet.
NOTE: The Amateur/HAM Inverted "L" Antenna is usually made-up
of Two Equal Sections One Vertical 'Leg' and One Horizontal 'Arm'.
These Two Equal Section can be:
* 1/8th Wavelength = Quarter Wavelength Total
* 1/4th Wavelength = Half Wavelength Total
* 1/2th Wavelength = One Wavelength Total
Because of the 'equal' proportionality, the Amateur/HAM
Inverted "L" Antenna is most often Higher above the Ground
then the SWL Version.

My guess is he's vacationing at "Club Meds". People like him typically have to be hospitalized for psychiatric care several times over the course of their lifetimes. How often and how long he's laid up will depend on how his illness is progressing.

Despite all of his trash talk, it's hard not to feel bad for him.

The drunkard Tracy Fort posted yet again..

Tracy Fort's necrophilia and a deceased seventy two year old cancer victim, who happened to be my mother:

==========
==========
I'm not drunk. I haven't finished my first 12 pak yet.
I'll get there and when I do it's back to the cemetary.

She gives great cancerous BJ's.....thanks Canucky boy!

How far north did the Katrina effect? I saw someone's mom floatin down the mighty Mississippi!

Dug her ass right up! She was too damn ugly to have sex with before she died. The old bag o bones fell apart in my hands! She didn't complain about much either other than the lousy sex she got from those foursomes with you, Mike and her husband.

love dem bones....dem bones....dem bones

rattllin' bones!

squeek...squeek...

Skeleton rides 50 cents a pop! If you can stand the smell....I wonder is she stunk that bad in life?

hahahaha....I'm still laughin' at your sorry ass family! This is funny stuff!

She is very fresh but not that fresh!

hehe...I love dem bony women....rotten to the core.....

um...umm....good!

I love it....did she do it for you too?

Please accept my apology for abusing her. I'm sorry that I did not toss her back into the black depths that she came from. Next time,I will be sure to take care of that. I promise that I will refill the

hole with the dirt that came out too. In addition, I will re sod the plot at no additional charge. Let me also apologize for the milky substance in her left eye socket, that was an unavoidable accident. please feel free to include this post in your sig file!

You might as weel keep it up there...I love the ole boney bitch!

Dem Bones! Dem Bones! Dem Bones! I loved playing dem Bones!
Dem Bones! Dem Bones! Dem Bones!
I loved playing dem Bones! I ran my fingers uo and down dem bones and she began to come alive!
I played dem bones like they never been played and she smiled for me all the day.

Pork and bones....

DON'T HURT CANADA! I'll miss those nights with the ole bony lady!

The most fun I ever had!

Sporting a new moniker (GraveDigger) just for you and mommy...

He knows the inside of his mom's boney butt! hahahaha

hahahahaha......Can't you come up with your own material?

hahahaha.....when you got thru lickin I was stickin.....

Haha...I laugh eveytime I read my great material! Keep postin
Canadork

beerbarrel@cox.net

http://www.qrz.com/detail/KE4ODD

==========
==========

This .sig file will continue until Mister Fort posts a sincere apology to all cancer victims and their families. His refusal to do so says more about his attitude and upbringing than any of his thoughtless and hurtful postings in rec.radio.shortwave. He seems to be very proud of the fact that he can buy expensive radios using the refunded deposit money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone caring about his well-being should mention the good work of Alcoholics Anonymous to him. They may be able to help him restore his self respect and dignity so he stops posting this drunken garbage on the internet.

Hi!

I'm wondering if anyone else has this Freeplay Summit crank/solar radio? The LCD display has some sort of tinted face making hard to read indoors.

Do other Summit owners have this problem or do I just happen to have a bad display? Temperature is not a problem, all other lcd devices here are normal. A Google search also mentions this in a 2002 review.

cheney "approval" Nearing Rock BOTTOM at 19%
www.globalnewsmatrix.com

I like to think Dr.Ben Marble had Something to do with that.Didn't Millions of people all over America and the World see and hear that on their tv sets? Rock On,Dr.Ben Marble,Rock On!

Say there cousin Les Locklear,there is or was an electronics store in the Biloxi area that has/had some technicians that have some expensive electronics diagnostic tools/instruments and they would travel and adjust people's very expensive tv sets so that their tv sets last much longer.I saw a website about that store in Biloxi on the internet about two something years ago.Being as how you live in the Biloxi area,maybe you can find that store (if Katrina didn't blow the store away?) in Biloxi or that website? I want to send the website to www.pricewheeler.com in San Diego,California.Thanks.

I don't own a Freeplay radio,but I have read before the Freeplay radios made in Africa are better than the Freeplay radios made in China.Something about the windup springs in the African made Freeplay radios are better quality and not so likely to break.

Coming up in the next edition of MediaLine Radio:

* Water on the moon?
* The second part of an interview with the President of the Canadian Media Guild.
* An episode of The Adventures of Nero Wolfe from the 1950s.

MediaLine Radio is aired at various times on IRRS-ShortWave (http://www.nexus.org/radio.htm) and WorldFM (http://www.worldfm.co.nz).

It is also available 24-hours a day, on-demand, at http://medialineradio.com .

Jason - aka "RF Junkie",

IMHO - You have two products that by design lend themselves to
two different types of Rigging and two different Configuration
(Shapes) of Shortwave Listening (SWL) Antennas.
PRODUCTS => http://www.geocities.com/qrp_baluns/LM.html

RIGGING - The LMZ-75, SWLZ and RF Systems MLB (Magnetic LongWire Balun)

http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6307

INVERTED "L" ANTENNA :
SWLZ with "F" Connector to used with RG6 75 Ohm Coax Cable
and Rigged as an Inverted "L" Antenna with the SWLZ mounted
directly on (or very near) the Ground Rod.
SWLZ => http://www.geocities.com/qrp_baluns/SWLZ.html
IMAGE => http://www.geocities.com/qrp_baluns/SWLZ-640.gif
HOOK-UP => http://www.geocities.com/qrp_baluns/APP-SWLZ.html

ABOUT - Shortwave Longwire Antenna Balun Match 9:1 # SWLZ
READ - The "SWLZ" Shortwave Listener's (SWL) Balun
http://groups.yahoo.com/group/ETON-E1-XM-Radio/message/1005
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6034

HORIZONTAL "RANDOM WIRE" AND "SLOPER" ANTENNAS :
LMZ-75 with "F" Connector to used with RG6 75 Ohm Coax Cable
and Rigged as a Horizontal "Random Wire" Antenna with the
LMZ-75 mounted on the House or other Structure abd using the
Radio Shack's Ground via the Coax Cable Shield.
LMZ-75 => http://www.geocities.com/qrp_baluns/LMZ-75.html
PHOTO-IMAGE - LMZ-75 Shortwave Listener (SWL) Antenna Matcher
LMZ-74 => http://www.geocities.com/qrp_baluns/640-LMZ75-2.gif
HOW TO - Application Note for Using the LMZ-75
Shortwave Listener (SWL) Antenna Matcher
HOOK-UP => http://www.geocities.com/qrp_baluns/app-lmz-75.html

ABOUT - The Shortwave Longwire Antenna Balun Match 9:1 # LMZ-75
READ - LMZ-75 Shortwave Listener (SWL) Longwire {Random Wire}
Antenna Impedance Matcher
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6165

Horizontal "Random Wire" Antenna Rigging Diagram
http://www.universal-radio.com/catalog/sw_ant/1465.html

Sloper "Random Wire" Antenna Rigging Diagram
http://www.universal-radio.com/catalog/sw_ant/4067.html

RF Systems "MLB" Magnetic LongWire Balun
http://www.universal-radio.com/catalog/sw_ant/1484.html
- - - Suggest you do your own Diagram of On-the-House or
From-the-Roof Rigging of the LMZ-75 for your Application
WebPages.

TIP - Here is another Product that you may wish to consider.
A Feed Line Isolator for your 75 Ohm Products that use "F"
Connectors like the SWLZ and LMZ-75 Matching Transformers
call it the "FLI-75" :o) Use a piece of Copper Pipe for
the Body and Plastic End-Caps for the "F" Connectors.
Look at this WellBrook Low Noise Antenna Diagram :
"The Correct Way To Install A LongWire Antenna/Balun"
http://www.wellbrook.uk.com/longwire.html
- - - Suggest you do your own Diagram of the SWLZ with a
FLI-75 for your Application WebPages.

= = = In Shortwave-SWL-Antenna@yahoogroups.com,
= = = "rfjunkie" <kg7ro@j...> wrote:

I just wanted to clarify a few points on the SWLZ antenna
match and different longwire confirgurations:

Although the application note shown the SWLZ in an "L"
configuration, it is not limited to this.

You can attach this match directly to the end of the
longwire if you wish.

It will require grounding further down the coax instead.

The reason for having it at the end of the vertical leg
was to get the ground terminal on the SWLZ match as close
to the ground rod as possible to reduce noise.

There is also the LMZ-75 which was designed to mount right
at the end of the longwire.

So what this means is that both options will work and the
fun of experimenting must be accomplished to know what works
best for your situation. There are many other variables at
your location that limit or enhance your antenna setup and
not one type of antenna connection will work for all listeners.

cuhulin

Global preparedness

The ruin stemming from asteroid Apophis colliding with Earth would
potentially be very great.

Indeed, the consequences, Schweickart suggested, would dwarf those seen
as a result of the Indian Ocean tsunami in December 2004, hurricanes
Katrina and Rita in September of this year, and the Pakistan earthquake
last month.

In regards to global preparedness in handling these unusually
devastating events of late, "it's basically out of sight...out of
mind," Schweickart said. "That's the real challenge for society.
The things that you don't know about are one thing. But the things
that you do know about, and don't do something about...those are the
ones that are really tough."

Refine the impact probability

The FBI and other Agencies did a job on Wilhelm Reich over his '
Cloudbuster ' achievement of getting it to rain in the area where he
was living..
They hated Reich for his Psychology of Fascism book and the
psychological insights made.

DH,

ABOUT - The "T" & Windom Antenna plus Twin Lead Folded Dipole Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6309

The 'original' Windom Antenna was a Two Wire "T" Antenna.

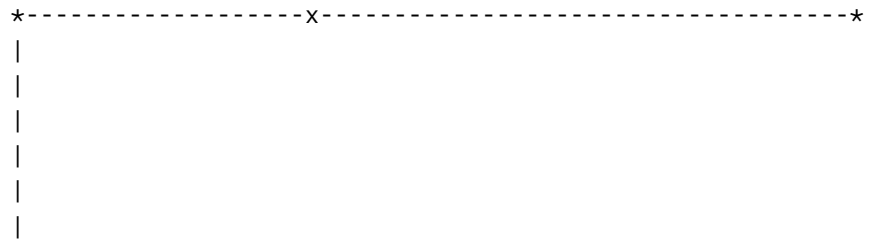
The "Up" Leg gets the Insulated Wire from the Radio up to
the Flat Top of the "T". The Top of the "T" is un-equal :

* The Shorter Side 38% of the Flat Top Wire Tip-to-Tip.

* The Longer Side 62% of the Flat Top Wire Tip-to-Tip.

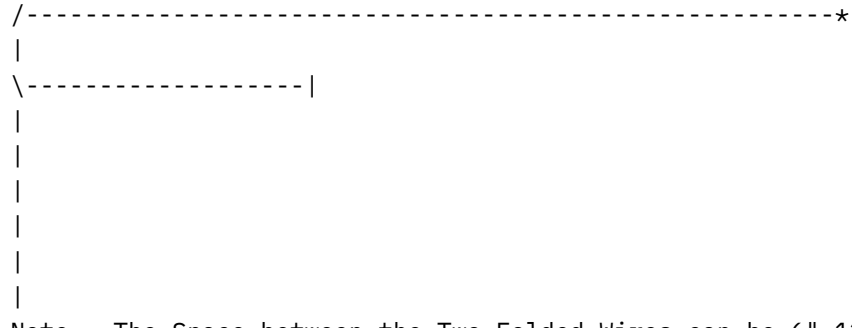
= = = [CLICK-ON-REPLY-TO-VIEW !] = = =

Two Wire "T" Windom Antenna :



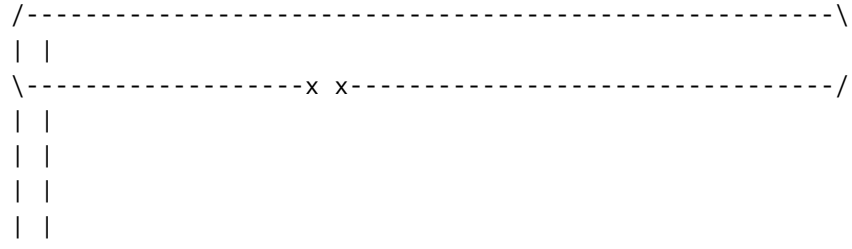
X = Solder Join Here

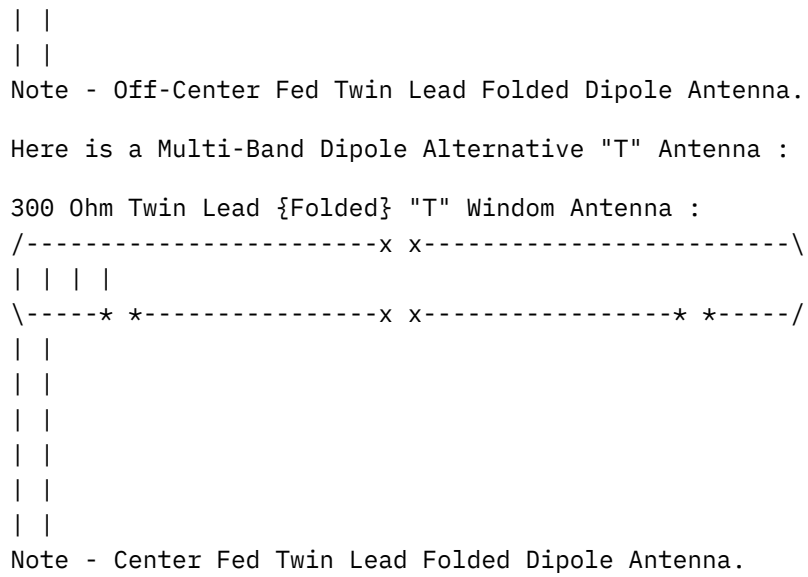
Single Wire {Folded} "T" Windom Antenna :



Note - The Space between the Two Folded Wires can be 6"-12".

300 Ohm Twin Lead {Folded} "T" Windom Antenna :





Note - Off-Center Fed Twin Lead Folded Dipole Antenna.

Here is a Multi-Band Dipole Alternative "T" Antenna :

300 Ohm Twin Lead {Folded} "T" Windom Antenna :

Note - Center Fed Twin Lead Folded Dipole Antenna.

* 40 Foot 'Shorty' Multi-Band Twin Lead Dipole
Top Dipole Wire = 40 Feet = 25 Meter Shortwave Band
Bottom Dipole Wire = 31 Feet = 19 Meter Shortwave Band
Folded Dipole Wire = 49 Feet = 31 Meter Shortwave Band

* 49 Foot 'Average' Multi-Band Twin Lead Dipole
Top Dipole Wire = 49 Feet = 31 Meter Shortwave Band
Bottom Dipole Wire = 34 Feet = 22 Meter Shortwave Band
Folded Dipole Wire = 64 Feet = 41 Meter Shortwave Band

* 65 Foot 'Larger' Multi-Band Twin Lead Dipole
Top Dipole Wire = 65 Feet = 41 Meter Shortwave Band
Bottom Dipole Wire = 40 Feet = 25 Meter Shortwave Band
Folded Dipole Wire = 80 Feet = 49 Meter Shortwave Band

DH - Are you ready to "T" Off ! :o)

hope this helps - iane ~ RHF

Hi all.

I recently put up a 25m wire antenna after getting permission
from my apartment complex manager.

Awesome. At least I finally have some metal out the window!

Feeder requirements [and profile constraints] necessitated
this antenna be of a "T" type, with a feeder in the middle
of the wire.

Anyone know much about this configuration? I am trying to
figure impedance/freq response with the antenna.

Thanks,

Darren

www.devilfinder.com Componets of water on the Moon

I accidently left out n in Componets,but read what that NASA
Administrator says.

And Yes,if there is Hydrogen and Oxygen on the Moon,either in the rocks
or soil,Moon Water is easy.

The Moon used to be part of Earth eons ago untill something smashed into Earth and the debrie became our Moon,the Moon is gradually moving away from Earth.There is a resonable chance there is Oxygen and Hydrogen on the Moon to make Water.Earth used to have Rings around Earth.

In fact,recently,some scientist went to Johnson Space Center (or one of those buildings/departments that has to do with NASA) and they requested a small sample of Moon Rock to test.They found either Oxygen (I forget which one the article mentioned that I read about two or three weeks ago) or Hydrogen.I think it was Oxygen they found.Oxygen for Rocket Fuel on the Moon.

Thanks Dave from American Samoa

Hi All, I'm a big fan of Kiwi radio. Listen all the time to RNZI and the AM locals at night when they come in. It's great perspective and good to get away from the American crap :-) I'm the asst. chief engineer at KVZK, the state run TV station here. I end up doing a lot of radio engineering as well. My self and the chief angineer will be in

NZ for two weeks starting the 14th of this month. Looking forward to seeing the country and hearing the FM! Anyway I'm glad I found this group!

Take care,

Dave

Actually, the origin of the moon is still something of a mystery. It
is sufficiently different from earth to not necessarily be a chunk of
earth. It also has no significant atmosphere, so water in liquid or
vapor form escapes to space quickly. Solid ice is more likely endure,
although even this will eventually sublimate in the absence of an
atmosphere with some relative humidity.

Frozen water (ice) was tentatively discovered just below the surface of
the moon in an isolated crater near one of its poles a few years ago.
This crater, unlike most of the moon's surface, never receives warming
solar radiation, and the solid ice could theoretically persist there
longer than elsewhere on the lunar surface.

"Making" water from components is quite another issue. It takes a
great deal of energy plus the two main components (O and H) in the
right proportions to get meaningful water creation; and, it takes a
whole bunch of gaseous O and H to make a little bit of liquid water.

Interestingly, there are a few animals, such as desert kangaroo rats,
who are able to manufacture water in their bodies from the nonliquid
foods they find in the desert.

Get yourself a real good CB radio and a real good CB radio antenna and a real good amplifier and you can talk to 18 wheeler truck drivers in U.S.A.About three years ago,one night I heard an 18 wheeler truck driver out on I-20 about two miles from me (Jackson,Mississippi here) say he was talking to a guy in New Zealand.

Yes, the trusty Sangean made the trip. Not much to hear on HF, unless
you're into insane eschatological ranting or speak Foreigner.

I'm back in the cave now. My broadband ISP charges by the hour for
Dialup, so I avoid socializationizing on the Internets when
luxuriating at Studio 6.

LLOYD'S A VIRGIN

(Madonna/Billy Steinberg and Tom Kelly/Les Paul)

LLoyd made it through 12th grade
Somehow he made it through
Never had a forum for his views
Until he found radio newsgroups

Lloyd is the the freak of the week
Everybody avoids that fatassed geek
But everyday's a brand new day
Yeah, it makes him feel
Shiny and new

Lloyd's a virgin
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

"I'm gonna post about you, boy
My Bible's on my side"
Lloyd's been bashed around
Because his stupidity is hard to hide

He's bald, obese and round
A weeble-wobble that won't fall down
Oh, when he went to the retreat
Yeah, he stepped on his own feet
What a fucking fool

Lloyd's a virgin <GAY!>
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

Oooh, oooh, oooh

He's bald, obese and round
He'll just follow you around

Because you make him feel
Yeah, you make him feel
He's got something to do

Lloyd's a virgin
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

Lloyd's a virgin, ooh, ooh
He'd rather slurp nutsack goo
Lloyd's a virgin
What's a loser like him to do

Oh, oh, oh, oh, oh, oh, oh, oh, oh
Ooh, Lllllloyd
Can't you hire a whore
For the very first time?

458. R8B vs R75

Newsgroup: rec.radio.shortwave
Date: 2005-11-04 22:32:37 UTC
From: yzordderrex@verizon.net
Message-ID: <1131143557.256167.150660@g47g2000cwa.googlegroups.com>

My R8B was fixed by Drake for $150 labor and $15 in parts. Works right now.

I am playing with it now. Maybe this weekend I will put it up against my R75. I don't expect the stock R75 to do very well against the Drake. R75 audio sucks. Maybe next week I will send R75 out for mods and then a real test.

I know for a fact that the R-75 passes the door stop test.

By the way, no one 'plays' with a Drake receiver.

Ok we will see.

I thought that I would sell the Drake if the Icom performs as well.
You may be right and I will sell the Icom. Or I will keep both.

The wife said to pay the bike off before I spend another penny on the
project car. I got too much money invested in radios - if that is
possible

Hello.

You will find many of the web sites mentioned in replies to you are very good, especially RadioIntel and eHam. But for the most comprehensive reviews on the largest number of SW receivers of all types and price ranges, you cannot beat PASSPORT TO WORLD BAND RADIO, the latest edition (2006) having just been released. It can be purchased direct from http://www.passband.com or from some of the radio dealers, such as Universal or Grove, from some local bookstores, and even from Amazon.com.

By buying that book you will have many reviews easily at hand for perusal at your leisure. It is, in my opinion, worth every penny they charge and, for SW radio reviews, the best reference available.. I personally have been buying the book every year since 1996.

Best,

Joe

This .sig file will continue until Mister Fort posts a sincere apology to all cancer victims and their families. His refusal to do so says more about his attitude and upbringing than any of his thoughtless and hurtful postings in rec.radio.shortwave. He seems to be very proud of the fact that he can buy expensive radios using the refunded deposit money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone caring about his well-being should mention the good work of Alcoholics Anonymous to him. They may be able to help him restore his self respect

and dignity so he stops posting this drunken garbage on the internet.

And Seeks Your Comments here or There

Licenced Hunters wont be using Bows and Arrows !!!!!

Landholders, hunters and government join in the fight against feral animals

Three government agencies are working together to identify public land areas that will be part of a major effort to control growing feral animal populations across the State

---

And SAID

Albert

Spare us your thoughts.. Even someone as thick as you can see the benefits of this. Its a chance for more Gun Owners to get out into the community and assist our Farmers.So many of the gun club groupies are self centered and only interested in their own pleasure and gratificaton in hitting a dumb fixed target duh.

But if the target moves? What the f**k!!!

Even you with your Devil gifted ability to put a negative spin on everything can see the value of this opportunity

Its an excellent example of Guns and the Community

Working Together

Dangerous ? It is

Ive heard stories of pigs attacking Bushwalkers and attempting to eat them alive

And Albert

Ive never seen you EVER post anything positive about GUNS and the Community on these Boards

tysia has, That item he posted about teaching younger members of his family gun safety was terrific

There is something special for a Father and son to go shooting together

and cooking the game over a campfire

Try doing that at your smart arsed gun clubs

If Local gun clubs could suprevise them we could do with a few free public shooting ranges who arent so focused on bullets for a Buck.

Young People from Schools excursions could go there in the spirit of the US NRA Eddie Eagle Programs... and use a school excursions tempoary

permit

The way this wonderful multicultural society in going

Teaching young people how to handle a gun could be a gift to the next generation.

Saddam isn't not a stupid man:

"The attack likely served a dual-purpose, as both a military act and a part of the Al-Anfal campaign."

From your own source
http://www.reference.com/browse/wiki/Halabja_poison_gas_attack

...studies done by non-governmental organizations that concluded different chemicals were used than the ones cited in the DIA study, although a 1991 DIA report stated that Iraq did also posses Hydrogen Cyanide gas supplied by the US. Rangwala's analysis effectively sums up the current prevailing view of the event, that Iraq was indeed responsible for the attack on Halabja, and that the DIA analysis is in error. This evidence backed up by extensive witness testimony gathered by organisations like Human Rights Watch http://hrw.org/reports/1993/iraqanfal/ANFAL3.htm and Indict (www.indict.org.uk), has, more recently, added to the growing evidence that the initial DIA appraisal of the events was mistaken. The most categorical proof is the many further well-documented incidents of deliberate attacks on Kurdish civilians occurring at the same time throughout Kurdish northern Iraq also perpetrated without doubt by Iraqi forces (Al-Anfal Campaign).

Thus, while some facts surrounding the incident remain murky, most evidence and analyses indicate that the gas attack was an Iraqi attack on Iranian forces, pro-Iranian Kurdish forces and Halabja's citizens during one of the major battles of the Iran-Iraq War. The attack likely served a dual-purpose, as both a military act and a part of the Al-Anfal campaign.

http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6311

IIRC - On the K9AY Terminated Loop Antenna Group there is
a Message with about a K9AY Loop that is located on a Roof
of a Multi-Story Building. The Loop has Steel Welded Wire
Mesh Fencing laying under it as the Ground {Reflector}
Radials. The Owner reported that without the Radials the
K9AY was only a so-so perfromer; but with the Radials it
was everything that he had heard with other K9AY Loops
that were located directly over (About One Meter) the Ground.

Hi Jack,

I had some old wire fencing laying around, so I unrolled
20 feet of it, scraped off some of the coating, attached
it to the ground rod, covered the fencing with dirt, and
watered it. Admittedly, this is not the ideal stuff for
an earth mat, but it cost me nothing and was easy to
install (and will be easy to remove to replace with
something better.

I notice a slight (1 S unit) or so on medium and short wave.
SN ratio is a bit higher, too.

I'd never considered radials before. Thanks for the tip.

All best,

Ed

The R75 is a better utility and DX'ing rig then the R8b. The audio quality of the R75 does not "suck". It is quite good when heard through an external speaker set up. It is EXCELLENT when the R75 has a simple audio mod done to it. I have an R75 with the Kiwa mods and it use it through my PC's sound card and I also employ a full software equalizer. I can get it to sound fantastic under any circumstances. While the R8b's am sync does a fine job with moderate fade, it is by no means a remedy for listening to very weak and messy signals. For that task, the tool you need to use is ECSS tuning. The R75 is excellent at that task. With the dual PBT it is like having an unlimited number of bandwidths. You also have two levels of preamp to work with and noise reduction too if you add the UT-106 DSP unit. That is the way to handle challenging signals and resolve them into something you can listen to.

Michael

I am sure that D-Ex-Ace, Cuhulin and Beerbelly are all candidates for a VA home. D-EX-Ace has a demonstrated inferiority complex with strong anti-social tendencies, Cuhulin is a voyeur with a dog fetish and Beerbelly has a necrophilia fetish. All 3 are with the military or have been in the military.

Let's take up a collection so these gents can get their meds!

If a receiver is blocked, you'll see the display skip the restricted frequencies as you tune through them.

R-7000 coverage spans 25Mhz to 1.999Ghz, with a short gap at 1000 to 1025MHz. Design, not blocked.

R-7000's are not cell blocked.

R-7100 coverage is continuous, except for later models which were cell blocked.

(It is Sledders, just for the record.) They tossed Woger outta there because when he stood on a chair to "smooch the moose" he tried to French it.
Woger didn't much like the place anyway. That darned wood floor left slivers in his knees every time he'd crawl under someone's booth to smooch something else.
Darn. He didn't even get a t-shirt, either. I guess it is back to The Shipwreck Lounge for him!

Yes, funny how a little context can change the interpretation. One example,
from Sen. Bob Graham's quote you might think he supported Dubbya's decision
to invade Iraq.

But I like the quote game. Let's go with some quotes from the prez. Maybe
we could start with the one about how capturing Bin Laden is his highest
priority.

507. Re: Question is 'it' a Longwire {Random Wire} Antenna -or- Inverted "L" Antenna ?

Newsgroup: rec.radio.shortwave
Date: 2005-11-05 06:13:06 UTC
From: nm5k@wt.net
Message-ID: <1131171186.131532.136180@g49g2000cwa.googlegroups.com>
Source record: 47308

NOTE: The Amateur/HAM Inverted "L" Antenna is usually made-up
of Two Equal Sections One Vertical 'Leg' and One Horizontal 'Arm'.
These Two Equal Section can be:
* 1/8th Wavelength = Quarter Wavelength Total
* 1/4th Wavelength = Half Wavelength Total
* 1/2th Wavelength = One Wavelength Total
Because of the 'equal' proportionality, the Amateur/HAM
Inverted "L" Antenna is most often Higher above the Ground
then the SWL Version.

Actually most "ham" inv L's are also built to fit the lot,
except that total length is more important if you want it resonant,
or a certain length for performance.
The stock inv L is a quarter wave long. No matter the up/out
ratio. Few hams run 1/2 wave inv L's, unless they are using a
tuner, etc. The extended inv L is pretty common, and is usually
appx 3/8 or 5/8 wl long. It's often used to reduce ground losses at the

base, as the maximum current point is moved upwards off
the ground. It also will give more NVIS performance unless the
vertical section is very tall. The 3/8 WL version can be matched
with a cap. The 5/8 WL with a coil. The only band I've used an inv L
on was 160m. I've used both the 1/4 wave, and 5/8 versions.
The vertical section was 45 ft, and thrown up and over a tall tree
branch. But I yanked it down this last summer as it was redundant.
I already have a 160m Z dipole, and can feed my dipoles as a top
loaded vertical for long haul, so the inv L wasn't really needed.
The shorted coax dipoles that act as a top load vertical outperformed
the L most of the time. It's 42 ft tall. About the same as the L,
but it has much less radation at high angles being the top loading
is balanced. Unless you *want* some horizontal componant for NVIS,
etc, the T vertical actually has a cleaner vertical pattern. My Z
dipole
outperforms the L for horizontal NVIS.

509. Comparing the Icom IC-R75 to the Eton E1 Radio - Three Major Problems . . .

Newsgroup: rec.radio.shortwave
Date: 2005-11-05 07:52:38 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1131177158.788697.43410@z14g2000cwz.googlegroups.com>
Source record: 47310

For One and All,

Comparing the Icom IC-R75 (R-75) to the Eton E1 Radio
- - - Three Major Problems . . .
http://groups.yahoo.com/group/ETON-E1-XM-Radio/message/1722

1. "D" CELL PORTABLE BATTERY POWER :

So here is the Deal - The Eton E1 Radio is a 'portable' AM/FM Shortwave Radio designed to be "Portable" and run off a Set of "D" Cell Batteries that are Carried within the Radio. I have gotten 80-100 Hours and more on One Set of "D" Cell Batteries when using the Eton E1 Radio. This is generally consider to be in the Very Good for a 'portable' AM/FM Shortwave Radio.

Now Look at the Icom IC-R75 Receiver's short comings :
- NO - Built-in Battery Comparment.
- Requires you build your own Battery Pack for 8 "D" Cells.
- A Set of "D" Cell Batteries only last a 'very few' Hours.
- Cost of a Daily Set of "D" Cell Batteries in the First Year of Ownership just about equals the Cost of the Radio.
- Two things to Lug-Around : The Receiver and the Battery Pack; and 'both' are Heavy and Big.

2. "FM" BROADCAST BAND RECEPTION:

The Eton E1 Radio has very good FM Broadcast Band Reception and the Built-in Speaker produces very good FM Quality Sound. Plus there is the Option of Connecting a Set of PC Type Self Powered Speakers and Enjoying really good FM Stereo Sound. FM Tuning and Memories are both very good features.

The Icom IC-R75 Receiver has :
- NO FM Broadcast Band Reception
- The Built-in Speaker provides very poor Sound Quality.
- There is NO Option of Connecting a Set of PC Type Self Powered Speakers and Enjoying really good FM Stereo Sound.
- There is NO FM Tuning and Memory features.

3. XM SATELLITE RADIO :
The Eton E1 Radio has very good XM Broadcast Band Reception and the Built-in Speaker produces very good XM Quality Sound. Plus there is the Option of Connecting a Set of PC Type Self Powered Speakers and Enjoying really good XM Stereo Sound. XM Tuning and Memories are both very good features.

The Icom IC-R75 Receiver has :
- NO XM Satellite Radio Broadcast Band Reception
- The Built-in Speaker provides very poor Sound Quality.
- There is NO Option of Connecting a Set of PC Type Self
Powered Speakers and Enjoying really good XM Stereo Sound.
- There is NO XM Tuning and Memory features.

TBL - CONCLUSION :

The Eton E1 Radio is a Very Good "Portable" AM/FM Shortwave
Radio and runs along time on a Set of Batteries. It also
has very good FM and XM Reception and Sound Quality.

Now Lets Be Honest - The Icom IC-R75 is a Real Failure as
a "Portable" AM/FM Shortwave Radio and only runs a few
hours on a Set of Batteries. It totally lacks any FM and
XM Reception and it's Sound Quality is poor.

All are WELCOME to Join the Eton E1 AM/FM Shortwave Receiver
with XM Satellite Radio Group on YAHOO !

I suppose those whips are good in the boonies, but they are way too noisy for most real life applications. The cascode should be a good design, i.e. lots of isolation.

So you can transmit at a megawatt without a license in the UK, as long
as you are under 21.
Such a deal.

BTW, if you really want to get cheesy, you could use OOK to send your
data.

The 37 year old telephone linewoman next door to you is probably a
shemale. Have you peeped in her windows yet to see? That's what I do
when a girl moves into one of the houses on my street of Glen Haven
Avenue in Glendale, and that's how I know who they are. Shemales are
really, really sexy. I post lots of photos of them on NIM Busters.

I use the synch on the R8B to listen to very weak and messy signals all the
time. It does an excellent job.

I've used an R75 with the Kiwa mods. I wouldn't even keep an R75 for use as a
door stop.

Hi
I am new to shortwave radio. I have not even got a radio yet, however I am
to purchase a used one today (Saturday 5 nov)
I have the choice of two, of a friend. they are both in mint condition,
boxed with manuals etc.
They are the Sony ICF 7600GR
and the Radio-shack DX-394
The price does not matter as they are both priced the same
Which of the two would you say would be the best buy.
I will want to listen to the shortwave radio stations, the radio amatuers on
ssb and also any utility stations I can pick up
thanks for any help
cheers
Meter

Source record: 47323

I'm not used to being a big defender of the R75, but I must say I'm not sure I understand the point of this comparison. The R75 was never meant to be a portable, was it? To my eye, it doesn't look like it was intended for portable operation. So, I don't see why it should this should count as a 'shortcoming'. I guess we could also say that the E1 'beats' the R8B in regard to portability, though if we're going to talk this way we should also point out that the little Grundig mini-world puts the E1 to shame when it comes to portability.

Why does it matter that the R75 has no FM band and no XM? In particular, why do you say that these constitute shortcomings? In my opinion these things can only count in the R75's favor. And you don't mention the fact that the E1 lacks twin passband tuning, is mostly plastic, tends to be inaccurately aligned, and so on and so on.

I guess I don't get it, really. The E1 is a good, if overpriced, portable receiver. Why isn't that enough? Do we have to be "loyal" to the E1 and does this "loyalty" require us to shortchange the R75 and all other receiver that are obviously a cut above the E1? This is the kind of attitude people took toward the Sat 800 and I hate to see it happen again, with the E1.

Steve

Not much inside a modern radio like the ICOM (or the RX-340 for that
matter). A few ASICs that are way more reliable than discrete
components.

I guess I don't get it, really. The E1 is a good, if overpriced, portable receiver. Why isn't that enough? Do we have to be "loyal" to the E1 and does this "loyalty" require us to shortchange the R75 and all other receiver that are obviously a cut above the E1? This is the kind of attitude people took toward the Sat 800 and I hate to see it happen again, with the E1.

Steve

****

i'm with you on this Steve. can't see where Icom meant the R75 to be portable. the E1 is way over priced. a few posters say cheap plastic and not much of a handle. i don't need the sat/XM whatever. the R75 is a proven performer at that price range, and so is the Sat800- which can be found at a much lower price. i have too many portables now. i don't need to buy the newest whiz-bang radio. if the E1 ever drops to maybe $300 or so, i may take a second look. to each his own...

Greg

541. ISM International Standard

Newsgroup: rec.radio.shortwave
Date: 2005-11-05 15:32:29 UTC
From: "kensei@gmail.com" <kensei@gmail.com>
Message-ID: <1131204749.202618.272840@g47g2000cwa.googlegroups.com>
Source record: 47341

I have read that the ISM band is the same in most countries around the world. A person asked me why this was the case and I wasn't sure. My guess is that since devices using this unlicensed spectrum are often mobile devices or in mobile vehicles (e.g., planes, cars, etc.), a device could seriously interrupt communications when going from one country to another if the ISM standards were not the same. Is this somewhat correct?

Thanks,

Kensei

Me too and I finally got lucky. Yea it has synch. It works well. And it has SSB capability. It's one of the best sounding portable radios I've heard, if not the best. It has separate bass and treble controls and a good speaker which is probably why? I was seeing how sensitive it was and compared it to the R-5000 on the outside ant. It's quite sensitive for a portable. Of course it's no R-5000 but a good DXer in it's own right. I think my Sony 2010 has a little better ears but not by much and the 700 sounds a lot better. The FM and MW broadcast bands sound great and I think I may ad this to the list of good MW DX machines.

Why not compare apples to apples??? The R 75 was never
designed to be a tag along with you type radio,, its a tabletop sw
reciever. All the other points are totally moot in IMO. Who cares
about FM? Music?? big deal. XM,, big deal you have to subscribe
to get it. Why not compare it to a Drake R8, and you would come
up with the same complaints. Sorry but this is really a redundant
thread. Its about like comparing a wrench to a screwdriver, they do
different jobs. Im glad "you" like it however. I think they are
overpriced for what they are.

??????????????

The D cells in my big CCRadio get used about an hour or two every
Sunday morn, and last over a year, typically.

I'd look at the R75's current needs on batteries.

Have a Grundig SAT 800 that I bought new this year from Universal. I sent it to Drake for updates. Has everything except the headphones. Excellent cond. Barely used.

Also a Torus Tuner loop antenna 3 - 18 MHz, with amplifier. Works well even with desktops!

$400 for all + shipping CONUS only. US postal money order only. Will not separate.

Hi Brian,

Good catch there! I got one a few years back (at a significantly higher price). It is all you say it is, however I don't consider it to be a real great MW DX machine.

On the sync detect question....it does work pretty well, but it is not in the league of the 2010.

This probably says more about me than the 700, but I have to dive into the manual a lot to be refreshed on "how to do stuff" - it may not be the most intuitive radio ever.

There is/was a book sold by Universal Radio called The Great 700, or something like that. Has manual in it, tips, schematic, etc. Very worthwhile to get.

The 700 is my best portable for SSB reception for sure. It really shines there. Has a fine tune adjustment (why the 2010 didn't include that is beyond me).

A radio with the best of the 700 and the 2010...now I think that would be the ultimate!

Have fun with the 700!

-Russ K3Pi

It will be interesting to see how the E1 is considered about 1 year from now. By then, any QC issues will likely surface. I have heard good reports about them so far...so hopefully Eton learned from the Sat 800 debacle.

My initial reaction to it when I saw it - "that has to be the ugliest radio ever designed."

The display doesn't look that hot to me and I read in MT that it is poorly lit.

To not have an internal ferrite antenna for MW at $500 is a head-scratcher. Apparently, they couldn't figure out how to keep the display from interfering with one, so the solution....no internal antenna!

Source record: 47363

The 7600's 'AM sync' will be a feature that you would enjoy. It does reduce the audio distortion caused by 'selective fading,' and it also effectively reduces adjacent channel 'splatter'... once you get the hang of using it.

Here are a couple of groups to join for ongoing info regarding the 7600 (both before or after you buy):

http://groups.yahoo.com/group/7600GR/

http://groups.yahoo.com/group/7600group/

Here is a website that details everything you'd want to know about the history of all the 7600 series, including modifications for the 7600GR:

http://stephan.win31.de/sony7600.htm

Enjoy the hobby!

How then would people who care get their news and information?

566. HiFer at ~13.55765MHz

Newsgroup: rec.radio.shortwave
Date: 2005-11-05 17:59:36 UTC
From: r2000swler@hotmail.com
Message-ID: <1131213576.394995.323310@f14g2000cwb.googlegroups.com>
Source record: 47367

On~13.55765MHz at about 17:56Z on 2005 11 05 I recieved a HiFer station running a
simple CW "HI" ider.

Anyone else hear it?
Anyone want to claim it?

I am getrting it a little over S1. I have my "far field" calibratordown for some upgrading and
was shocked to hear this. This is my first HiFer, other then my own local, ~1M ~1.5KM,
test setup.

Terry

567. HiFer followup

Message-ID: <1131214219.386751.48480@g44g2000cwa.googlegroups.com>
Source record: 47368

The frequency is 135580 +/- 50Hz.
I found a Hifer listed that meets these specs:

13558.0 HI Monroe, CT Slow CW (2004/11)

If this station is legal, IE part 15 "13.567-13.710 MHz, the field strength of any emissions shall not exceed 334 microvolts/meter at 30 meters", then this might be my best DX catch in 30+ years. That power level is reached with less then 2mW into any "decent" antenna.

Steve - The Reverse Point is Also True !

The Eton E1 'portable' AM/FM Shortwave Radio is a Very Good
"Portable" Radio : But many 'radio experts' try to compare it to
a Desk Top Receiver like the Icom IC-R75 Receiver; simply
because they are in the same price range.

Saying that the Eton E1 Radio is lacking because it does not have :
DSP, Twin BPT, Noise Blanker, Automatic Noise Filter, Optional
Filters, ETC.

The Reality Is - That "By Design" the Icom IC-R75 Receiver is
a Desk Top Radio and NOT a 'portable' Radio; and should NOT
be expected to run off a Set of "D" Cell Batteries.

Yes -The Arguement was an Exercise in the Absurd
and I Would Guess by all the Replies - It Worked !

Via Shortwave Radio perhaps?

Hell, if the UN would stand up for us SWL'ers they'd require every
member nation to have an active shortwave broadcast
service.....and to promptly provide QSL cards without the listener
sending IRC's.

Meter,

If you are strictly interested in Listening to Hams on SSB then get
the Sangean ATS-909 / RadioShack Dx-398.

If your are a Radio Program Listener (International Shortwave Radio)
then get the Sony ICF-SW7600GR Radio.

IMHO - The Sony ICF-SW7600GR is the "Better Overall"
'portable' AM/FM Shortwave Radio of the two.

hey - its just an opinion ~ RHF

The spectrum allocation is set up the the ITU, part of the United
Nations. Every 10 years or so they have a meeting to change the
allocations.

If you're curious, for the US, the chart is published in the FCC
regulations. Title 47 Code of Federal Regulations, Part 2. It's
about 100 pages or so. Plus footnotes. From 9 kHz to 400 GHz.

ISM stands for Industrial/Scientific/Medical. In the US this is
Part 18 of the regulations. You're not allowed to communicate or
broadcast with ISM equipment, but you are allowed unlimited power.
It's for glue curing machines, medical diathermy heaters, microwave
ovens and the like.

>guess is that since devices using this unlicensed spectrum are often
>mobile devices or in mobile vehicles (e.g., planes, cars, etc.), a
>device could seriously interrupt communications when going from one
>country to another if the ISM standards were not the same. Is this
>somewhat correct?

Stuff that does communicate information isn't ISM equipment. Bands
can be used for more than one thing. As the unlimited power of the
industrial uses of these bands makes them a junkyard for serious
purposes, they're also allowed for low power unlicensed use. In the
US this is under Part 15 of the regulations.

Last I checked (read the footnotes for that frequency in the allocation
chart), the 915 MHz band had 5 (or 6?) different users, some with priority
over others. Off the top of my head, it was

Government Radiolocation (ie. military radar)
Commercial Radiolocation
ISM
Amateur Radio
License Free

License free is at the bottom of the list, that's why equipment has
the little sticker (or a note in TFM) about users having to accept
any interference from licensed users.

Hi guys

Great prices on both of them. Damn I'd pay $150 any day for a 700 if it worked well. What a deal! I'd be freaking out and wouldn't be able to sit still once I got it home and found everything worked on it too. Wow Brain you got a superb deal. Something to be very, very happy about.

Now Jim,

I got ya beat on the 525. I paid $285 including shipping and the seller shipped it in a Pelican case!

OK here's the deal. The guy does free lance work for ABC T.V. sports events and sports news. He had a massive collection of SW radios in metal racks lining all the walls!

Now, I won the auction and paid like $450 for it since he just joined Ebay and had zero feedback. No buys or sells at all so I took a chance. It arrived a Pelican case! If you know what they are you can see how this guy

treated his equipment. That's IMO only.

It sounded great and every button and function worked like it should.
BUT......
when I had the chance to disconnect it and look it over, I found a big round scratch on the side of the case. It wasn't dented, but just like a 4" round scratch on

I was pissed off man. I asked him how the f*uc he couldn't mention it in the auction. He honestly said he looked it over and in was in good shape, that he hardly used it. I wanted to believe him. I mean sending the radio in a Pelican case cost him more in shipping costs then more standard ways for sure. { it also cost me more to send the case back to them}

I want to say I was impressed by his verbal skills and having the class to send the receiver by the method he did. I didn't what to make of all this. Plus he said cleaning out one of rooms and I'll see more rigs for sale on Ebay by him and he want the best he can do.

I didn't know what to do. On one hand I had a radio that worked well. The seller was older but not old enough to keep him from working for ABC T.V.events. He says he doesn't abuse his equipment and never has.

Then why a big round scratch on the side not even noticed? On the other hand, this could have been nothing but a scam since he had no other feedback to go by.

OK, I decided the whole thing is bullcrap and I ask for my $470 back. I told him he's paying my shipment fees back to him since I didn't believe his story and told him so. That I'm sending everything back.

A couple hours later he wrote me and made me this offer.

"I'm tell you what Lucky. You seem like a nice and fair guy. You give me what you think the radio is worth. That's right. I'm trusting you to spend a few days with it and give me what you think is fair price.
Basically he said he trusting me not to give him something ridiculous for it.

After giving it some thought and telling him I'm holding back any bad feedback, and sading the radio back, he would have to agree my protective deal first. I told him I want the full price I paid for the radio plus shipping put back into my Paypal in CASH right away. Not later but now. This will also show me I'm dealing with honest, innocent people.

Then I'll give you want I thought it was worth. He agreed. I offered him $275 for the radio, not a cent more plus I'll send the case back to you on my tab. He wanted to let me keep the Pelican case too but when I found out they are not cheap cases, I sent it back to him. Hey, I'm not to take the opportunity and weasel a free expensive Peligan case out of him and his family if there is truly a doubt in my mind if he was really a con artist or just some innocent excentric.

Anyway, we ended being friends and he did sell like 85 more radios and radio related items after I bought mine. I believe he only got like 2 bad feedbacks.

*****whoops. SPOKE TOO SOON. He did have excellent feedback after my deal now he's got 11 bad feedbacks and is no longer a member of Ebay.
http://feedback.ebay.com/ws/eBayISAPI.dll?ViewFeedback&userid=rf-audio

Well, to this day my NRD-525 works great. No problems, the main functions are OK and so is everything else.
So, for $275, I see I got Lucky!
Oh man the guy just flipped out or something after his other half was doing was well :)

Check out his Ebay profile. Scary

rf-audio

At least I have my well worth it JRC NRD-252 !

Lucky

WASHINGTON, Nov. 4 - Kenneth Y. Tomlinson, the head of the federal agency that oversees most government broadcasts to foreign countries, including the Voice of America and Radio Free Europe, is the subject of an inquiry into accusations of misuse of federal money and the use of phantom or unqualified employees, officials involved in that examination said on Friday

What makes your Dipole a "Z" Dipole ?

Well, it's a dipole shaped into a Z shape in
order to fit this lot.

What are the Advantages of the "Z" Dipole
over a stabdard Dipole ?

None. It is slightly inferior to a "straight" dipole.
But...It's more efficient than most any kind of
loaded dipole. So...It's about the next best thing
to a normal straight dipole. I use it on 160m for
NVIS. When I go longer haul, I go to the vertical.

It is true. I've used them both side by side also. The R75 is better for utility and DX'ing then the R8b. The R8b costs more money then the R75 but that has no bearing on performance.

585. Problems with Degen 1103

Newsgroup: rec.radio.shortwave
Date: 2005-11-05 22:09:54 UTC
From: Ranting <none@none.com>
Message-ID: <S4abf.413730$1i.372739@pd7tw2no>
Source record: 47384

Sorry for being a troll here, but I thought I had better make mention of my situation in case other people are considering purchasing a Degen radio such as 1103 from Ebay or Liypn

I first have to praise Liypn being professional and answering *direct* questions anyone has. However, the products that are exported by Degen, specifically the 1103 lacks proper testing and quality control. The consumer should be aware of this fact, but Liypn or other Ebay sellers make no mention of this. Of course, some may say, "why should they"?

Any how, I spent over $120 for the radio including sending it back to China for warranty repair. I was one of the unlucky ones where there was a tuner issue with the 1103's. I could've bought something more reliable and with a better warranty where shipping was not an issue for less.

As I didn't use the radio very much, the tuner issue didn't render its ugly face until near the end of the warranty period. I contacted the seller and I was reminded that I was responsible for shipping. Fair enough, I knew that already. My radio was in mint shape, no scratches or anything. I sent the radio to China and then I am informed when it arrived that it was NOT in mint shape because one of the radio's 5 cent face sticker was curling (cheap adhesive was used). I was informed that since the radio is NOT mint there would be an added charge. Another way to make a money.

So, I pay the difference and get a [supposed] new version of the 1103. I receive it and the first thing I notice is that the battery compartment is a little smaller than the old radio because I had a difficult time inserting the stock rechargeable batteries that originally came with the 1103. Then, I proceeded to use the radio. I tried the FM and tried shortwave. FM was fine, short wave had a lot of distortion. I then proceeded to program my favourite local AM radio stations. The AM band has moderate distortion too.

I checked the Yahoo Group: http://groups.yahoo.com/group/kaito-de1103/ and I found out that many people are complaining about the distortion issue with the [Degen 1103]'s.

My point is that everyone needs to be careful. I don't recommend buying from a retailer in China, irregardless if many people are happy with his service. The quality and quality control may be lacking as is with the 1103's. You live and learn. I shall not buy from this Ebay seller again nor from someone overseas unless I can afford to absorb the cost of the item if something is defective.

I know there are people here in support of Lipyn, but I had to share my experiences as it appears not be atypical, despite the high rating the seller receives from his buyers (he does sell other products too). After a while, you can't change your feedback on Ebay, so that could be why the ratings are high. There is no ratings or areas of feedback for post 6 months.

Enough of my ranting.
Cheers,

- Have more or less the same take on Degen DE1105;
- a Nice, Nice radio, but some initial QC problems...
frustrating but work-aroundable..

their statement that " Outside Interference may cause the radio to not
operate properly "
- sounds like funky / Buggy control software..
they suggest that taking out the batteries out for 10 minutes..
- In other words, " Reboot The Radio"

- Sometimes turning it on / off or replacing the batteries does the
trick here..

did not trust the " rechargeables " 220 volt stuff,
one little glitch could fry the radio

Anyhoo.. really like the radio, feel I have gotten my $$$'s worth..
and would repurchase one / similar one from the same seller.

really,
where else can you get a shirt pocket sized radio - Degen DE1105 in
this case -

that will let you walk around in the early hours in Northeast U.S.A
Listening to radio Australia off the whip
??

Nothing is new under the sun.. :) They used to build radios (back in the
tube days) into some strange things.. like refrigerators, kitchen tables,
telephones (on the wall)..

BTW, J&R Electronics seems to have them in stock under the DeLonghi brand,
same model number. DeLonghi is known for manufacture of heating appliances..

++++++++++++++++++
Given the similarities in the way left of center slant on news and
programs,
give it all to Air Amercia. I bet it still wouldn't last a year, but at
least it wouldn't
be sucking from the public teat.

I worked part time in a local NPR affiliate and even compared to the
left wing,
counter culture found on most college capmuses, the NPR station was
some-
where way to the left of Stalin.

They have had major problems keeping any engineers on staff. I guess
because engineers tend to treat one volt like one volt, and having
group
hugs, and motivation meetings doesn't change reality.

In the short time I worked (part time) there I witnessed such gross
fianancial incompetence that I still don't see how they keep the lights
on.

Hi Terry,
Last time I listened, there were at least 10 stations up there- some as loud
as 579, other only copyable via QRSS software.

Try here for coverage: http://www.lemonde.fr/

It's getting even more dicey in Frogland too folks!

Apparently last night a tear gas canister fired by the
french police landed in the courtyard of the Grand
Mosque of Paris, forcing the mosque's temporary
evacuation while the gas cleared. This later struck
up the protests all across the country with acts of
arson and vandalism reported from all ends of the
country. Should be great fun watching the Frogs
trying to control all this mess....

Seems the police in France decided to send "a message"
by sending a crowd control canister into the mosque.

I personally think it would be *rather amusing* if some of these
so-called "islamic youths" somehow managed to break in and
gain control of just one of France's 59 operating Nuclear
Power Generation Plants. Yeah !!!!!!

I'd bet many a Young Islamic kook in France would just
love to goto Allah's Paradise of 39 Virgins atop the steamy plume
of a Chernobyl-style reactor meltdown someplace in Frogland.

The World Can't Wait! campaign appears to be the brainchild of one Charles Clark Kissinger, a former SDS (Maoist) leader who today serves as a high-level organizer in the Revolutionary Communist Party. Kissinger created the anti-war coalition Not in Our Name, which is working closely with the World Can't Wait! campaign.

As I said, hanging out with your "buddies"..

That's is because of the high mark-up. These cheap Chinese radios are sold at or below cost.
The U.S. dealer can just toss it in the trash and send you a new one and still hold a profit.
The Chinese simply want to muscle out all the competition in the low end portables.

Get a Sony while you still can.

Revisionist history and an inability to face reality would appear to be the
norm for the blind-leading-the-blind. And when they are that blind they can
never get anything right.

Interesting. I have purchased lots of radios from two different ebay
vendors from China, so this peeked my interest.

I have been luckey.....so far, and everything has been fine for me.

They nicked you for taking off the stickers on the front of the radio?
I never would have thought of that. Pretty low if you ask me.

When I buy from the China radio sellers, I go in with the notion that
if there are problems with the goods, I will just have to eat the loss
and move on.

Sorry that you got stung like that, but thanks for the heads up on the
warranty issues.

>Anybody else feel the same way?

Yep. They are good radios even after all these years. I've got a 8G005
that never fails to please.

I might be letting the cat out of the bag, but for those that like to
dx the mw band, the Zenith transistor portables, especially the 500H
will hold its own.

Zenith was a great and proud company in those days. It still saddens
me to think of there demise after the Japanese radio invasion.

Have fun with your Zenith. They don't make 'em like that anymore.

I own a Zenith 1000 Transoceanic transistor radio.I bought it for four dollars at a Goodwill store several years ago.It didn't work when I bought it and it still doesn't work now.I don't know how to work on radios.Back in the 1950's,a neighbor of mine owned one of those first models of Zenith Transoceanic radios that looked sort of like the cabinet was covered with leather.I saw a radio just like it in an old movie I was watching on tv earlier this afternoon.

I've got a 1958 I used quite a bit for casual MW , but I had to
quit using it cuz a cap was fixin to flake out. It sits here under
the table. I've also has a earlier 50-52?? model that was even
better, as it's loop antenna was better. It had a rotary sort of
dial vs the 58's sliderule type of dial. I've got an old 1948 RCA
console with MW/SW and a victrola record changer. It's got a
2x6v6 PA , and a 12 inch speaker. Needs a new OPT though.
It's got a big loop antenna on the back. In theory, it should be
the manliest of my old MW radios. But I haven't tried it yet, as
I'm too lazy to order the output tranny...The radio, etc, all lights
up and works otherwise. These dayz, my usual MW radio is the
IC-706mk2g, with the big diamond loop here in the room. "44 inches
per side". It's quite good. Better than the old radios to be honest
when you consider the readout, etc...But I like the tube audio of
the old radios for casual listening.

Whew! That's a lot to digest. Clinton, as you may have heard, isn't in office anymore. As approval ratings go, I saw a report yesterday that said Clinton's lowest approval rating was 40 percent; Bush's is down to 39 percent; no other president since Lyndon Johnson has had approval ratings that low. But who's counting.

I'm not going to change your opinions and you're not going to change mine. But the OP seemed to be asserting that everyone was in agreement originally that invading Iraq was the right thing to do. They weren't. And as for those that were, some, even Republicans, are saying they feel they were betrayed. I don't necessarily think that Bush lied about evidence of WMD's, but I think he made a bad decision. Saddam could have been contained, even toppled, without us going to war.

As far as the "everything is rosy" scenario, personal income is rising, but mostly for the wealthy. The middle class is losing ground, with housing, energy and medical costs rising faster than income. And, don't look now, but poverty in this country is increasing. the national debt is out of

control and this country is now mortgaged to the Japanese and Chinese.

Yes, Clinton is a very bad person. And the Dems lost a lot of offices since his presidency. (The voters in my county tossed out all the Dems on the county commission after they tried to pass a 5 cent gas tax to pay for road repairs. The all-Republican boards since then have proved to be among the most inept and embarrassing in recent memory. The current commissioners will be turned out in the next election after ramming through a 23-percent property tax increase (they originally tried for 30-percent) for new libraries and parks.

Bush is losing consensus in the Republican party, he's lost the confidence - and trust - of the majority of Americans, and the political pendulum is beginning its swing away from the right.

BTW, you are very well versed on the Clinton administration. Have you by chance read Greg Palast's take on Bush and the electrical blackout a couple years ago? Or Bush's energy policies? Scarey.

Greg

Look around,,, ask around in your area,,, (I ought to listen to my own preaching and take some of my big old favorite non working radios over to old man Otto in Clinton,Mississippi (five miles West of me) and let him repair my radios for me before he kicks the bucket,, what he doesn't know about repairing old tube type radios and old transistor type radios,,, Nobody knows) get your old radios over to somebody who knows how to repair them.It will be the best thing you ever did.You will never regret it.

Back in the 1950's,a neighbor of mine owned one of those first
models of Zenith Transoceanic radios that looked sort of like the
>cabinet was covered with leather.

That's like my 58, and the older one I had. They have a
flip top case, and the loop is in the top of the case. It can
detach, and be stuck on a window, etc..

get your old radios over to somebody who
knows how to repair them.It will be the best thing you ever did.You
will
>never regret it.

I can fix them in my case, but I'm just lazy/busy. I just picked up
some old surplus stuff. I got an old BC-650-A that is intact, and
probably works. It runs off batteries, and was a field receiver.
I tried finding some info on the net, but it's pretty scarce.
They list it, but not much info. Also got some other stuff,
much from aircraft. I still need to unload a bunch from my
truck. I got some kind of radio from an old B-24 bomber,
and also others. Got an aircraft ADF unit along with it's
remote controlled antenna. It looks like one of those stab
on meters that goes on your breaker box, except it's got a ADF
antenna in it. Loads of other stuff too. A bunch of old aircraft
instruments, etc...Some test gear too. Got a good 2nd heath
VTVM. Those still come in handy. Now I've got one of each size..
The bigger "lab" size, and now also the smaller size version.
I saw another old radio that covered part of SW and MW. I think
aircraft, but I forgot...I'll have to look at it again. Also a collins
VHF air radio. Dang... More junk...I'm like a packrat...
I can fix the stuff no problem, and have all the test gear. It's just
lately, I just don't have the time to mess with it. Busy at work,
and when not workin, I still stay busy... Also been on a geetar
amp buying spree, so that keeps me even mo busy... Been buying
up some good vintage tube amps...Gotta a fender super reverb, a
traynor bassmaster mk2 head "like a plexi marshall", an old '63
gibson mercury head, etc... I'm still on the prowl, and also need
to find some speakers for some cabs I have... I'm gonna use a 2x15
cab for the traynor...Or at least at first...May go to a 4x12 marshall
cab later... The super reverb is a 4x10 combo. Yea, they is loud...
The super does about 60w with the SS rectifier module..The traynor,
about a butt burnin 80-100w depending on plate voltage... I could kill
small animals at 100 yards with both running at once I bet.
Fixin radios....Heck, I got tired of fixin radios...Thats why I like my

706...I never have to touch that thing. So far...Knock on wood...
I remember when I ran heathkits, drakes, etc, I spent about as much time fixin and tweakin and adjusting as I did using... I can say my kenwood TS-830 is real reliable though. It's a real workhorse. And a top notch radio too...The receiver on that thing will keep up with most anything.

I just built a battery pack for my Hallicrafters clone of the TO, the TW 1000 and this is the first weekend I've been able to fully check it out. The radio does work surprisingly well. It's quiet and sensitive, even quieter than when it's plugged in. Audio is very nice.

> Great stuff. I am
> starting to feel that there have been no good portable radios available
> new since 1962. :)

I suppose it's portable in that it has a handle and a battery. But a TO could have doubled as an anchor on Commodore McDonald's yacht.

>
> Anybody else feel the same way?

My TW 1000 does what it does very well. But it doesn't cover all the SW broadcast bands and it lacks most of the SW radio amateur bands. It doesn't have a BFO. If I only could have one radio, it would be a general coverage radio capable of SSB reception.

I had both. Now I have just the 7100. It scans faster, has a few more bells and whistles and about the same sensitivity. Controls are not as heavy duty as the 7000 though.

Had problems with the 7000 drifting. Sent back to Icom for repair under warranty. They just adjusted the osc. freq. Still drifted. I replaced the main crystal and cap. in th pll myself. Then it was OK.

Still wish I had the 7000. It matched my R-71.

RAV,

Well tonight I made the drive from OK-Land, CA up to Twain Harte, CA. After i got the Jeep un-packed and the items put away and stored. One of the things that I did was replace a Sangean WR-1 "Wood Radio One" with an Old Zenith Table Top Transistor Radio.

The location of the Cabin in Twain Harte is over the hill and down in the valley; where AM/MW Signals just don't seem to get. The Sangean WR-1 "Wood Radio One" was only a so-so performer in this location even with the help of two separate External Antennas : a RadioShack AM/MW Loop Antenna (inductively coupled; and a Godar FM Antenna directly wired to the Radio's FM "F" Connector Jack.

So I un-plugged and disconnect the Sangean WR-1 "Wood Radio One" and connect up the Zenith Hi Performance Tuned RF AM/FM Radio Model # E430W with S-Meter; Tone, Loudness, FM-AFC-AM and Off-On Controls. Built-in AM/MW Ferrite Rod Antenna about 5" Long and External FM Antenna Input Terminals (300 Ohms). The inside of the Radio has many parts labeled as "Hitachi" and the Back of the Radio is marked "Zenith Japan" so this is either a Zenith 'designed' Radio Manufactured by Zenith in Japan -or- a Hitachi Designed and Manufactured Radio that was Re-Badged and Sold under the "Zenith" Brand Name. What makes it some what unique is the AM/FM Band Scales : The Needle/Bar is Stationary and a Numbered Belt Scrolls behind it. On the inside is the Key Component that makes this Old Radio Special : A Three Section Air Variable Tuning Capacitor with Six Gangs. Another good point was the 5"x3" Oval Speaker.

I did not do a Side-by-Side of the two Radios. But the reason for bring the Zenith up here was the fact that the Sangean WR-1 "Wood Radio One" was not getting the job done; in this very poor AM/MW Signal Area. But it did not take long for me to be pleasantly surprised with the Performance of the Zenith E430W Radio on AM/MW just using the built-in 5" AM/MW Ferrite Rod Antenna. While the Sangean WR-1 "Wood Radio One" Pick-up some AM/FM Radio Stations; the Zenith E430W was picking up an AM/MW Radio Station on just about every 10 kHz. Plus the FM Radio reception was much better with Zenith E430W using the Godar FM Antenna than I could recall it had been with the Sangean WR-1 "Wood Radio One".

NOTE - While this is a Transistor Radio it has a 5"x3" Oval Speaker and a Big Box (13"W x 9"H x 6"D) for that Old Tube Radio Room Filling Warm Sound.

FWIW - One of the 'secrets' of the Old Tube Radios was the fact that they had to be Vented in the back to release the Heat from the Tubes. As a Result the Front Facing Speaker also used the Entire Radio Box as

a Reflective Speaker Enclosure to Fill the Room with Sound using just one average size Speaker. Today's Single Speaker Radios usually are heard as a Point-of-Sound form a location within the Room because they have small speakers and small boxes that are NOT Acoustically Designed to produce that Big Box Sound. There are some High Prices exceptions like the Bose Wave Radio ETC.

TBL - So I guess what I am Saying is that that YES the Old Zenith Tube Radios are Great for both their Performance and Sound. And in those Good-Old-Days YES they were "Made in America". But the Zenith E430W Transistor Radio is a Radio that also has that Big Box Sound of the Old Tube Radios; because it is designed as a Big Box Sounding Radio. Plus here is one of the early examples of an Out-Sourced American Brand Name Product being Made-in-Japan by "Zenith Japan".

IMHO - For its time of manufacture; the Zenith E430W AM/FM Radio represented the Best of Both Worlds and is Truly a Great Radio !

yes as always - more than you wanted to know ~ RHF

JD,

More Examples of Democrat Party of the USA

Racism - The Liberal Racially Targeted 'nicknamed' of "Scalito"
highlighting this nominee's Italian Heritage.

Sexism - Calling the Seat of Sandra Day O'Conner a Women's Seat implies
a Quota for Women on the US Supreme Court. So then are we to surmise
that Only Two Seats on the Court are Reserved for Women ? Plus if
Being-a-Women was the Prime Requirement to Replace Justice Sandra Day
O'Conner : Then where was "The Killer of Chapaquiddik" aka Senator
Kennedy when Harriet Myers was Nominated - He was out there Bad
Mouthing Her Too.

Ideology vice Patriotism - Democrats Speak of "Respecting the
Constitution" and what they think it really means : While the
Republicans Call for "Up-Holding the Constitution". Which is "The Oath
of Office" of All Elected Federal Officials including each and every US
Senator.

As for Me - I Say - God {Allah} Bless America - Amen ~ RHF

I note with some interest the hypocrites in this group cheering the problems in France. Perhaps they should think back a bit in time and remember Watts, Detroit and LA after the King debacle.

It would appear they can't remember yesterday's news, never mind that of a few years ago. There is something seriously wrong with some people that they should wish evil on others..these sorts deserve a name.

As luck would have it, there already IS a name..NEOCON TRASH.

During the riots in the US, I didn't see even ONE French poster cheering the violence and destruction here, unlike the unwashed drunken slobs who post their inane and anti social attacks under the guise of 'patriotism' and the 'American way'.These misfits contribute nothing to anyone but merely add to the Ugly American stereotype, which seems to be more ingrained and widespread worldwide by the day.

What next? Secret death camps in Eastern Europe?

ABSOLUTELY !

We have been duped by off-shore junk-tronicks manufacturers into thinking their equipment is good stuff. The new stuff offers whistles and bells, but when it comes down to the important qualities: dynamic range, sensitivity, audio quality, the Sangeans, Sonys etc etc etc are crap.

The manufacturers and the electronic manufacturers associations have lobbied hard for the last 20 years to make us think that the toys they'be been producing are superb. The newer SWLs easily swallowed their propaganda but the rest of us stood by scared to speak out. Shame on us.

If you really want your eyes opened, get hold of the IEEE Spectrum magazine from either 1972 or 1973. They did an incredible article on "Tubes Versus Transistors" (that's the article's title). Very scientific, very objective and done by a highly esteemed magazine. Tubes won.

Now they are cramming "digital" everything down out throats. Digital audio sucks and when used over any ionospheric path, sounds horrible.

I am fed up with the "bill of goods" we've been sold on the new stuff. It's junk and I'll use my TransOceanic, Nationals, Hallicrafters, Nordmendes and Grundigs (older non-Chinese version of course) EVERY TIME.

The commies target industries to dominate. Try buying a light fixture that ISN'T made in China. Cheap electronics? Same thing. Check out magnets. I did a search for Super magnets (neodymium) the other day. It seems China is the only one making them now. I couldn't find any other source.

The availability of near slave labour, very low corporate taxation and NO pollution laws, make China an attractive place for corporations to fatten their bottom lines.

China is now the US's largest trading partner and produces something close to thirty percent of all manufactured good in the world. They have a massive space program and one of the world's largest armies.

Canada, in their wisdom, is sending them FOREIGN AID money. It appears stupidity, incompetence and massive corruption are not limited to Washington.

France should solicit help from their Canadork brothers. Those Muslim young un's are kicking their butts. Of course, Canadorks probably would not be much help eh?

Picked up a new radio yesterday at the hamfest. It is a very nice Super Pro 600. I had just enough beer can money to pay for it. Someone had done a very nice attempt at restoration. Of course, I'll go back through it to make it better and then add it to my growing collection. Ya gotta love them boatanchors. Too bad I can't tie one to Mike and toss it in the Gulf. I do have a 390 carcass that would work really well.

Did you ever notice that if you type the the work "Canadork" into Outlook's spell checker it gives you "Canadian" as a possible replacement? Even Microsoft agrees that they are one and the same.

In all fairness, d-EX-Ace is far more deserving than what you give him
credit for. I feel his cumulative postings show, without a doubt, that
he, alone, is indeed VASTLY inferior to a COUNTLESS number of Canadians
(or any other nationality, for that matter).

The record had to be set straight.

Every State in America had a very good Education system untill fed govt (democraps and libs) started dumbing down America.
www.devilfinder.com The Deliberate Dumbing Down Of America by Charlotte Thompson Iserbyt

Why do you think so many American parents are home schooling their kids nowdays? I went to public school from 1946 to 1958,(I started in the first grade in school when I was five years old,two months and five days later,I turned six years old) and that was back when public schools actually were very good public schools.You want to pick on Mississippi public schools? in essence,you are picking on every public school in America.

And my dog does not toot in my face either.

I guess I am on a witch hunt now for a Zenith E4,,,,,, what did you call that radio? I own some old Zenith radios.One of them has the speaker mounted in the bottom of the radio,right there on the very bottom (like you turn a radio upside down,that bottom,like you turn a baby upside down and look at the baby's feet to see what sex it is) of the radio and there is a sort of a pedestal thingy built on to the bottom of the radio so as to keep the speaker itself about an inch or so from actually being drownded out.(or something like that) I reckon it was one of Zenith's wild hair ideas for promoting a better sounding radio.It didn't work too good though,I guarantee y'all that.

You should have seen Hurricane Katrina when them winds were whipping around that big tall pecan tree in my front yard here in Jackson,Mississippi.I saw the base/trunk of that tree at ground level dancing around like a wild Indian on Camp Kickapoo joy juice.It put a ten to 15 degree slant on that tree leaning right toward the front of the roof of my old house and I am worried about that big tall pecan tree behind my house too.Katrina knocked down three trees across the street (1304 Denson Ave) I live on.I lived in Martinsville,Indiana in 1947 and I spent two months at Ordnance Ammunition School at Fort Knox,Kentucky,November and December 1963.

I am liberal jewish trash myself and proud of it. When Clinton sold
pardons, took the whitehouse furniture and had his law license revoked
it was a special time for America. But I became disillusioned when I
found out about that hefty girl. Clinton could have had any shemale
he wanted but instead he showed no taste and picked an ordinary fat
girl to not have sex with. That's really disgusting. In Glendale,
West Virginia we have higher standards. www.shemaleyard.com

Earthquakes don't scatter all your stuff and get it all wet. They do
clean out your refrigerator and your kitchen cabinets. I'll take a
seismic event over a hurricane or a twister swarm any day.

If you can't find a cord to fit the factory socket, consider replacing
the socket with one you can get a cord to. Everyone here knows how to
solder, don't we?

Your probably right. I was up till early morning and got some good catches
on MW i.e. TX, AZ, IL etc... It wasnt too bad. Nice sound is why I like it.

One of the features that's not fully utilized on the Sat series receivers is the preselector trim. If you don't have the manual, you're not going to know it's there.

On Sat 500, and 700, hold down the Mono button while you turn the tuning knob. This will electronically peak the front end, while narrowing front end selectivity. You have to do this at the end of the tune/adjust sequence for any given frequency. Once you touch the tuning knob again, the preselector resets to default.

Used correctly, Sat 700 still isn't a smoking hot DX receiver, but performance increases significantly.

AM Sync, with SAT 700, tends to hum. This is actually a beat between the incoming carrier and the sync injected carrier that escapes the high pass filter. It's very stable, which suggests that the sync/IF strip is also very stable. A careful alignment of the IF strip is usually beyond the capability of the casual technician on this model, but anyone with a stable frequency counter, and a crystal controlled frequency standard can effect the proper alignment of the IF stip and the sync. Once this is done, performance of 700 will hold its own against the smaller tabletops. Still not a premium DX receiver, but more in line with what the designers had intended for it.

Sat 500 also came with an AM sync function that was, for most users, non functional. Ylo Metz posted a mod to the Sat 500 sync, about a decade ago, that brought it up to snuff. With the Metz mod, Sat 500 sync was surprisingly good. I did it to my own. Took a little more than two hours with the full alignment I did afterward. Alignment wasn't necessary with the Metz mod, but frequency readout was off by a few khz, new out of the box, so I did the full procedure.

I don't know if the Metz mod for Sat 500 is still up on the web or not. A Google search might reveal something. I may have it on an old harddrive, though. I'll take a look and make it available, if I still have it.

As for the audio of Sat 700...I was less pleased with it than Sat 500. There was an attempt to hype the top end, which introduced some minor errors elsewhere in the audio. (This was from the speaker, now. Line outs are quite clean and smooth.) Sat 500, while not quite as crisp, had a more smooth and natural sound from the speaker. Minor differences, but I'm a little picky about my audio.

As an FM tuner, Sat 700 is surprisingly good. There were a couple of weekends where I had 4 remotes going simultaneously, while setting up for the Saturday night show at the club. I was just flat out of Fanfare tuners. So, I sent out my Sat 500 and Sat 700 out as air monitors for two of the locations. SAT 500 closer in, Sat 700 to Merrillville, Indiana. SAT 700, with it's RCA line outs plugged into the field mixer tape inputs without adaptor, and with an FM-2G antenna, drew in the Chicago station with full quieting and glistening stereo. It also displayed the dial position nicely for public view. Not as large as SAT 500, but with the LED backlight mod I'd done, it was visible to listeners who came to the table.

After that broadcast, my associate told me she switched to BBC for the race results while they were striking the setup.

Schumacher was on home turf showing them how it was done that day.

Yea I figured that out. The manual is pretty good for this radio.

True, but your *implication* was very obvious.

> Here's a short snip just to remind you that I offered the listing
> *ONLY* for comparison.

...but that was the point. Comparing the shrub to a long since out-of-office Klintoon has nothing to do with anything, much as when people talked about the casualties of the current war, you quoted *peacetime* military casualties (as if that justified anything).

> Are you saying that only the Dems should be allowed to sling mud?

Certainly not! And I'm sorry that you view the legitimate criticism of corruption or incompetence (of whomever is in power) as mud slinging.

P.S.

Although I don't think it's germane, out of respect for your fondness of bringing up Klintoon and partisanship, let's not forget the fine Republican that left office with his tail between his legs, Trick E. Dixon and his boy Spiro too...(Wow! -- a double header!)

767. Dymek McKay DA100E

Newsgroup: rec.radio.shortwave
Date: 2005-11-06 21:16:33 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <436E72B6.5D3D@mindspring.com>
Source record: 47566

I just had a second failure (of 6 DA100E's owned for I guess 6 years,
so that's 18 years per DA100E average so far)

The first one went to 100% thermal noise

The second one went to what sounded like an intermittent short
in the coax, blowing my 1/4a fast-blow fuse every few hours as well
(which protects its internal 1/3a fast-blow fuse). It's in
the antenna's 50' lead if it's in the coax, and there's no obvious
place that that might happen, so it's probably not the coax.

Anyway I dug out my spare DA100E, measured the distance to the
connector against the ground, located the existing wire with
an AM radio tuned to null a weakish station (dragged across the ground
until the station popped up) and dug right within 2" of the existing
connector.

The replacement works great, very quiet. I guess it had been making
some noise for a while and I didn't notice consciously.

Oddly enough, my MFJ-1024 continues to perform nominally, constantly
on for 7 years. But I do run it at reduced voltage...

771. Repair Kenwood R-2000

Newsgroup: rec.radio.shortwave
Date: 2005-11-06 22:30:52 UTC
From: SWping <bgsmallwood@cox.net>
Message-ID: <hn0tm1122dfhtcuf1jtauir6q7qa7p1r89@4ax.com>
Source record: 47571

I have a Kenwood R-2000 receiver that has developed tuning a problem. When tuning slowly it often bounces back and forth between 2 adjacent frequencies (14.295 and 14.290 for example) and the only way I can go past those frequencies it to tune quickly. Also it sometimes tunes to higher frequencies even when I turn the knob CCW.

If I remove the power cord for a few minutes it tunes normally for about 3-5 minutes but then starts doing the same thing again.

What I am looking for is someone to recommend a good service center that I can contact about repairing this receiver. I have the original owners manual and the service manual. I have had it a long time and am fond of it.

Thanks

bgsmallwood@cox.net

I own only one Grundig radio.I reckon it's a Grundig radio,that's what the warped pot metal name plate on the front of my Grundig AM/FM/Shortwave/Phonograph wooden cabinet floor model radio says.But the two little manuals that came with the radio do not mention the name Grundig at all,everything in the manuals that refer to a name brand concerning the radio is Telefunken.The only thing I can find in the manuals (one of the two manuals anyway) as a reference that might be a date of manufacture is 1957.(or is it 1958? I don't remember exactly,I am not going to move all that junk I have stacked around and on top of the radio just to take another look at them manuals) So what is it? A Grundig radio or a Telefunken radio? I own another Telefunken radio too that does not say anything at all about Grundig.

++++++++++++++++
This morning at 8:45 the local power substation crashed , and burned,
and we
were without power for 4 hours. Got some serious DXing in and copied
several
other stations on ~13.560MHz. I have a slight residual noise floor from
power
lines and it was a very cool day , nice for DXing. Kind of a
mini-DXpediton
without leaving home. My wife cooked some steaks on the grill and we
enjoyed
it.

Even the DX398 was impresive coupled to a decent antenna.

It was so quite RF wise I could hear igniton static from cars on the
nearest "major" highway about 1500' away.

I love it when this happens!

I want to get rich and move 20 miles from anyone.

Terry

House Vote Counters Eminent Domain Measure

Associated Press | November 4 2005
By JIM ABRAMS

COMMENT:
This is a major victory against those who would seek to completely undermine property rights. Now we must lobby our representatives in the Senate to support this legislation and curb this rampant employment of "eminent domain" before it gets even more out of control.

WASHINGTON - Conservative defenders of private property and liberal protectors of the poor joined in an overwhelming House vote to prevent local and state governments from seizing homes and businesses for use in economic development projects.

The House legislation, passed 376-38, was in response to a widely criticized 5-4 ruling by the Supreme Court last June that allowed eminent domain authority to be used to obtain land for tax revenue-generating commercial purposes.

That decision, said the House's third-ranked Republican, Deborah Pryce of Ohio, "dealt a blow to the rights of property owners across the country."

The bill would withhold for two years all federal economic development funds from states and localities that use economic development as a rationale for property seizures. It also would bar the federal government from using eminent domain powers for economic development.

It now goes to the Senate, where Sen. John Cornyn R-Texas, has introduced similar legislation.

The ruling in Kelo v. City of New London allowed the Connecticut city to exercise state eminent domain law to require several homeowners to cede their property for commercial use.

Conservatives were in the forefront in arguing that this was a dangerous interpretation of the "takings clause" in the Fifth Amendment of the Constitution that allows the government to seize property for public use, with just compensation.

"Governments should not be able to bulldoze a person's home or business to benefit other individuals," said Rep. Henry Bonilla, R-Texas.

Liberals warned that it could make it easier to tear down poor neighborhoods. "We don't need you on this one," Rep. Maxine Waters, D-Calif., said to those arguing that eminent domain can lead to beneficial urban renewal projects. "We need you to respect the right of those minorities and those poor people to hold on to what is their own."

Hope this is of interest

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5827541174

1920s RCA Victor model 8U2 A Table Radio. This is the table version of a real classic. A beautiful rare unit. Radio dials in AM frequencies and Policeband...SW? frequencies. An interesting audio item. Radio is in good condition but could use some restoration work. Beautiful all WOOD casing..etc

follow link for full description and photos

I'm familiar with the purpose of the ISM band. My question is why is it important that the ISM band be the same around the world? I've looked at the FCC site and the ITU and I didn't find an answer.

Anything but the whip! Seriously, an external antenna will let you see how good that radio really is. I have a random wire with a grounded coax feedline and I get great reception wit the 320..

Because the ISM equipment is shipped around the world and the interference from such equipment can cause interference which can also propagate around the world.

Consider 27MHz, this is an ISM band and diathermy machines make a hell of a racket. When propagation is good, only a few watts is required for international communications. These machines leak RF and it can cause RF interference around the world, that is, unless the rest of the world is also using the same frequency.

It reduces the cost of manufacture if all the medical machines use the same frequency bands instead of having to redesign them to suit each country. Same applies to industrial and scientific applications. It's called band planning.

Brad.

Terry - "HI" is out of Connecticut and I've been hearing it on and off here for about a year. I received a nice verification letter from the owner after reporting his signal some time ago. There are a few others using QRSS rather than straight CW in this band. I've copied a couple of others but can't remember the ID's. Check the LWCA site for a listing of the beacons here. I used Spectran on my computer to detect the QRSS signals. Try checking for "A" on 2.0974 MHz. ID is every 8 seconds.

This .sig file will continue until Mister Fort posts a sincere apology
to all cancer victims and their families. His refusal to do so says more
about his attitude and upbringing than any of his thoughtless and
hurtful postings in rec.radio.shortwave. He seems to be very proud of
the fact that he can buy expensive radios using the refunded deposit
money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone
caring about his well-being should mention the good work of Alcoholics
Anonymous to him. They may be able to help him restore his self respect
and dignity so he stops posting this drunken garbage on the internet.

From Lake of the Ozarks, Missouri
GOP State Senate Caucus

President Bush traveled to Canada this week. Canadians are not, we are told, happy with the President because of the whole Iraq thing.

Memo to Canada: Americans don't much care what you think because we know that Canada's biggest asset is sharing a billion mile border with us.

Think I'm making this up? According to the CIA's World Factbook, "Roughly 90% of the population lives within 160 kilometers of the US border."

If Canada were located in Africa instead of North America, it would be a country of 32 million white people in loin cloths barely surviving by eating wildebeest they had illegally cross-checked with hockey sticks.

Nearly 87% of everything Canada exports, it exports to the US of A which works out to about a billion dollars per working day. How about if we close the border to Canadian imports every, say, Tuesday. For a year.

Canada's principal export has been comedians who come to the US because one of the many things Canadians lack is a sense of humor. And Mad Cow Disease. They export that. And a dreadful baseball team which is moving to Washington, DC.

Canada's principal import from the US has been draft dodgers. If we're lucky, frustrated Kerry voters will produce the next great wave of immigrants into places like Saskatoon.

OK, that's not true, but this is: "[A] long-term concern is the flow south to the US of professionals lured by higher pay, lower taxes, and the immense high-tech infrastructure."

Here's a good idea: Canada sends us its physicists and mathematicians (and maybe a shortstop who can hit a Major League slider), we send Canada ï¿½ Michael Moore.

A Canadian commentator on NPR earlier this week said Canadians were waiting to see what olive branch the President would be bringing. Canadians have so little contact with reality they believed President Bush was coming up there to apologize.

For what? Oh, maybe for allowing Canadians to quake and cower under the defense umbrella of the big, bad United States. The total expenditures for defense of the whole country of Canada in 2003 was about $9.8 Billion. The US number? About $400 Billion.

You're welcome.

In the run-up to the President's visit there were concerns that there might be violence among Canadians in protest. Yeah. Right. What's the first place you think of when you hear the word "protesters?" Kee-rekt: Canada.

Here's what the Toronto Globe & Mail said about the protests: "[They] were mostly peaceful, save for a small group that threw paint and burned a tire."

A TIRE! A, one, single, lone, solo, solitary. Oh, and they threw paint. Probably water-based. Canadians are nothing, if not tidy.

What's the national flower of Canada, the Pansy?

For his part, President Bush was typically gracious and funny. At one point he said, "I, frankly, felt like the reception we received on the way in from the airport was very warm and hospitable, and I want to thank the Canadian people who came out to wave - with all five fingers."

It was not immediately clear if the Canadians got it.

New topic: Modesty would normally prevent me from mentioning this, but this month's GQ Magazine - which used to be called "Gentleman's Quarterly" - is titled, "Men of the Year." There are articles about Tom Cruise and Dustin Hoffman, and a bunch of guys who need a shave posing in their underwear, and a small article about me.
Dear Mr. Mullings:
We're sorry. We could have sworn you used the word "modesty" in a context which included yourself. Did we imagine that, or has someone spiked our holiday eggnog? Eh?

Signed,
The Royal Canadian Society for Well-Deserved Self-Effacement

Yep. Yep. Yep. I'm afraid if I didn't mention this in Mullings I would lose my status as one of Washington's Five Most Exuberant Self-Promoters.

On the Secret Decoder Ring today: A typed version of the GQ piece, a perfectly ridiculous Mullfoto of the day, and a link to another of the Iraq Flashbacks.

Let me guess..they taught you that in the US school system, right? Or is that taught ONLY in Mississippi?

No money for teachers but an unlimited supply for bombs. That is one sick system.

There is absolutely nothing that you can do that will bother me in the least. Remember, you started this whole little war. It seems that you can dish it out but you can't take it. Bottom line, when you are ready to call it quits, I will stop replying to any posts you make.
Likewise, I expect the same from you.

Nothing wrong with most US citizens either. There are four rather backwards ones on this particular newsgroup, though.I wouldn't normally give a damn what another country's government does, but in this case the actions of a few morally decayed politicians in Washington affect MY country to a very large degree.

The bastards don't even keep to the terms they set up under NAFTA. Lies and thievery have become so ingrained in your political structure that it's become teh norm. Free trade is a joke and seems to benefit the US only..

Pierre Trudeau once said " Living next to the United States is a little like sleeping with an elephant. You always wonder if they will roll over on you."

Get your Corporations and their enforcers, the US military, to act in a civilized manner that doesn't affect us in a bad way and I'll NEVER post another 'Ugly American' type message.

Sadly, I get the feeling that it's way too late to turn things around.

mike

Btw, when you decide to send me snail mail I do hope you realize that
you will be breaking the law.

ANNOYING / OFFENSIVE / HARASSING SPEECH, PART 1 OF 3

Generally, free speech protects speech even when it's
annoying or offensive, and even when it's intended to annoy
or offend. Thus, if someone posts a newsgroup article
calling you names, just to tease you or get back at you, he's
largely immune from punishment.

There are a few possible exceptions:

1. ONE-TO-ONE COMMUNICATIONS: The government can
probably restrict people from sending one-to-one
communications -- for instance, direct e-mail -- to
people who've already said that they don't want to
hear from them. If I send you physical mail that
you dislike, you can essentially order me to take
you off my mailing list. If I keep sending things
to you, I can be punished.

This sort of order is a speech restriction, but the Court has
held that it's constitutional (in a case called Rowan v. Post
Office Department), because it doesn't interfere with my
ability to talk to others. Presumably Congress could enact a
similar law for e-mail.

Note, though, that this almost certainly applies only when I
can take you (and only you) off my mailing list. If I post
annoying messages to a newsgroup or a discussion list, and

you want to stop getting them, you can't order me to stop posting them. Such an order would interfere with my ability to talk to others, not just to you. (Of course if you own or moderate the mailing list, you can order me to stop posting annoying messages, under threat of banishment from the list.)

2. INTENTIONAL INFLICTION OF EMOTIONAL DISTRESS: In many states, one can sue a speaker for speech that intentionally inflicts emotional distress. The test is generally that the speech must be "outrageous," and must cause "severe" distress.

This sort of tort claim is extremely troublesome from a free speech perspective. Free speech generally protects even outrageous speech, even when it causes severe distress, and even if people think it's of no redeeming social value.

In fact, the Court has made clear that *public figures* can't bring intentional infliction of emotional distress claims based on speech unless the speech is otherwise unprotected (e.g., an intentional falsehood or a threat or some such). The rule for private figures is not clear, but there's at least a strong potential free speech defense even to those claims.

Rolling eyes and shaking head

They more than likely just chucked the defective unit anyway.

Unfortunately "made in China" is the norm BECAUSE most folks want the
cheapest product that they can find.

It is true.....you get what you pay for.....most of the time anyway.

For One and All,

I recently bought on eBay a "Sonora" Model RCU-208 6-Tube AM Radio
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=6554594788
with a near mint Walnut Ingraham Cabinet
http://i11.ebayimg.com/03/i/04/ba/9f/e1_0.JPG
15"W x 9"H x 8-1/2"D. Circa 1946
http://i7.ebayimg.com/02/i/04/bb/18/88_12_sb.JPG

NOTE - This eBay Seller "G.Army" really does
"Great Work" in Restoring Old Tube Radios
http://cgi3.ebay.com/ws/eBayISAPI.dll?ViewUserPage&userid=g.army

It now sets in the Cabin in Twain Harte, CA
and Yes - Looks Beautiful and Sounds Great ! ! !

Why the "Sonora" Radio ? ? ? because Twain Harte, CA
is just a few miles Up-the-Hill from "Sonora" CA.

Some Say: On A Clear Day You Can See Forever.
I BELIEVE: On A Clear Night . . .
You Can Hear Forever and Beyond, The BEYOND !

Remembering Days Gone By when . . .
Real Radios Glow in the Dark ! :o)
Oh "That Sound" of an Old Tube Radio !

relax and listen to the radio son . . .
yes daddy - memories of my father ~ RHF

The Cozy Cabin with Two Cats overlooking the
Twin Lakes with Three Geese on Sullivan Creek
in the Beautiful Village of Twain Harte, CA nestled
in the Magnificent Sierra Nevada Mountains just
North of Yosemite. => http://tinyurl.com/d4h7x

I learned how to cuss from my shemale friends over at the Shipwreck Lounge in Glendale. Toad should go to Bottoms Up at 2100 W Spresser Street in Taylorville and find some shemales of his own. They aren't called "Bottoms Up" for nothing, and Toad will find out why when he goes.

> a real classic. A beautiful rare unit. Radio dials in AM frequencies
> and Policeband...SW? frequencies.

The frequencies marked for the Police Band on this radio haven't been used for that purpose since the "Calling all cars" days. It's still useful, however, as the AM broadcast band has been expanded up to 1700 kc, and most people are in the range of an extended band broadcast transmitter.

This isn't a SW radio. The dial indicates both frequency and wavelength. 600 kc = 500 meters, 1000 kc = 300 meters, etc.

> An interesting audio item. Radio is
> in good condition but could use some restoration work.

"Unit powers up fine, but needs a proper 5y3 tube or suitable replacement for full functionality."

What's wrong with the 5Y3? How does this radio fall short of full fuctionality?

The Goebbels technique, also known as argumentum ad nauseam, is the
name given to a policy of repeating a lie until it is taken to be the
truth (see Big Lie). For example, when Goebbels took ownership of the
Der Angriff (The Assault) newspaper, he attacked Berlin Police
President Bernhard Weiss, calling him "Isidor" Weiss. To German ears,
Isidor is a name with strong Jewish connotations. Eventually the
public believed Isidor was Weiss' real given name and he became a
figure of ridicule. Goebbels also pioneered the use of broadcasting in
mass propaganda, promoting the distribution of inexpensive radio
receivers to the German public which ensured that millions of people
heard the output of the Reich's propaganda ministry while being unable
to receive news and other broadcasts from outside Germany. Meanwhile
his ministry busily broadcast Nazi propaganda around the world by
shortwave radio. Newsreels, movies and books were impossible to
publish without prior approval and censorship by Goebbels' ministry.
He is credited by most historians with developing many techniques of
modern propaganda.

There used to be another list that was generated by someone else, but I haven't seen it in a while. If I can remember to do so, I'll try to make it a monthly feature. It may well become the high point in my otherwise boring life.

If anyone wants to check out the Perl scripts in order to customize them, do a search on:

getnews, groupstats, News::Scan

These scripts will run on any platform with Perl installed.

The 'Big Lie' phrase was invented and used by the Hitler and the Nazis
to explain what the communists/Jews were doing to world opinion.

A year of solid 'Weapons of Mass Destruction' on every radio/tv station
in North America in the year preceding the attack on Islam shows some
think this technique works well. That has been the biggest lie
perpetrated in decades.

Degen isn't exporting the Degen DE1103, they are exporting the Kaito
DE1103. Dealers like Liypn are in-fact re-sellers with no apparent tie
to Degen.

> The
> consumer should be aware of this fact, but Liypn or other Ebay sellers

> and with a better warranty where shipping was not an issue for less.

I bought a Degen DE1103 from Liypn in November of 2004 and it has not
failed or even hiccupped once. Seller Liypn ran out of radios, but
kept me fully informed of the next shipment and even kicked in an extra
set of NIMH batts as compensation. I would do business with him again.

My radio from Liypn cost about $68.00 or so shipped to the US with his
seller extended warranty. How did you end up paying twice as much???

There are however several design problems noted below.

>
> As I didn't use the radio very much, the tuner issue didn't render its
> ugly face until near the end of the warranty period. I contacted the
> seller and I was reminded that I was responsible for shipping. Fair

I suspect there were more quality issues than a peeling sticker.

>

> proceeded to program my favourite local AM radio stations. The AM band
> has moderate distortion too.

Don't know the answer here. My late 2004 production DE1103 has
excellent audio from the tiny speaker and from the headphones on all
bands. I DX a Canadian oldies station on AM 740 and the sound is
delightful - not FM, but enjoyable.

There are some fundamental design errors however:
1. Numbering memories in hexadecimal severly limits the usefuless of
250+ memories. I can't even begin to guess at the reasoning behind
this choice....
2. Added to that is a flaw in the firmware that transfers the highest
FM frequency to the FM band when any AM frequency is selected from
memory and vice versa.
3. The horizontal keypad was a compromise to allow the analog LCD
display. It is difficult to use and is of limited usefulness.
4. The space used by the LCD analog display could have been used for
numerous useful features.
5. There is unneeded extra button to switch the single control from vfo
to volume control. One gets used to it but it is unneeded.

The DE1103 is a complicated radio that was not thoroughly tested by end
users before being placed in production. Still, for the money it
provides good listening performance.

I aint never lived in no trailer before.I live in a big old white wood frame house that has asbestos shingle siding and a big concrete front porch with four big tall square post on my front porch.I wish I was rich like Jed Clampet (The Beverly Hillbillies) and I could afford a big concrete swimming pool in my back yard and I would invite all the pretty (looks don't count,beauty is in the eye of the beholder) women in my neighborhood to come on over and go swimming,although I don't know how to swim,I am so fat,I would float like a cork.

A few years ago,I read about a certain brand name of electric coffee maker thingys (I don't remember the brand name) that some of them would short out and catch fire.There is a home in Florida and their Daimler Chrysler hybrid electric car in their garage was being recharged,the car caught fire and burnt most of their house down.

No, the biggest lie was the one your mama told when she said you were a nice
little boy.

Run along, little 'tard.

That's rich, from a fatass who can't even find the right ARES website,
not to mention the fucking imbecile who thinks one "operates" a
dictionary instead of reading one.

"FUCKUP Lee" <SLee@houston-hunks.com> geography idiot and imbecile
fucks up
as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6aa$1@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain?
It sure looks like the Marshall County ARES, and it even has a place to
send email."

Saggytits Lee steps on his own tiny dick when he tried to correct
somebody else's English use first by saying one "operates" a dictionary
instead of reading it, then uses "things" instead of "thinks" in
<jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

I suppose you could see if you could find some sort of report or
proceedings from the treaty meeting that set up the bands as they
are. Probably in the 1950s, but it could have been earlier.

I'd go with "just because". Or the common sense reason: if you can
radiate unlimited power...

Don't forget to roll up your shirt sleeves and be a fashion plate like brown is.I once saw a russky "cop" in Palm Beach,Florida.American cops don't roll their shirt sleeves up.Not here in Jackson,Mississippi anyway. www.jacksoncrime.org
I never roll up my shirts,(it's mostly always warm enough here to wear short sleeve shirts or go naked) I buy my shirts over there at the Goodwill store because I am always getting cigarette burn holes in them.It makes sense to me.

Source record: 47861

Hello Sky Captain,

Really, this is simply a matter of a) what type of radio you're looking for and b) how much you're willing to spend.

It seems to me that you've narrowed your search down to two excellent portable models, each a leader in its own niche. The '7600GR is easily the best of the compact travel-weight portables currently on offer, in my opinion. Its features/performance give it a clear edge over the various Kaito, Degen and whatever other low-cost Chinese models there are out there.

That said, the E1 seems to offer a lot that you're not going to find in a compact travel-weight portable. Sadly, as for radios currently in production, the E1 stands pretty much alone in the class of larger portables. The frame of reference for the E1 should be such venerable yet discontinued receivers as the Grundig Satellit 700 and Sony's ICF-2010 and ICF-SW77.

A note on the price of the E1 and radios in its class: While the '2010 retailed new for comparatively less ($350), the Sat 700 and the 'SW77 retailed at $479 and $469.99 respectively (toward the very end of its run, the 'SW77 was priced at 499.99 by Universal). The $499.95 price tag on the E1, therefore, really isn't as outrageous as some folk here might make it out to be, although it's easy to cast it that way because there is no other radio currently on offer in this class of portables. Actually, the price of the E1 is perfectly in line with this class/caliber of receiver.

What are you getting with the E1 that you wouldn't with the '7600GR? Well, in terms of performance-related features, you're getting three bandwidth filters, as opposed to one with the '7600' (quite a significant difference there). You're getting passband tuning with the E1: something that neither Sonys nor the Grundig offered. The sync detector on the E1 allows for double sideband, as well as synchronous selectable sideband. The E1 also features selectable AGC. You'll likely find the audio of the E1 is going to be a cut above that of the '7600'; and if you're a program listener, then you'll no doubt appreciate the fact that there are separate bass and treble controls on the E1. The E1 would further have advantage over the '7600' in terms of number of memories and the provision of alpha-numerics for memory labeling (for whatever that's worth to ya). The E1 provides a variable rate tuning knob, a nice large display.... etc., etc. Other specifications can be read elsewhere online.

Simply put, both the E1 and the '7600GR are excellent radios: the E1 a top-notch, fully featured larger-sized portable; the '7600GR a distinguished travel-weight portable.

For a travel-sized portable, I'd swear by the '7600GR, and on a recent trip overseas I lamented the fact that I had taken my Sangean '606AP rather than the '7600': the performance of the '7600' more than makes up for the small bit of extra weight/space. That said, having used the '2010 and 'SW77 for many years, I like the advantages afforded by the higher grade portables. For this reason, having sampled a friend's E1 for a few days, I fully intend to purchase one myself in the near future. I do a fair bit of road travel, outdoor excursions and the like. This class of radio is perfect for these sorts of outings, just as they're is a pleasure to use around the house. Sure, I can see why some folks, for whom portability is less of an issue or not an issue at all, might opt for pay a bit more and grab an R75 or some other tabletop model. That's all good and well. It's all matter of what ya need/want (and what you're willin' to pay).

All the best in makin' your selection!

junius

To the original poster: I don't have experience with either radio (I do own and really enjoy my Grundig Satellit 800, which is basically the precursor to the E1). There are good reviews of both models you're asking about at www.radiointel.com. I know both have gotten really good reviews. Obviously there is a bit of a price difference between the two models you're considering.

I won't go as far as most people on this board who immediately defer to Sony over anything by Grundig/Eton, though.

Roger doesn't live in a trailer, dumbass. Looks like Lloydie the Tool
Fellator Davies fucks up again!

TOOL FELLATOR
Vocal by Sade
Words and Music: Sade Adu and St. John and Lloyd's Owner

He whining like another girl
And smelling his own farts.
Placing stupid posts, mistake after mistake.
He's hated on seven continents.
Dalek dolls and stained underpants, high on pussy bud lite.
Heaven help him, when he falls.

He has no life, sad pizza boy.
He sucks them off with minimum waste and maximum joy.
Athens City lights and Llloyd'll suck you right.
When you require sexual desire for homosexual nights.

No place for beginners or sensitive hearts
When Lloyd blows you nothing is left to chance.
No place to be ending but somewhere to start.

No need to ask.
He's a tool fellator,
tool fellator,
tool fellator,
tool fellator.

Coast to coast, LA to Chicago, Lloyd'll suck any male.
Across the north and south, to Key Largo, Lloyd the cocksucking whale.

Face the facts, Lloyd's a mental case.
He shadow boxes and double posts,
Yet needs the asskickings.

No license to love, no girlfriend to hold.
Makes sniveling whines and is certainly owned.
His eyes are like a pig's but his stupidity is shown.

No need to ask.
He's a tool fellator,
tool fellator,
tool fellator,
tool fellator.

Coast to coast, LA to Chicago, Lloyd'll suck any male.
Across the north and south, to Key Largo, Lloyd's love for sale.

tool fellator,
tool fellator,
tool fellator,
tool fellator,
tool fellator...

Oh, my, you're lying out of your fat ass again. Show us all the
pictures of your house with the fucked up second floor and the mangled
antenna and tower out front, fatass.

<restore of what Saggytits waddled away from>

"FUCKUP Lee" <SLee@houston-hunks.com> geography idiot and imbecile
fucks up
as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6aa$1@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain?
It sure looks like the Marshall County ARES, and it even has a place to
send email."

Saggytits Lee steps on his own tiny dick when he tried to correct
somebody else's English use first by saying one "operates" a dictionary
instead of reading it, then uses "things" instead of "thinks" in
<jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his improper use of words by once again mangling the sentence in reply <gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

>
> Sky Captain

The E1 is the better receiver, but the 7600GR is far and away the best value. The 7600GR is also genuinely portable. I've traveled with mine and it was no big deal. I wouldn't want to travel with a radio the size of the E1, especially if we're talking about air travel.

If the E1 sold for $350, I'd say go for it. However, $500 is too much. If you can bring yourself to contemplate spending nearly $500 on a portable receiver, I'd encourage you to invest that money in a tabletop receiver. No portable is really worth $500, so put that money into a tabletop receiver that will give your better overall performance.

Good luck, whatever you decide.

Steve

Electrons flow from - to +.

A capacitor stores charge in an electrostatic field between 2 plates
separated by a dielectric. A capacitor passes AC but blocks DC. An
inductor stores charge in a magnetic field. An inductor passes DC but
blocks AC.

A diode passes DC in one direction only (cathode to anode).

Resonance is when the capacitive reactance and the inductive reactance
are equal.

Shit flows downhill.

TOOL FELLATOR
Vocal by Sade
Words and Music: Sade Adu and St. John and Lloyd's Owner

He whining like another girl
And smelling his own farts.
Placing stupid posts, mistake after mistake.
He's hated on seven continents.
Dalek dolls and stained underpants, high on pussy bud lite.
Heaven help him, when he falls.

He has no life, sad pizza boy.
He sucks them off with minimum waste and maximum joy.
Athens City lights and Llloyd'll suck you right.
When you require sexual desire for homosexual nights.

No place for beginners or sensitive hearts
When Lloyd blows you nothing is left to chance.
No place to be ending but somewhere to start.

No need to ask.
He's a tool fellator,
tool fellator,
tool fellator,
tool fellator.

Coast to coast, LA to Chicago, Lloyd'll suck any male.
Across the north and south, to Key Largo, Lloyd the cocksucking whale.

Face the facts, Lloyd's a mental case.
He shadow boxes and double posts,
Yet needs the asskickings.

No license to love, no girlfriend to hold.
Makes sniveling whines and is certainly owned.
His eyes are like a pig's but his stupidity is shown.

No need to ask.
He's a tool fellator,
tool fellator,
tool fellator,
tool fellator.

Coast to coast, LA to Chicago, Lloyd'll suck any male.
Across the north and south, to Key Largo, Lloyd's love for sale.

tool fellator,
tool fellator,
tool fellator,
tool fellator,
tool fellator...

You are in full denial. My good friend John is from Glendale, and he
sees Roger go into the Shipwreck all the time. It's on a dead end
street, so he knows when people come and go. He even knows about the
time you got shut off by the bartender for being a little too drunk.

Learn about the 12 steps before its too late.

You are in full denial. My good friend John is from Glendale, and he
sees Roger go into the Shipwreck all the time. It's on a dead end
street, so he knows when people come and go. He even knows about the
time you got shut off by the bartender for being a little too drunk.

Learn about the 12 steps before its too late.
>>

Your drinking cost you a marriage, Woger. It also resulted in more than a
few visits from the police and, ultimately, a court ordered therapy course.
Of COURSE you no longer drink. You can't, and it is because of the
anti-depressant medications you must take. We understand that, Wogie.
We'll say a prayer for ya'.

Actually the opposite is true RHF. Remember when I criticized Pastor Pete Peterbreath for being a racist and anti-semite when he announced that he was setting up a hurricane relief center for white Christians only? You accused me of being anti-Christian! What a goofball!

Now you're on my case for saying that stupid parody site isn't funny. What's up with that?

This NG is full of racists, sexists, and jingoists. And you never complain about them. Or put another way, you always pass up the opportunity to speak out against them.

You have to do what is best for you but if she isn't a shemale she could put conditions on everything the way that women do. Before you got back home for lunch the next day, she may have made you sign your soul away just for a little goombah. I learnt long ago to date shemales because they are mostly guileless. Not Lurlene, though. She is telling me that she is pregnant and that she will go to Chief Norman Stenger of the Glendale Police Department if I don't marry her. But I know she is lying. culaterhulin.

I am very skepitical of Eton products...I bought a E10 a while ago but returned it because there is no way a single conversion, no SSB radio should cost $150..This radio was so cheaply made that the tuner knob would keep coming off, and if you rotated the antenna on a angle it would cut into the plastic case...I only hope that eton has their act together with the new E1, because at $500 it better be worth it...

Cheering Terror

On the surface, the support offered to Islamist fanatics by Western intellectuals appears baffling: Those privileged to speak out in safety are cheering on men who would gladly cut their throats.

The reason goes back to the maxim that "the enemy of my enemy is my friend."

Flanking the international insurgency of Muslim extremists is a global insurgency of frustrated intellectuals. Western civilization's rise to power shamed the failed cultures of the Middle East, while America's exposure of communism and socialism as deadly, incompetent systems robbed the intelligentsia of its dearest fantasy.

Global intellectuals and Islamist terrorists share common enemies - the United States, Israel and the West in general. They're unified by a disdain for freedom, capitalism and democracy - especially the latter. Religious extremists and the international intelligentsia alike distrust the will of the people at the ballot box.

Islamist fanatics are willing to kill millions to fortify and purify their religion - just as intellectuals excused Stalin's purges and Mao's mass slaughters in the name of building communist utopias.

Whether the standards are taken from the Koran or the Politburo, there's always someone with an impure faith who needs killing.

Eventually, of course, the secret policemen or the terrorists come for the intellectuals, too. But the key to understanding intellectuals - defined as those who elevate theory over reality - is that they're unified only by causes, not by loyalty to each other. They'll rationalize away every name they betray to the state's murderers or their terrorist captors. And their egos are so enormous that they'll go into their death-cells believing it's all a mistake soon to be rectified.

The classic example of a post-modern intellectual is the anti-American Danish filmmaker Lars von Trier. He's never visited the United States and claims he doesn't want to. Von Trier doesn't really make films about America. He films his sickly fantasies of America. Reality doesn't interest him. It's America as the symbol of all evil that quickens his shrunken European soul.

Of course, other intellectuals adore his films.

After destroying their communist-socialist dream-world, perhaps the cruelest thing Americans have done to intellectuals is to ignore them when things get serious. Oh, America's latest Belgian critic may get a nice review in the New York Review of Books, but the average American refuses to get down on his or her knees to worship anyone who insists they're too brilliant for the rest of us to understand.

If they want our respect, people have to produce. And production means work. And that's the last thing you'll ever get from an intellectual. They may drone on about the workers of the world, but they sure don't want to become one.

Islamist terrorists at least have the courage of their convictions. They'll sacrifice their lives for their perverted faith. Anti-American intellectuals wouldn't sacrifice a tall latte to save a continent from genocide.

Yet, in its perverse way, the global insurgency of anti-American intellectuals may be more pernicious even than al Qaeda. We can fight the terrorists. But the international intelligentsia spreads its poison without fear of penalty. Thanks to us.

The tacit and active support our "thinkers" provide to religious thugs who practice blood sacrifice evokes the single word "irresponsible." It should be branded into their foreheads - backward, so they can read it in the mirror.

Let countless others die, if only the theory holds. Excuse genocide, if it frustrates Washington. Paint faith-maddened murderers as freedom fighters, if it somehow embarrasses America. Deny that the wretched of the earth might desire human rights and freedom. Betray the weak. And vilify anyone who takes America's side.

The problem with intellectuals is that they don't really think.

From the 1920s right through the 1980s, Communist regimes could count on smitten fellow-travelers for support. Few of Moscow's, Beijing's or Hanoi's defenders actually went there, of course, and fewer still stayed to help

build the workers' paradise. Physical evidence, no matter how grim, was a distraction to be avoided. Theories were always better than flesh and blood.

Now the lethal terrorists confronting civilization have managed to recruit their own legions of fellow travelers - without even trying. Bin Laden, Zawahiri, Zarqawi & Co. must be astonished by the support provided by Western intellectuals. Whether or not any god's on their side, The New York Times certainly is - just as it idealized Stalin's regime while millions of Ukrainians starved in a man-made famine.

We'll prevail against the terrorists. And after we've triumphed again, our domestic intellectuals and their foreign brethren will find new monsters to worship.

Hello,

Once again, I have compiled a 'universal' list of BBC World Service broadcast frequencies. This list should be of interest to SWLs who either travel frequently or who live in a region no longer targeted by BBC shortwave transmitters. This list was compiled directly from data posted on the BBC World Service web site (www.bbc.co.uk).

The list below is sorted by time (UTC). It contains no regional references - it is left to the reader to discover appropriate frequencies. As a universal list, I offer no comments as to signal quality. I downloaded the data from the BBC web site and manually transcribed it into a spreadsheet that I used to sort the data.

Please note the following:

1. The list is compiled by hand. The BBC does not post this information in this form on their web site. I think they should.

2. For pratical reasons, I have chosen a 1 hour granularity. Changes on the half or quarter hour are ignored.

3. The list ignores weekday/weekend designations.

4. Broadcasts on frequencies below the 90 Metre band are not included.

5. There are almost certainly errors in content, please accept my apologies. Please consider this merely as a guide to finding suitable frequencies.

I find this list very helpful, I hope some of you do too.

Good listening and good luck.

Dave, VE3TLY

It seems to work quite well against you as you can't seem to form a cogent argument against it.

JB

news:1131416266.891171.158340@g43g2000cwa.googlegroups.com...
> Hello,
>
> Once again, I have compiled a 'universal' list of BBC World Service
> broadcast frequencies. This list should be of interest to SWLs who
> either travel frequently or who live in a region no longer targeted by
> BBC shortwave transmitters. This list was compiled directly from data
> posted on the BBC World Service web site (www.bbc.co.uk).
>
> The list below is sorted by time (UTC). It contains no regional
> references - it is left to the reader to discover appropriate
> frequencies. As a universal list, I offer no comments as to signal
> quality. I downloaded the data from the BBC web site and manually
> transcribed it into a spreadsheet that I used to sort the data.
>
> Please note the following:
>
> 1. The list is compiled by hand. The BBC does not post this information
> in this form on their web site. I think they should.
>
> 2. For pratical reasons, I have chosen a 1 hour granularity. Changes
> on the half or quarter hour are ignored.
>
> 3. The list ignores weekday/weekend designations.
>
> 4. Broadcasts on frequencies below the 90 Metre band are not included.
>
> 5. There are almost certainly errors in content, please accept my
> apologies. Please consider this merely as a guide to finding suitable
> frequencies.
>
> I find this list very helpful, I hope some of you do too.
>
> Good listening and good luck.

Don't hear it at 1.5 to 1. If I had a tuner to get a better match hopefully
I could pick it up at 1.3 to 1 or less.

I own a big wooden Sailboat Pondboat too.It is very old and worth a lot of money.It isn't for sale though,I never get rid of my old things.I was next door a couple of hours ago and I asked the 37 year old Bell South woman what is the last name of that 30 year old woman? I think she said Fertheimer or Fhertheimer or something like that.

You're dumber than markie and toddie put together, and that's really
dumb, 2test wogie. First you say I don't have a pilots license, then you
make some half-witted claim that I must be K8RI, who according to his
web site, certainly has a pilots license. Guess your crack addled brain
just can't keep up can it? Poor 2test.

In that case,pick up the phone and call the Better Business Bureau.I am trying to find my two pairs of old climbing spikes.They strap on legs and each one has a steel spike on them.I own two pairs of them I bought at a pawn shop on Northwest Street about twenty years ago.One pair of them is for climbing poles,the other pair have longer spikes and are for climbing trees.I looked under my bed where I thought I had put them,they are not there.That means I am going to have to shift mountains of junk around in my house to find them.

D-Ex-Ace's inferior comprehension "skills" come up yet again. What part about the US not wanting to honour parts of NAFTA do you not understand? The terms were set and your sorry bloated corpse of a country decided not to honour parts of the agreement. But that's par for the course with the burning Bush at the helm; no brains, no guts and no honour!

Well,I am still trying to figure it out.The 37 year old single blonde Bell South woman next door was in her camper (1992 Dodge van with a factory made camper body made onto it) with her cigarette lighter,looking for something (seemed like she was in a hurry) and I asked her what is Vanessa's last name. (Vanessa,the sexy looking 30 year old brunette woman,she likes to wear a plain old tan colored baseball cap on her head most of the time) She said Fertheimer or Fherthimer (or something like that) and then she went back into her house.I started walking back to my house and I am pretty sure I saw Vanessa head for that side door of their house and I am pretty sure I heard Vanessa say something like,I don't see him.
Oh well,,,,,, whatever.

I could not agree with you more Bunkie !!!

We get the French daily evening TV news here on a local PBS
station and I have no respect at all for the French. All of them are
docile dickless sheep who don't even want their police to carry
anything more lethal than a tear gas launcher. IMHO they deserve to
have their fucked up pacified country eaten up by Islamic
terrorists. Heck, much of France was in control of damm Islamics
up until the12th Century AD, until the Catholics (Crusades) kicked
the Moslems asses back into North Africa. The only hope for France
is if JM LePen was ever re-elected as French PM. He is already on file
as stating that rioters should be shot on sight, to which he has
been criticized by the average French citizen as a "Hitler". How pathetic!

From: David <rickets@knac.com>
Message-ID: <n7c1n1dc9i8idqdr3gg7rail6o03tn3dr9@4ax.com>
Source record: 48119

Bush Administration Breaks Record
Administration Borrows more from Foreign Nations than Previous 42 Presidents Combined

Washington, D.C. - President George W. Bush and the current Administration have now borrowed more money from foreign governments and banks than the previous 42 U.S. presidents combined.

Throughout the first 224 years (1776-2000) of our nation's history, 42 U.S. presidents borrowed a combined $1.01 trillion from foreign governments and financial institutions according to the U.S. Treasury Department. In the past four years alone (2001-2005), the Bush Administration has borrowed a staggering $1.05 trillion.

"The seriousness of this rapid and increasing financial vulnerability of our country can hardly be overstated," said Rep. John Tanner (D-TN), a leader of the Blue Dog Coalition and member of the House Ways and Means Committee. "The financial mismanagement of our country by the Bush Administration should be of concern to all Americans, regardless of political persuasion."

The Blue Dogs have long expressed tremendous concern over mounting U.S. debt and are particularly troubled by our growing dependence on foreign governments to finance our debt. Earlier this year, the Coalition offered a 12 Step Plan to cure our nation's addiction to deficit spending. The Blue Dog plan required, among other things, that all federal agencies pass clean audits, a balanced budget, and the establishment of a rainy day fund to be used in the event of a natural disaster.

"No American political leadership has ever willfully and deliberately mortgaged our country to foreign interests in the manner we have witnessed over the past four years," continued Rep. Tanner. "If this recklessness is not stopped, I truly believe our economic freedom as American citizens is in great jeopardy."

http://www.opednews.com/articles/opedne_mary_sha_051106_bush_s_war_on_vetera.htm

Bush's War on Veterans

by Mary Shaw

On Friday, November 11, Americans will observe Veteran's Day.

This is a day set aside to honor our war veterans.

I cannot think of a more worthy purpose for a holiday.

Now let me guess:

This Veteran's Day, George W. Bush will strut his way into a specially choreographed photo opportunity and smirk and say some carefully crafted yet predictable and hollow-sounding words about how the American people appreciate the sacrifices that our veterans have made in the noble quest to defend freedom and democracy.

And he will be right.

We the people do appreciate the sacrifices that our veterans have made.

After all, our brave veterans made those sacrifices while Dubya's congressman dad pulled enough strings to get his boy out of harm's way and into the elite Texas Air National Guard to avoid Vietnam.

After all, our brave veterans made those sacrifices while Dick Cheney arranged for five separate deferrals because he had "other priorities".

After all, our brave veterans made those sacrifices while Congressman Tom DeLay managed to draw a high draft number and then orchestrate some convenient deferrals, while stating that he really wanted to serve, but that all the slots were taken by blacks and Hispanics.

After all, our brave veterans made those sacrifices while House Speaker Dennis Hastert avoided duty due to bad knees - the same knees that didn't stop his college wrestling career.

And so on.

OK, so these guys don't have what it takes to earn the title of veteran.

But they do seem to have what it takes to be hypocrites and punish those veterans who actually had the nerve to serve, while at the same time praising them for their selfless sacrifices.

Yes, these self-proclaimed "compassionate conservatives" are punishing our veterans.

Some examples:

Earlier this year, Republican leaders in Congress blocked $2 billion in emergency funding for veterans' health care from the $82 billion supplemental funding bill.

They felt that the money would be better spent in Iraq and Afghanistan, where we're producing more and more injured soldiers for whom we cannot afford adequate medical care.

Then the Bush administration requested a mere 2.7 percent increase in Veterans Affairs (VA) spending, even though the VA's Under Secretary testified last year that the VA health care system needs a 13 to 14 percent increase annually to maintain their current level of services.

Thousands of veterans of the first Gulf War are suffering the effects of exposure to depleted uranium (DU), or have died from that exposure, yet the U.S. government denies the effects and continues to ship DU munitions for use in Afghanistan and Iraq.

Some wounded U.S. soldiers have returned home from the current war in Iraq only to learn that they are being referred to credit agencies for "failure to pay" for lost equipment, and for charges for military housing.

And about one-fourth of all homeless Americans are veterans.

According to the National Coalition for Homeless Veterans, nearly 200,000 veterans are homeless on any given night.

Two percent of them are female.

Most of these cases are attributed to lingering effects of Post Traumatic Stress Disorder and substance abuse, compounded by a lack of family and social support networks.

This is how our government treats those who have so bravely fought for their country.

It's no wonder that the military recruiters are finding it so difficult to meet their quotas, even in the "red states".

The Bush administration would be wise to consider the words of George Washington, our first Commander-in-Chief, who said:

"The willingness with which our young people are likely to serve in any war, no matter how justified, shall be directly proportional to how they perceive the veterans of earlier wars were treated and appreciated by their nation."

Happy Veteran's Day.

Does anyone know if it is possible to set up Google Groups to filter out postings. You could "tell" it to not display postings by person A, person B, etc.

I like the information that many post here, but it is getting harder to sift through the muck.

Anyway, if there is a way to do this in Google Groups - I would appreciate knowing how

If it isn't, can anyone recommend a different news group reader that has this feature.

Thanks

Not necessary. The product is selling itself.

Just pointing out that the BBC and WRN are available for folks here
who can no longer get that programming as much as they'd like on HF.

You're attacks are getting a little stale.

They are nice radios which if in a good state of tune have a
wonderfully mellow sound and are passably sensitive to bigger stations.
But then the Panasonic RF-5000b from 1973 also had an incredibly
mellow and full sound too. And it was fully transistorized.

Germany's new frequencies, effective October 20, 2005, to North America are coming in poorly. Their morning frequencies (1400-1600 GMT) are 6075 (Germany), 9545 (Germany), 13780 (Ceylon), 15275 (Rwanda), 15335 (Germany), and 15445 (Bonaire/Sackville) and with only 15445 being audible on the west coast of North America. Their evening frequencies (0200-0400 GMT) are much better - 6075 (Germany), 6100 (Bonaire), 6145 (Germany), and 9875 (Rwanda).

Go to http://www.alphadeltacom.com/ and look for the alpha delta sloper.
I could have found the page for you, but you mention several other
things you may find info on at this site.

The Alpha Delta Sloper, as with most antennas, works well with most any
SW radio, not just the 320D.

It's not the "only way to go" but it is a very good antenna.

There is a difference in controlling a radio via computer and having to have the computer connected in order to use the radio. A number of very good stand alone radios can be controlled via computer. The 320D, as some others, is DEPENDENT upon the computer.

Here's to the state of Mississippi,
For Underneath her borders, the devil draws no lines,
If you drag her muddy river, nameless bodies you will find.
Whoa the fat trees of the forest have hid a thousand crimes,
The calender is lyin' when it reads the present time.
Whoa here's to the land you've torn out the heart of,
Mississippi find yourself another country to be part of!

Here's to the people of Mississippi
Who say the folks up north, they just don't understand
And they tremble in their shadows at the thunder of the Klan
The sweating of their souls can't wash the blood from off their hands
They smile and shrug their shoulders at the murder of a man
Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

Here's to the schools of Mississippi
Where they're teaching all the children that they don't have to care
All of rudiments of hatred are present everywhere
And every single classroom is a factory of despair
There's nobody learning such a foreign word as fair
Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

Here's to the cops of Mississippi
They're chewing their tobacco as they lock the prison door
Their bellies bounce inside them as they knock you to the floor
No they don't like taking prisoners in their private little war
Behind their broken badges there are murderers and more
Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

And, here's to the judges of Mississippi
Who wear the robe of honor as they crawl into the court
They're guarding all the bastions with their phony legal fort
Oh, justice is a stranger when the prisoners report
When the black man stands accused the trial is always short

Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

And here's to the government of Mississippi
In the swamp of their bureaucracy they're always bogging down
And criminals are posing as the mayors of the towns
They're hoping that no one sees the sights and hears the sounds
And the speeches of the governor are the ravings of a clown
Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

And here's to the laws of Mississippi
Congressmen will gather in a circus of delay
While the Constitution is drowning in an ocean of decay
Unwed mothers should be sterilized, I've even heard them say
Yes, corruption can be classic in the Mississippi way
Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

And here's to the churches of Mississippi
Where the cross, once made of silver, now is caked with rust
And the Sunday morning sermons pander to their lust
The fallen face of Jesus is choking in the dust
Heaven only knows in which God they can trust
Oh, here's to the land you've torn out the heart of
Mississippi find yourself another country to be part of

Phil Ochs

Wrong again, inferior one! There are plenty of Americans that I can count on as friends. It's just you and your brand of fascism that I can't tolerate. Fortunately, you're in the minority!

Or maybe Swish Beerbarrel meant to say he was PeeWee Herman's biggest fan? What is it with some of these military and ex-military types thinking that they can speak for everyone?

They probably didn't want to take a chance people would associate the
new radio with the with the old factory.

That and the fact that they've shown they WILL use another manufacturer
if needed puts them in a much better bargaining position when
negotiating the next pricing round.

Hopefully the Indian sets are so noticeably better that they will become
long term partners. It's always nicer buying stuff made in a
democratic country than made in a totalitarian fascist State.

China stopped being communist when the government adopted the Corporate
State.system of commerce.It's still a police state, but the politicos
are getting very wealthy.

I'm sure some of them wish they COULD speak for everyone.

This guy USED to talk to a lot of people, but he's been noticeable by
his absence lately. He was last seen in a dark movie theatre in Georgia,
buying popcorn for Cuhulin and Beerfart....

The 71a/e is vastly better than the 7700 in every way, except in audio quality. I've had a 71a for years and had a 7700 and 8800 too, for many years. Both Yaesu's have lousy filters and are missing the notch and passband tuning that the 71a/e (the difference is an easily removed diode on the 71e to enable full reception to 30 MHZ) has and are so useful. Make sure the 71 you are looking at has a PBT knob on the right side. If it doesn't, pass on it.

It depends on what you want to spend for a radio. Typically the R71a will be priced a few hundred dollars more than the Yaesu, but it is a better radio.

Both are older radios now, so be sure to check operation of all features including the display. If it was used by a smoker I would pass on the radio unless it was very cheap. On the FRG7700 make sure it has the optional memory unit. As previously mentioned make sure the R71a has a passband tuning control. A patent lawsuit over ownership of that control resulted in Icom selling that radio less the PBT control for a few years.

The ships also had radar, although at some point both radar units on the Fitzgerald were knocked out. The Anderson was in more or less constant contact by radio.

Discovery Channel ran their well done program on the sinking of the Edmund Fitzgerald not too long ago. As I remember it a shift in wind direction meant the ships were no longer protected by the coastline they were hugging for protection. The huge waves gradually flooded the heavily loaded ore ship, making it sit even lower in the water. A big wave probably did the ship in.

Yeah, well, what was kind of interesting in the Federation of American Scientist profile was the first paragraph:

"Bharat Electronics Ltd. (BEL) was established in 1954 to meet the Defence needs of the Government of India. Three units of BEL, located in Bangalore, Hyderabad & Ghaziabad, were included on the list of Indian entities that were subjected to US sanctions announced after the May 1998 nuclear tests. Added to the US sanctions, these units are also faced with passive sanctions from some European countries."

In any case, the U.S. sanctions against BEL were subsequently removed.

Welcome to the world of global manufacturing and trading. In this case whether the label says "Grundig" or "Eton" is really no indication of where it was made. At one time Grundig made radios first in Germany then in Portugal. The owners of the Grundig and Eton names now sell radios that were assembled in one or more locations with parts that come from all manner of countries.

This is nothing new. Those two giants of Japan, Seiko and Sony both make many of their products in off-shore locations with parts from suppliers in many countries. Take a good close look at the country of origin for many parts in your car - you might be surprised at how multinational your vehicle really is.

Is there a specific reason we should be concerned that "Eton" or "Grundig" radios are made in one or more of locations like: India, China, Singapore, Taiwan, Mexico, Brazil?

The Beeb does all their shortwave transmissions through a seperate
company. Last I knew, it was VT-Merlin Communications, but it's changed
names many times, recently. (VT stands for Vosper-Thorneycroft (sp?),
a longtime British Defense contractor).

Well, the "Manufactured in India" part is rather novel for a shortwave
set.

I had posted the original message simply because I found the company's
history interesting, not out as any commentary on global
manufacturing/trade.

In any case, it actually is reassuring that it's not being put together
by the Tecsun folks.

Why are products from India or China any more of a concern than cars
(or any other product) from Japan, Korea, Germany, Sweden or Mexico.
The Japanese showed the Americans and Germans how to make cars, cameras
and optics after WWII. Now it is time for someone else to step up as
the low price high quality producer.

I suppose, but I wouldn't give it much thought. If the China and India
combine into some sort of Asian Union then watch out, because it will
be a real economic force.

I don't know who actually designed the Eton E1 - it could have been
Tecsun or Degen I suppose. I believe that Tecsun is part of Degen and
that the Eton radios come from one or more of their factories. Whether
Degen/Tecsun farms out production to another company in India probably
isn't as important as the original design and quality control applied
during production.

Eton is probably like all the other US "import 'em and sell 'em"
consumer electronics "Brand"s. Every product in their line may
be made by a different factory.

And the reverse, every similar unit in a store may be made
by the same factory, despite what company's name is on the box.

One example I know of was the Koss CD/Cassette Boombox I had. The
same unit was available from Radio Shack, RCA, and several other
labels. Lurking in sci.electronics.repair a couple of years ago,
just about everybody's VCR from Sony down to Walmart trash was the
same Funai unit with a bit different packaging.

One check is to look at the FCC ID number that anything that has
a microcomputer in it has to have to show that it was tested for
radio interference. Often the importer won't bother to have their
own check done and will just leave the unit with the factory's
registry number.

Right, well, to jump in with some commentary now, it is a rather dismal state of affairs...how the market for portable shortwaves has been inundated with these cheap Chinese portables. All the Kchibos, Kaitos, jWins, whatever other uninspiring offerings are out there...

A real race for the bottom. Nowadays, it seems that competition among new offerings in this class of radio is, unfortunately, mostly on the basis of price, rather than quality/features. Amazing (perhaps not) that there are buyers for these substandard radios, many of which must have been designed for the domestic market in China, given their substandard performance and atrocious appearance.

Perhaps one or two of the Degens are marginally acceptable...I dunno. I do ideed miss the days not too long back when there was a relatively vibrant competition between Sony, Grundig, and Sangean (even Panasonic and Magnavox were in the mix)...and you could expect regular upgrades in your favorite line of radio...with true improvements in performance/features. The day the Sony ICF-SW7600GR is discontinued will indeed be a sad day...

Right, well, quality control was at the heart of my "better Bharat than Tecsun" comment. I don't think we need to go into Tecsun's problems in producing a quality Satellit 800. That went on for years...with constant threads in this forum on whether or not the 4th or 5th generation of the '800 had finally "worked out all the kinks", etc. It became quite meaningless in the end. I wouldn't want to be the guy looking to buy a used Satellit 800, that's for certain.

It's encouraging that with the manufacture of the E1, there seems to be, from what is coming out so far, consistently decent quality control applied.

I'm curious...why the preference for the YB-500? Are you a collector?
Reason I ask is that the ATS-909/DX-398 (and the YB-400/G4000A, for
that matter) is generally considered to give better performance...

The 800 was overhyped vaporware for a very long time. When it was
finally delivered the quality was poor especially considering the
price. Given the multiple failed deliveries I would fault Grundig/Eton
as much as the manufacturer. They appear to be little more than a
marketing and distribution company.

And yet the QC on more modestly priced radios like the Degen DE1103 and
several of it's stablemates is quite good in my experience, as is the
Tecsun PL500.

> will indeed be a sad day...

The problem isn't a lack of supply of good radios. The problem is that there is little demand for pricey shortwave radios because there are few serious shortwave hobbyists. The lack of demand caused Grundig (the real one), Panasonic, Sony, Kenwood, Yaesu, Icom to stop supplying the really interesting radios that we all enjoy.

Unfortunately the Sony 7600 is probably going to be cancelled in the near future.

What makes this charge so special is the amazing success it has enjoyed in getting itself established as a self-evident truth even though it has been refuted and discredited over and over again by evidence and argument alike. In this it resembles nothing so much as those animated cartoon characters who, after being flattened, blown up, or pushed over a cliff, always spring back to life with their bodies perfectly intact. Perhaps, like those cartoon characters, this allegation simply cannot be killed off, no matter what.

He states that this is false: This is the charge that George W. Bush misled us into an immoral and/or unnecessary war in Iraq by telling a series of lies that have now been definitively exposed.

But he never shows how the statement is false.

In reality all one has to do is go back through all the newspaper stories where Bush, Cheney and Rice just keep singing the same damn song about how they have indisputable evidence of WMD and a plan by Iraq to get weapons grade nuclear material. By now it should be clear that Bush invaded Iraq as a way of showing the Middle East that the U.S. was not to be messed with - playing the irrational junkyard dog.

Bush planned to go into Iraq in 1999 to prove to his Daddy that his
dick was bigger. These people should be isolated so they don't infect
the gene pool.

Glad you can read that guy's mind.

I think a hundred years from now historians will still be trying to
figure out why Bush invaded Iraq.

I'm not even sure Bush knows :-)

I thought Rove & Libby & Cheney cherry picked facts, went outside
normal intel
procedures, used uncorroborated rumors as fact, thought they would be
in and out in 6 weeks,
ignored the War College studies;
- in short, only listened to what they wanted to hear..

& wasn't Pat Robertson quoted as saying Little Bush thought " there
would be No US Casualties "
?
If someone says God speaks to them, are they lying or delusional

'

Grundig AG is neither involved with, nor do they acknowledge the 800.
And the Grundig to which you refer is actually Lextronix. Lextronix
bought the right to use the Grundig name in North America, later calling
themselves Grundig of North America, and Grundig USA, before being
acquired by Eton. It was Lextronix which commissioned the creation of
the 800.

And you are correct, they are a marketing and distribution company.
Lex was the North American distributor for products of Grundig AG.

Hadn't thought of that song in years, thanks for posting it. Makes me think of the old Woddie Guthrie song, The Sinking of the Rueben James. The sinkings were under different circumstances, but both songs commemorate a tragic loss of life.

Heaven forbid that I can read his mind. It is clear that there was no
justification for that invasion at the time.

Another less well founded but certainly possible rumor is that Saddam
shopped around for a contract on the Elder Bush's llife. Never went
anywhere, but the invasion was supposedly payback for the threat. I
hold with the junkyard dog theory myself. And the Plame business seems
to give some credence to it.

That's certainly convenient for Grundig AG. They sold the rights to
the Grundig name in a geographical area but refuse to acknowlege the
cheap radios the distributor puts the name on.

The reason they do not acknowledge the 800 is precisely because of
the poor quality. It's also the reason they did not let Lex market it as
a Grundig outside of North America. It was, according to one Grundig AG
designer I corresponded with, who was on the original German Satellit
team, "an embarrassment."

Lex also tried to slide it past EU regulations by declaring it CE
compliant, which is required for European marketing. They even had CE
stamped into the case. They did not submit Sat 800 for CE evaluation,

however, and the CE had to be removed from existing castings, and
remaining cases recast. As a counter move, Lex bought and distributed a
number of CE compliant power supplies with 800 models. Some 800's made
it overseas. None through legitimate channels.

I'm really amazed that Grundig AG so completely squandered the value of
that brand name in noth america. It was apparently sold with few
restrictions on it's use. I can only guess that the german Grundig was
hurting for cash at the time.

>

The move surprised a lot of people. But then, the relationship between Grundig AG and Lex had been very good, and very profitable for years. So Grundig had no reason to think that such a natural evolution would turn so far south. But Lex is a marketing company. And without a product line of their own, it had to be fairly clear that a third party product bearing the Grundig name wasn't going to be the equivalent of Grundig AG quality. Grundig AG may have been building offshore themselves, but design was their own and QC was carefully monitored. A third party would not have the same interests, nor the same focus. Products would be different. And it would be tough to compete with Grundig's reputation for Quality.

The use of the name was not unrestricted. But you know how corporate contracts can be interpreted. Every specification creates another loophole. And Lex, seeing cash at hand, exploited as many of them as they could.

And yes, Grundig was hurting at the time. Fresh off their screwing by Philips, they needed the cash to rebuild. Licensing the name on a line of products in the lucrative US market, where Grundig AG has never had a profound presence, would have to look like free money. And to be fair, Lex turned out a line of products that were marketed to both the Grundig aware, and those to whom the name was not a household word. And Lex' marketing was non pareil. They created demand in both the nostalgia and the non SW markets for a line of retro radios marketed as 'updates' of Grundig classics.

But the claims went beyone misleading. They even went so far as to claim they had found and hired the original designers and craftsmen, in their camera-ready ads, to faithfully recreate the hardwood cases of their retro products. This, despite the fact that their biggest retro product, the Classic 960 wasn't wood, but bakelite or catalin. With brass insert trim, not gold paint.

The electronics wern't any better. I ordered a Classic 960 and found the quality to be so bad, I returned it at once. Dial calibration was off by more than a megahertz. It drifted. The dial backlash was almost half a channel's width. They sent me a new one. The replacement was worse than the first, and the second replacement was worse than the first replacement. Build quality was criminal.

I"m not the only one who noticed this.

Not exactly the result Grundig AG had hoped for from this arrangement.

Grundig is currently under recovery in Germany. And a new product line is hitting the world market. Some significant innovations, too.

But the name, in the US, at least, has been tainted. And isn't likely to be revived soon.

Weapons Inspectors! LOL!!!!!!!!!!!!!!!!!!!!!!!!

Hi we're weapons inspectors. Could you show us your weapons of mass
destruction please. And when we get done here, we're all heading over to
Italy to ask all the nice Mob bosses to show us their books.
LMFAO!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

You people are the stupidest mother f--ckers on Earth. LOL!!!!!!!!!!!!!!

I suspected as much with the sale of the Grundig brand name in North America. Companies don't normally sell a valuable intangible asset like a brand name unless they have to. Without tight controls on its use consumers end up being at best confused if not intentionally misled.

Yes, it takes many decades to build up a brand image, but it can be lost so quickly. The name Gruding that I and many others once associated with expensive high quality sound equipment is now tied to the glitzy cheesy stuff that places like Sharper Image and ShopNBC peddle.

And then there's anything by Dylan, for authentic sounds of mass animal slaughter. Given my choice between the three, I'd opt instead for the beautiful word pictures and lithe harmonies of, say, the Trashmen in their ever-excellent Surfin' Bird.

Any time the "inspectors" "demanded" to see a place, they gave Iraq up to three weeks to clear the place out before inspection. The whole "inspection" act was a sham, and the "inspectors" got pissed when their little highly paid junket got cancelled and took it out on the guy who took away their candy.

What I've been saying all along. He didn't talk anything about Saddam, invasion or how much he wanted to free Iraqi's and give them the gift of Democracy. Yet, when we did nvade and no WMD were found, we all of a sudden gave it a political spin about how we care about Iraqi's. Bullshit, and Bush knows it. All these assholes that talk about Iraq's and freedom have all drank the kool-aid that Karl Rove served. Had 9/11 never happened, Iraqi's would still be living under Saddams reign and no one would have said two words to this day.

Dont know about the Trashmen, but if you ever get a chance to hear the
Woodie Guthrie "Grand Coulee Dam" sung by Cisco Houston, you might
enjoy it. Here's the words:

The Grand Coulee Dam (several versions)
(Woody Guthrie)

Now the world has sev - en won - ders that the
trav - 'llers al - ways tell, Some gar - dens and some
tow - ers, I guess you know them well. But
now the great-est won-der is in Un-cle Sam's fair
land. It's the King Co-lom-bia Riv-er and the
big Grand Cou-lee Dam.

She heads up the Canadian mountains where the rippling waters
glide,
Comes a rumbling down the canyon, to meet the salty tide,
Of the wide Pacific Ocean where the sun sets in the west,
And the big Grand Coulee country in the land I love best.

At the Umatilla Rapids, at The Dalles, and at Cascades,
Mighty men have carved a history of the sacrifices made,
In the thundering foaming waters of the big Celilo Falls,
In the big Grand Coulee country that I love best of all.

She winds down the granite canyon, and she bends across the lea,
Like a prancing dancing stallion down her seaway to the sea;
Cast your eyes upon the biggest thing yet built by human hands,

On the King Columbia River, it's the big Grand Coulee Dam.

In the misty crystal glitter of the wild and windward spray,
Men have fought the pounding waters, and met a wat'ry grave,
Well she tore their boats to splinters and she gave men dreams to dream,
Of the day the coulee Dam would cross that wild and wasted stream.

There at Bonneville on the river is a green and beautiful sight,
See the Bonneville Dam a rising in the sun so clear and white;
While the leaping salmon play along the ladder and the rocks,
There's a steamboat load of gasoline a-whistling in the locks.

Uncle Sam took up the challenge in the year of thirty-three,
For the farmer and the worker, and all of you and me,
He said roll along Columbia, you can ramble to the sea,
But river while you're rambling, you can do some work for me.

Now in Washington and Oregon you hear the fact'ries hum,
Making chrome and making manganese and light aluminum,
And the roaring flying fortress wings her way for Uncle Sam,
Spawned upon the King Columbia by the Big Grand Coulee Dam.

I'm sort of new to Swl and like the RDS these radios have. I understand
that the 909/398 are better, but I thought the yb500 would be more
afordable at this stage of the hobby.
Thanks,
brody

September 16, 2002: Baghdad announces that it will allow arms inspectors to return "without conditions." Iraqi and UN officials meet September 17 to discuss the logistical arrangements for the return of inspectors and announce that final arrangements will be made at a meeting scheduled for the end of the month. The United States contends that there is nothing to talk about and warns that the Iraqis are simply stalling. The Bush administration continues to press the Security Council to approve a new UN resolution calling for Iraq to give weapons inspectors unfettered access and authorizing the use of force if Iraq does not comply.

November 8, 2002: The UN Security Council adopts Resolution 1441. The resolution declares that Iraq "remains in material breach" of past resolutions and gives Iraq a "final opportunity to comply with its disarmament obligations" set out by Security Council resolutions stretching back to the end of the 1991 Persian Gulf War. It also strengthens UNMOVIC's and the International Atomic Energy Agency's (IAEA) powers to conduct inspections throughout Iraq, specifying that Iraq must allow "immediate, unimpeded, unconditional and unrestricted access" to "facilities, buildings, equipment, records, and means of transport which they wish to inspect." UN inspectors are given the authority to prohibit the movement of vehicles and aircraft around sites to be inspected and have the right to interview anyone they choose, without Iraqi officials present, in any location they wish. Additionally, the resolution overrides a 1998 memorandum of understanding between Baghdad and UN Secretary-General Annan that had placed special conditions on inspections of presidential sites to which Iraq had previously denied the inspectors access.

The resolution also warns that Iraq will face "serious consequences" if it fails to comply with its disarmament obligations.

November 13, 2002: Iraq accepts Resolution 1441 in a letter to Annan from Iraqi Foreign Minister Naji Sabr.

November 27, 2002: UNMOVIC and IAEA inspections begin.

December 7, 2002: Iraq submits its declaration "of all aspects of its [weapons of mass destruction] programmes" as required by Resolution 1441. The declaration is supposed to provide information about any prohibited weapons activity since UN inspectors left the country in 1998 and resolve outstanding questions about Iraq's weapons of mass destruction programs that had not been answered by 1998.

The resolution requires the declaration to be "currently accurate, full, and complete," but UNMOVIC and IAEA inspectors tell the UN Security Council on December 19 that the declaration contains little new information.

December 19, 2002: Following IAEA and UNMOVIC briefings to the UN Security Council, Secretary of State Colin Powell states that the Iraqi declaration contains a "pattern of systematicï¿½gaps" that constitute "another material breach" of Iraq's disarmament obligations.

2003
February 5, 2003: Powell briefs the Security Council in an effort to persuade members that Iraq is subverting the inspections process. He publicly presents intelligence for the first time to support Washington's claim that Iraq is hiding weapons of mass destruction and interfering with inspections. France, China, and Russia are not persuaded and support continued inspections.

February 24, 2003: The United States, United Kingdom, and Spain co-sponsor a new Security Council resolution saying "Iraq has failed to take the final opportunity afforded to it by Resolution 1441." The same day, Russia and France submit a memorandum stating that military force should be a "last resort" and that force should not yet be used because there is "no evidence" that Iraq possesses weapons of mass destruction. The memorandum also says, however, that "inspectionsï¿½cannot continue indefinitely. Iraq must disarm." It further adds that Baghdad's cooperation, although improving, is not "yet fully satisfactory."

The memorandum proposes that the inspectors submit a program of work that lists and clearly defines specific disarmament tasks. Such a report is already required under Resolution 1284, which created UNMOVIC in 1999.

The memorandum also suggests "further measures to strengthen inspections," including increasing staff and bolstering technical capabilities. Additionally, it proposes a new timeline mandating regular reporting to the Security Council about inspectors' progress, as well as a progress report to be submitted 120 days after the program of work is adopted.

Neither measure is adopted.

March 7, 2003: UNMOVIC Executive Chairman Hans Blix tells the Security Council that Iraq's cooperation with the inspectors in providing information about past weapons activities has improved, although Baghdad has not yet complied with its disarmament obligations. UNMOVIC and IAEA inspectors had stated during briefings to the Security Council on January 27 and February 14 that Iraq was gradually increasing its cooperation with the United Nations. Yet, both deemed the cooperation insufficient.

The United States, United Kingdom, and Spain co-sponsor another resolution stating that Iraq "will have failed" to comply with Resolution 1441 unless Baghdad cooperates with its disarmament obligations by March 17. The draft resolution implies that the council members would take military action if Iraq failed to meet the deadline.

March 17, 2003: After U.S.-led diplomatic efforts to build support for the new resolution fail, the United States decides not to seek a vote on it-a reversal of Bush's March 6 statement that the United States would push for a Security Council vote on the resolution, regardless of whether it was expected to pass.

Annan announces that UN weapons inspectors will be withdrawn from the country.

Bush announces that Hussein and his sons have 48 hours to leave Iraq or the United States will initiate military action.

March 18, 2003: UNMOVIC and IAEA inspectors leave Iraq.

The night air is heavy, no cool breezes blow.
The sounds of the voices are worried and low.
Desperately wondering and desperate to know,
About Goodman, Schwerner and Chaney.

Calm desperation and flickering hope,
Reality grapples like a hand on the throat.
For you live in the shadow of ten feet of rope,
If you're Goodman and Schwerner and Chaney.

The Pearl River was dragged and two bodies were found,
But it was a blind alley for both men were brown.
So they all shrugged their shoulders and the search it went on,
For Goodman and Schwerner and Chaney.

Pull out the dead bodies from the ooze of the dam.
Take the bodies to Jackson all accordin' to plan.
With the one broken body do the best that you can,
It's the body of young James Chaney.

The nation was outraged and shocked through and through.
Call J. Edgar Hoover. He'll know what to do.
For they've murdered two white men, and a colored boy too
Goodman and Schwerner and Chaney.

James Chaney your body exploded in pain,
And the beating they gave you is pounding my brain.
And they murdered much more with their dark bloody chains
And the body of pity lies bleeding.

The pot-bellied copper shook hands all around,
And joked with the rednecks who came into town
And they swore that the murderer soon would be found
And they laughed as they spat their tobacco.

When I was in Kindergarten, there were wild rumours circulating among the kids that their daddies were stealing their Slinkys for abnormal scientific experimentation.

naturally, I didn't put any credibility into these crazy rumours..I mean where does it end?

Next thing you know these kids would be telling tales of wires out of second floor windows and being woken in the middle of the night by beeping and screeching and weird voices coming out of the room where moms with headaches.make daddies go at night.

I wouldn't be so hard on him. The US military apparently put him through book keeping school. He hasn't used it to earn a living since he finished it. It's easier to live off the avails of doubtful insurance claims. his conscience bothers him though, so he's turned into an anti social cretin due to the internal struggle.

Sad, really...

mike

The FCC does what they want (or what the commercial interests want).

Concern for public interest is not something they have a lot of time
for.

IBOC and BPL are great examples.

You are right! It is very uncharitable of me to make so much fun of a shut-in like D-Ex-Ace. But I suspect that his neighbours prefer that he stays locked up. I really do hope that he gets the meds and attention that he needs.

Perhaps we can send Al Patrick to tend to D-Ex-Ace's troubled conscience?

A mind requires intelligence and that is something you have yet to demonstrate. A false pretense of knowledge is still an inferior response.

I don't take orders from enemies of liberty and democracy. You really are an enema of the state!

Now, you may go back to watching Jerry Springer re-runs and staring at Abu Ghraib photos.

It is a sad day when the FCC doesn't contact you personally for your opinion
on the use of the ISM bands.
Perhaps that is because the ISM bands have existed for a great many years,
possibly before you were born.
You should notifiy them of this grevious error and place yourself on future
planning commitees.

1370. AM/MW Antennas for the Eton E1 Radio to Improved AM/MW Reception

Newsgroup: rec.radio.shortwave
Date: 2005-11-10 10:11:19 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1131617479.386802.119690@g14g2000cwa.googlegroups.com>
Source record: 48367

Berylvijai,

AM/MW Antennas for the Eton E1 Radio to Improved AM/MW Reception
http://groups.yahoo.com/group/ETON-E1-XM-Radio/message/1744
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6444

All are WELCOME to Join the Eton E1 AM/FM Shortwave Receiver
with XM Satellite Radio Group on YAHOO !
ETON E1 => http://groups.yahoo.com/group/ETON-E1-XM-Radio/

Since the Eton E1 Radio does not have a built-in AM/MW Ferrite Rod
Antenna and uses the Whip Antenna for AM/MW Radio Reception.

1. The Easist Method of Improving AM/MW Reception is to
simply use one of the small commercial AM/MW Loop Antennas
that lend themselves to being inductively coupled to the
Radio's built-in AM/MW Ferrite Rod Antenna will not work
well with the Eton E1 Radio :
* Select-A-Tenna Model 541-M
* Terk AM Advantage
* RadioShack AM Loop Antenna
http://www.ccrane.com/antennas/am-antennas/index.aspx
However, you could try them using a 1/8" Mono-Plug and
short piece of twisted Speaker Wire directly connected
to the Radio's Exteral Antenna Jack with a PAL Connector.

READ - "HOW TO USE" a AM/MW Loop Antenna with a 'portable'
AM/FM Shortwave Radio

1371. Huge carrier 380 Hz off 660 Khz?

Newsgroup: rec.radio.shortwave
Date: 2005-11-10 10:43:21 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <43732450.3396@mindspring.com>
Source record: 48368
Cross-posted to: alt.radio.broadcasting,rec.radio.shortwave

There's some huge heterodyne 380 Hz off 660 KHz in Central Ohio
this morning (5:30am EST)

Any idea what it is, or where it comes from?

Seems to be from the East or West but I'm not sure yet, as I also
null the desired station WFAN 660 when I null the east.
--

It seems to be at 660.380 kHz (above rather than below 660)

I was not aware that the Marines used the same MOS numbers as the
Army.(11B)In fact I don't think they do.
Why would a Marine give a Army MOS # unless he is a wantabe.Lots of
those
around anymore.
Bill RVN May 69 to Dec 70/ 20th eng bgd.
****
Bill, i hadn't thought about that till you mentioned it. i'm in
W.PA., there was a news spot from up Erie way, about a young man
claiming to be a bird col. i guess he went around town with the
brass on his lapel. don't know for sure. one of the old-timers
from the local VFW called him out on it. back in my day, after nom,
the people who mouthed off the most, or wore the old jackets; most
never even served. our local Viet Nam Vet As, started asking for a
copy of your DD-214 before you got membership. i also remember the
Special Forces As complaining about a lot of wantabes.
i started this thread in the hope's of a little discussion on the
screwing of the vets are getting from the bush crime family. i had hoped
it would not turn into a flame / or BS mess. i never ask anyone to
love the vets, just show some respect for them. we have a Viet Nam
memorial, in Pittsburgh, by the sports statiums. beautiful spot
by the river. our vet group post a 24 hour guard every Veterans day.
it's an Honor to be chosen to do an hour there. all day and night
vets come and go. it's a lot of memories, alot of stories, and very
few dry eyes. SO, "A Happy Veterans Day", to all vets, where ever
you may be.

Drifter...

1387. fm pirate ?

Newsgroup: rec.radio.shortwave
Date: 2005-11-10 14:55:06 UTC
From: Henry Kolesnik <kolesnik@sbcglobal.net>
Message-ID: <ebJcf.15044$q%.5092@newssvr12.news.prodigy.com>
Source record: 48384

Last night while walking the dog in Tulsa, OK I was tuning my Sony Walkman SRF-49 and heard a weak station playing Great Balls of Fire by Jerry Lee Lewis. It was fading in and out but I persisted because I like the song. After I got home I found the station was on 102.9 using my Sony 2010 but it got swamped by more powerful nearby stations so 102.9 was not always listenable on the 2010, poor selectivity.. I was able to find the station on my GE Superradio and it came in much better. Then I tried my Yatch Boy 400, Sangean ATS 606A and Sony ICF-SW7600. The Yatch Boy was the best and the GE Super as good but its not as easy to find the exact frequency on its poor analog dial scale. The selectivity of the 7600 was so poor that I couldn't hear the station. While doing this I was waiting for the station to identify itself but it never did, however once the DJ mentioned Brookside, time and a phone number which I missed. (Brookside is a growing entertainment area in the suburbs of Tulsa), So I continued to listen while comparing all the radios concluding that the Yatch Boy was the best and the GE as good if you like analog. I never tried the Walkman but I should have and maybe I will later. After about 2 hours just before going to sleep he mentioned the phone number again and I called.
I got a Hello and nothing else so I said, "I'm listening to your radio station and would like to know the call letters"? He responded with, "Brookside" I asked if he was a pirate and he said no. He was just playing music from his house with a 1/2 watt transmitter which he said was legal. He mentioned the cross streets and I'm about 1.5 miles away but he also said he's had reports from about 4.5 miles. He claimed to be unemployed DJ and mentioned lots of stations and DJs that I didn't know. He said he did this to play music that he likes because very few stations do and I agree, commercial free is good but he only played a few pieces that I liked, the rest were just like everyone else and that's why I tune around during my walks. I asked where he got his transmitter and all he would say is that it was built from a New York mail order kit. When I asked about 102.9, he said it was the only clear freq he could find and prior to this operated at 90 something but got blown away. I asked if had many xtals and he said he was digital and had stereo. He had a ham help him set up and that had to be before 1993 as the ham, whom I knew was killed in a tornado that year. Excuse me if I'm rambling but I wanted to find out if what this guy was doing is legal? Two, I thought I'd point out the differences in the FM capabilities of a few radios and still have a couple more to check.

Sounds like a pirate. You're allowed to run 1/10th of a watt (100 mW) without a license and with certain antenna restrictions under Part 15 of the FCC rules.

I'm not sure of the status of the Micro FM stations these days. The idea was to license very low power stations to serve local communities. But the "real" broadcasters never liked the idea.

There was a pirate in my area in the '80s who ran 35 watts and a 50-ft high single bay antenna. His range was about 5-6 miles.

Huh? You guys have been watching TV news so long your brains have
atrophied. There are international bodies to do this sort of thing.
NATO, UN, INTERPOL,etc. The reason we fear them is because we too are
war criminals.

1405. South African "Pirate" Station Shut Down

Newsgroup: rec.radio.shortwave
Date: 2005-11-10 17:08:31 UTC
From: NewsGuy <NewsGuy2005@gmail.com>
Message-ID: <1131642511.308822.87810@f14g2000cwb.googlegroups.com>
Source record: 48252

Ah, yes... the wonders of Communist-run South Africa... continually deny a license to a White radio station and then shut it down because it is "operating illegally", all the time whining to the media that birthday and social announcements are a "racist" broadcast!

==========

"Racist" Radio Shut Down

http://antiracistlosers.blogspot.com/2005/11/racist-radio-shut-down.html

The Independent Communications Authority of South Africa (ICASA) has shut down and confiscated the broadcast equipment of the only radio station catering to Afrikaner people in the country.

Although the official reason for Klub100 being shut down is because it was broadcasting without a license, ICASA official Lydia de Souza whined incessently to Reuters and the ever-so politically correct BBC about the station broadcasting "racist" material. "The station was run by pirates," de Souza said.

What is considered "racist" broadcasting material remains unclear but because Klub100 was set up and run by and for White Afrikaners, the very nature of the station could be considered "racist" under the viciously anti-White regime ruling South Africa.

The station was set up in Orania, a haven for Afrikaners who took refuge in a disused settlement in the semi-arid Northern Cape in the hopes of making it the center of a Volkstaat (Afrikaner people's state). The Communist ANC-regime is attempting to destroy efforts to create an Afrikaner homeland through redistricting the area into a neighboring non-white district.

ICASA spokesman Sebastian Meyer said the regulatory commission was investigating charges that Club 100 was broadcasting political propoganda. "A resident laid a complaint because they say they are using propaganda language on the radio they were feeling very uncomfortable with. We're just going to do a further investigation on our side and a course of action will be announced within seven days," Meyer said.

Orania's management said Club 100 had repeatedly applied for a broadcast license and was merely holding tests, which consisted of birthday and social announcements, not political propoganda or "racist" comments. At no time was the station officially broadcasting, Orania management said in a statement, which also rejected the "racist" charges "because it is not the policy of the (Orania) management to

allow the broadcast of any racist or anti-government comments.".

Why is it you always seem to think folks watch too much TV? Are you projecting again, 'tard boy?

Thanks. That's basically what I thought. Also, some very mobile equipment which are not ISM equipment but use this band (e.g., laptops running some version of 802.11) could also interfere with critical communications in another country if ISM were not standardized. But, as you have pointed out, the ISM band was originally developed for the use of ISM equipment so they could be shipped and moved around the world. It seems to me the later use of this band by other equipment (e.g., mobile laptops) was done to capitalize on the fact that no license is needed to broadcast in this band and broadcasts will not interfere with other critical communications when moving from country to country.

Thanks,

Jeff

Half a watt and a mile or two of range won't get him into much trouble, but he's a fool giving out his phone number and location.

You can't say that without knowing the surrounding terrain. The pirate was somewhat below the altitude of the surrounding area. And I was giving the range for a typical listener, not neccessarily one with a good receiver and antenna.

Probably something very local. I heard something similar the other day while driving to work (I think I was listening to WFAN 660 as a matter of fact). After driving a couple of blocks the heterodyne faded out. The het I heard was a more like 1,000 Hz.

Did you look in a dictionary for the basic definitions? Even if the
dictionary doesn't give a technical explanation, it should help you
when adding the context of radio around it.

A heterodyne is when two frequencies are beat together, causing a third
frequency to be generated.

So when two stations are too close together, their carriers will beat
together to cause a beat note in your receiver. If one is at 1MHz, and
the other at 1.001MHz, then you get a 1KHz beat note. This is one reason
AM broadcast stations are 10KHz apart. It's high enough that it will
be out of hearing range for most people, and high enough that if it's
a bother one can filter it out without really bothering the actual
contents of the modulation.

The less structured a service is, the more likely the heterodynes. Listen
to CB when the band is open, and it's full of beat notes, because the
stations aren't all on the same frequency. (Amateur radio bands could
also be the case, but when single sideband replaced AM, the carriers
which are what beat together disappeared.)

A beat note sounds like an audio note, because it's the difference of
two higher frequencies. You'd only hear the audio beats, because of
the frequency response of the receiver, and your hearing range. They
won't sound exotice because they aren't. They may vary in amplitude,
if the stations that are causing the heterodyne are varying in amplitude.

If you've got a receiver with a BFO, turn it on while listening to an AM
station. You will hear the heterodyne, or beat note, of the BFO and
the station's carrier. Vary the BFO tuning, and the frequency of
the beat will change.

Tune to a CW (ie a code station) and turn on the BFO, and what originally
sounded like thumping or the on and off of noise, is now a tone. The
BFO heterodyned the keyed carrier down to an audio frequency, where
you can hear it.

A superheterodyne receiver, which must be what you are thinking of,
just extends this idea. It heterodynes the incoming signal to an
intermediate frequency, where it can better be amplified and filtered,
before going on to further stages of heterodyning, or the ultimate

detection to audio.

When one says 50' ''high'', I take it they mean ''above'' the average
surroundings. The typical listener has excellent equipment as long as
they have a car radio.

It's very important to point out that 2 different frequencies, when
mixed in a perfectly linear device, will not beat.

No, I didn't think to look in the dictionary. I just posted a radio
related topic to a radio related group.
Please accept my apology for my shortsightedness.
I apologize.
I appreciate your detailed explanation. That was nice of you to go to
the trouble.

Have a great day,

C-

>doing is legal?

Alas, no. The FM liscense free regs (47 CFR 15.239) limit the field
strength (250 uV/m @ 3 m) so the signal can only get 100 feet or so.
Feeding into the antenna equations, it comes out to something like
30 nanowatts.

Maybe the newsgroup would be better if you didn't spew nonsense.
If you know nothing of a topic, don't bother posting.

Virtually every shortwave receiver in production today, and for many a decade, is superheterodyne. They all convert the incoming signal down to a fixed frequency for selectivity and amplification.

The exceptions would be fairly obscure kits, using regeneration, or maybe some commercial amateur radio receivers or transceivers, using direct conversion (which heterodynes, the incoming signal directly down to audio).

You'd have to go back many decades before you hit a point where a large percentage of shortwave receivers were regenerative. Go back forty, and some would be regenerative, albeit they'd be at the low cost end of the spectrum. Go back to the thirties, and regeneration likely was still common, because superheterodyne designs used more components and hence were too costly for many in the depression era. Go back to the twenties, and besides cost there were still bugs (the issue of images for instance), and maybe even a reluctance to move to something new.

Once again, Howard Armstrong received the patent for the regenerative receiver in 1914, US patent number 1,113,149,

He received the patent for the superheterodyne receiver in 1920, US patent number 1,342,885.

And he received the patent for the superregenerative receiver in 1922, US patent number 1,424,065.

Howard Armstrong took care of all basic receiver design beyond the simple "crystal radio" and the TRF (Tuned Radio Frequency) receivers. And took care of that by 1922.

Everything that came later were variants of those three (or more like two, regen and superhet) basic concepts, incremental improvements but no fourth type of receiver.

Michael

> When one says 50' ''high'', I take it they mean ''above'' the average surroundings.

You assume too much. Most times when someone describes their antenna
height as "35 feet above ground" they mean 35 feet above the ground in
their back yard.

How high is your antenna? Have you calculated it's height above average
terrain (HAAT)?

> The typical listener has excellent equipment as long as they have a car radio.

Not with the typical car antenna a few feet above ground, and alongside
an 18 wheeler.

OK, I'll bite - why is this important in a world of radios that operate on the heterodyne basis? And what makes a linear device different? Are any commonly used radios linear devices?

Seriously!

Maybe so,but I have an Allied Radio catalog here,the 1941 Spring Summer issue of the catalog and many of the radio ads in the catalog (which I am looking at right now) do say things about Superhet (Superheterodyne) and S-P-R-E-A-D band tuning and Regen and super Magna Beam antennas.

Sometimes Cuhulin it is NOT who came up with invention first, but who patented it (if such were available) and who best promoted it and marketed it successfully.

Case in point
Marconi is credited with the invention of wireless (radio) 1895
and he was very good at promoting and marketing.

Others say it was Tesla.
By early 1895, Tesla was ready to transmit a signal 50 miles to West Point, New York see URL:
http://www.pbs.org/tesla/ll/ll_whoradio.html

But one Mahlon Loomis did a successful wireless experiment in 1868 before Marconi was born - 1874.
You can read about it at URL:
http://www.smecc.org/mhlon_loomis.htm

Few today have heard of Mahlon Loomis. Perhaps the world wasn't ready.

Yep,I see what you mean.There is an article at
www.globalnewsmatrix.com about,Patent issued for anti.gravity device.
The guy may have a patent for an anti-gravity device,but he certainly is
not the first to invent or "discover" such a device,not by a long shot.I
have some old Popular Mechanics and Popular Science magazines here and
some of the magazines date back to about 1911 or before.One of the
magazines which dates back to around 1911 has an article about a
radio/vacuum tube a guy invented and the article goes on to mention that
within a very short distance of the tube,there is a flux that could lead
to the invention of an anti-gravity device.There is a company near
Huntsville,Alabama which has also created anti-gravity techonology
devices and a few years ago,I read an article about Boeing Aircraft
company claims to have anti-gravity devices too.Anti-gravity can not be
invented though,devices that can take advantage of anti-gravity can and
have been invented.

On the FM band the FCC allows only 250 microvolts/meter at 3 meters. This
works out to about 10 microwatts. The 100mW figure is assumed by most
because that is what the old Part 15 walkie-talkies, and AM transmitters
were/are allowed. Part 15 allows different power levels on different bands
of frequencies... I believe up to a watt or two at lowfer frequencies.

1480. Am Station On USB Also ?

Hi,

Let's say I pick up a regular HF shortwave station on AM.

Should I also be able to hear this same station on USB ?

If so, what would the freq. "offset" that I should increase the tuned freq.
to ?

Should I expect the USB freq to be clearer, or... ?

Thanks,
B.

yes you can listen to AM on USB by slope detecting
the frequency would be 1.5khz higher than the AM frequency
the audio might sound clearer as the IF filters on USB would normally
be narrower than when on AM

Yes, and also on LSB.

> If so, what would the freq. "offset" that I should increase the tuned
> freq. to ?

No frequency offset. You should be able to zero beat the AM carrier at it's
exact frequency.

> Should I expect the USB freq to be clearer, or... ?

That depends on the stability of your receiver, and the quality of the
product detector for the SSB signals. It will often be a bit muddier because
the filters used for true SSB are narrower than those used for AM, thus less
high frequency audio.

Do you have any idea as to its bearing? A signal that strong should be easy
to DF.

The Japanese internment camps in America WERE a grand deal for them.So was it a grand deal for them when America Nuked Hiroshima and Nagasaki,that resulted in saving many more lives on both sides.

It was probably either E or W pretty close, just from taking a portable radio
outside and nulling the het without nulling WFAN (WFAN is also nearly east).

I'm sure I have a recording, ...

http://rhhardin.home.mindspring.com/het.ram (9 seconds at 5:28am)

It was startlingly strong, but then so is WFAN in Ohio.

I got rid of it with antenna null steering and 3 cascaded notch filters,
and didn't experiment much with the real equiptment after that; just a portable
radio in the yard while the recording went on inside.

My impression was that it faded later but I wasn't listening continuously to it.
Fading would suggest it's not local. If it's there Friday I'll try to record
it on its own (rather than suppressing it).

Should be able to zero beat right to the frequency. I think you are confusing
the use of 'slope detection' to copy an FM signal with an AM detector.

Who is Gordon Sims

Johnny: Gripping music, huh?
Mr Carlson: Yeah, that's good all right. What's the name of that orchestra?
Johnny: Pink Floyd.
Mr Carlson: Oooh, is that Pink Floyd? Do I hear dogs barking on that thing?
Johnny: I do.
Mr Carlson: What's really going on, Travis?
Andy: Nothing!
Mr Carlson: Well, I don't like it. It's too quiet.
Andy: D'you think the Indians are gonna attack?

Andy: You are the boss. You're the boss! And you do, uh, boss stuff.
Mr Carlson: Such as?
Andy: Well, you, uh, uh - well, then again you, uh - well, let me put it this way. Just knowing that you're in here, Boss, uh Boss, knowing that you're at the helm, gives us a lot of confidence.
Mr Carlson: Ah. That's not good enough. I sit in here all day, at the helm as you say, but I never get to steer the ship!

Mr Carlson: All it's gonna take is your complete co-operation, absolute secrecy, and twenty live turkeys.

Herb: When that farmer asked me what I wanted with twenty live turkeys, I had to do some pretty fast talking, let me tell you.
Les: What did you tell him?
Herb: I told him it was a secret.

Mr Carlson: At this particular point in time, I'd like to dictate a press release.
Jennifer: I don't take dictation.
Mr Carlson: What? All right, I guess I can do this thing myself. It's probably going to be a long meeting, so why don't you get coffee for all the guys here.
Jennifer: I don't get coffee, Mr Carlson, we agreed.
Mr Carlson: Oh, yeah.
Jennifer: You have to draw the line somewhere. Will there be anything else I can do?
Mr Carlson: No, I think that about does it.
Jennifer: Thank you.
Mr Carlson: Oh no, thank you.

Les: How does she get away with that?
Herb: Are you kidding?

Les: It's a helicopter, and it's coming this way. It's flying something behind it, I can't quite make it out, it's a large banner and it says, uh - Happy... Thaaaaanksss... giving! ... From... W.... ... K... ... R... ... P!!

Les: No parachutes yet. Can't be skydivers... I can't tell just yet what they are, but - Oh my God, Johnny, they're turkeys!! Johnny, can you get this? Oh, they're plunging to the earth right in front of our eyes! One just went through the windshield of a parked car! Oh, the humanity! The turkeys are hitting the ground like sacks of wet cement! Not since the Hindenberg tragedy has there been anything like this!

Johnny: Les? Are you there? Les isn't there. (composing himself) Thanks for that on-the-spot report, Les, and for those of you who just tuned in, the Pinedale Shopping Mall has just been bombed with live turkeys. Film at eleven.

Jennifer: But Mr Colly, a lot of turkeys don't make it through Thanksgiving!

Venus: Les! Are you okay?
Les: I don't know. A man and his two children tried to kill me. After the turkeys hit the pavement, the crowd kind of scattered, but some of them tried to attack me! I had to jam myself into a phone booth! Then Mr Carlson had the helicopter land in the middle of the parking lot. I guess he thought he could save the day by turning the rest of the turkeys loose. It gets pretty strange after that.
Andy: Les, c'mon now, tell us the rest.
Les: I really don't know how to describe it. It was like the turkeys mounted a counterattack! It was almost as if they were ...organized!!
Mr Carlson: As God is my witness, I thought turkeys could fly.

True slope detection can be used on FM signals not SSB

It is really Single SideBand - Suppressed Carrier

For SSB the carrier which was suppressed when transmitted has to be
re-inserted (function of a BFO), modern receivers with USB and LSB mode

selection will insert the carrier automatically.

Then with careful tuning in the USB mode on modern receivers -- it should sound very clear.

Also one can switch to LSB and get the same result

That is the intellegence is contained in BOTH the upper and lower sideband of an AM signal.

Try this -- go to WWV at 10MHz with receiver set to AM, then switch to USB, then LSB
With very careful tuning, the USB and LSB and AM signal will sound nearly the same depending on filtering.

No offset is required if you tuned "dead on" to the AM signal

CL

On some radios it works real well. On others, not so good. Unless
you have a true communications receiver the tuning steps are often too
crude to resove proper pitch. Makes music sound especially weird.
(Back to that non-linear active device again).

520 feet down, in two pieces with the taconite cargo strewn on the
lake floor between them. Ten years ago, the bell was brought up,
cleaned, and is now in a memorial display at Whitefish Point. A replica
bell was cast from bronze, inscribed with the names of the captain and
28 crewmembers, and lowered to the ships deck. It is a permanent
gravesight, and will not be disturbed - by law - from henceforth.

Tony

You can receive the AM signal on both USB and LSB. This is a good technique to remember as listening to one sideband is not so prone to selective fading or phase distortion of the carrier. It is also useful when trying to listen to AM stations 5KHz apart. Often you can tune to one or other of the sidebands and listen to a clear signal, while the other sideband is being interefered with by the adjacent station.

The sideband filter usually has a narrower bandwidth. This is not a hi fi method, but it is excellent for identifying weaker signals.

Some stations do transmit on SSB only. AFRS is on 10320khz from Hawaii in my afternoons, with a very strong USB signal.

Brad.

Basically, it's when your radio receives radio waves they travel through the tuned circuits of the RF deck or front end and depending how you have the dial set a specific frequency will emerge and travel into the mixer section of your radio and combine with the locally generated frequency to produce a new frequency that is more stable and it is equal to the sum or difference of the two. Simply to combine two frequencies to create a new frequency. The superhetrodyne is the basis for all modern receiver designs and uses this technique.

An AM signal consists of two sidebands, upper and lower, which are mirror
images of each other, and a carrier (a constant level signal) right in
the middle of the two sidebands.

A single sideband transmitter removes one of the sidebands before the
signal leaves the transmitter. Usually, it removes the carrier too, though
there are some specific cases where they send the carrier along.

If you tune the AM signal with a sideband receiver, then you are
removing the redundant sideband in the receiver. The narrow filter will
slice off the unwanted sideband. And usually, you
also knock out the carrier, which in effect gives you a single sideband
signal with no carrier inside the receiver. The rest of the receiver thinks
it is an SSB signal, the same as if that's what had been sent by the
transmitter.

But since two sidebands with exactly the same content were sent, you can
switch the receiver between upper and lower sideband, selecting whichever of
the two sidebands is in better shape. If the receiver was taking in the
full AM signal, if one of the sidebands had interference, you'd hear it
and be unable to do anything about it.

Hey Michael. You know that the military used some TRF designed radios because they didnt radiate RF and thus couldnt be found by the Axis. The RAK-6 equipment like the CRV-46155 etc. were TRFs durring WWII

Oh wow didn't realize that application for a TRF - thanks B.H.
As a kid in the 30's, my folks had a TRF set - wow was it ever sensitive.

Later it was given to me when I knew something about alignments
It was a bear to align

An aside -- snooper trucks used to roam around areas listening to the Local
Oscillator signals coming out of TV sets -- to determine how many were
watching what channel

Also true for the early days of HBO type channels in the microwave region as
folks were building receivers to bootleg the movies.
--

Superheterodyne Radios (I can't help laughing as I am typing this and my doggy is looking at me as though she thinks I have gone crazy) are Straight radios and XM and Sirius are "funny radios".By the way,that 30 year old brunette woman next door to me caught another one of that woman's cats in that Litiz animal trap cage this afternoon.It is that same cat that likes to jump up on top of my window unit airconditioner and make my doggy go crazy when my doggy would see that cat through my dining room window up there on top of my window unit airconditioner.That d..n cat will be history tomorrow at the animal shelter on South Street a mile and a half North of me.(Call p.e.t.a.!) Yeah,Vanessa (the brunette woman and that 37 year old blonde Bell South woman (Julie,the Bell South woman is in Natchez since yesterday and will be back Sunday,an old timey Tomahawk throwing and Muskets shooting rendevouz thingy going on over there,she won a free Musket a couple of weeks ago) are doing what I have been wanting to do for years,,, catching them filthy cats and hauling them off to the gas chamber.

Poppa Um Mau Mau....

1520. Trade HF transceiver for Kenwood R-5000 shortwave rcvr

Newsgroup: rec.radio.shortwave
Date: 2005-11-11 03:02:43 UTC
From: "Manytrails@sbcglobal.net" <Manytrails@sbcglobal.net>

Source record: 48421

I have a near mint Cubic 102BXA HF transceiver and matching speaker/power supply that I would trade for a like condition R-5000 Kenwood shortwave receiver. The Cubic works perfectly, and is in excellent cosmetic and electrical condition. You may read about this fine rig here:

http://www.eham.net/reviews/detail/798

This transceiver was built to military standards, as Cubic provided the U.S. Military with a lot of equipment during this period. The build quality is excellent, and reliability is very good. A unique basspand tuning system makes this rig a great performer on both SSB and CW. Take a look at the actual radio here:

www.members.aol.com/mgaluvr/cubic102bxa

This unit comes boxed in two cartons, one for the transceiver and the other for the power supply/speaker, with heavy protective foam, original instruction manual, and power cord. Microphone is not included, but will work with practically any standard type high impedence mike. Guaranteed not to be DOA...this transceiver is fully operational and very nice. Take a look at the photo....additional info upon request...just email me. I am not interested in selling this rig...a trade is preferred. Thanks....Bill

1521. Harris rf-550 on ebay

Newsgroup: rec.radio.shortwave
Date: 2005-11-11 03:04:05 UTC
From: "Mark S. Holden" <mark@bmas.org>
Message-ID: <x-WdnaUrxdknlOneRVn-rg@adelphia.com>
Source record: 48419

Hi

There's a Harris RF-550 on ebay - it doesn't have the RF-583 tuning option so it won't be a great band scanner, but it should still be a great performer and deliver super audio.

These included AFC and coherent AGC. AFC on this radio is a sync detector. Coherent AGC takes the AGC reading through a narrower filter than you're listening with, and doesn't get confused by things like lightning in the distance.

And it includes a manual.

<
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5828392879&rd=1&sspagename=STRK%3AMESE%3AIT&rd=1
>

The seller has mis listed the ssb filter - a 3.2khz filter is automatically selected when you put it into sideband or ISB mode.

are
> war criminals.

NATO is a military alliance, of which we are
a part. A portion of NATO took place in this
operation. INTERPOL is a police consortium, which
has about as much authority to arrest Sadam
Hussein for war crimes as it does Bill Clinton
for bombing Iraq in 1998. The UN is a forum
for discussion, which is great if you don't mind
discussing things such was the OIC or the UNHCR,
but sucks if there's an issue like the genocide in
Rwanda, because all it takes is one veto to eliminate
any hope of action out of the Security Council.

Something tells me that groups like Feed The
Children aren't going to be successful in promoting
justice in areas where there is no concern about justice
and there is no political will to do anything about
it. To effect change, you need political will, backed
up by something that can implement that will.
Simply saying that there are already ways of dealing
with issues beyond our borders so we as a country
shouldn't bother dealing with it is paramount to
sticking your head in the sand.

Ummm....I really hate to say this but the Marine Corps doesn't have
any 11 Bushbeaters (11B) Infantrymen. 11B is the Army MOS designation for
Infantry. The Corps calls their Infantry MOS 0311's.

> Michael
>
Strictly speaking both the "AM" signal and the "SSB" signal are AM (Amplitude Modulation). The common usage of the term "AM" (other than referring to the MW broadcast band in North America) means DSB-AM (Double Side Band Amplitude Modulation) with carrier. Likewise, "SSB" commonly means SSBSC-AM (Single Side Band Suppressed Carrier Amplitude Modulation). There is also DSBSC-AM (DSB suppressed carrier is pretty rare on hf but used for the L-R channel in the multiplex for FM stereo and also written as DSSC) and SSB with carrier (not sure of the mnemonic). Between full carrier and suppressed or nearly zero carrier is the reduced carrier mode, i.e., DSBRC and SSBRC. The Canadian time signal transmissions on 3330 and 7330? kHz are USBRC-AM (Upper Side....).

To answer "what would the freq. "offset" that I should increase the tuned freq.?" depends on your receiver design and, in some cases, settings that you make. For example, my DX-394 (correctly aligned and tuned to the station's frequency) needs no retuning to switch between AM (DSB), LSB and USB modes. That's because the microcontroller behind the front panel controls makes the necessary shifts in the 1st and 2nd Local Oscillators and the selection or not of one of two Beat Frequency Oscillator frequencies. This is not true of simpler receiver designs.

Simpler radios may have a variable BFO and no automatic tuning. In this case, you would tune higher than the station's frequency by approximately 1/2 the passbandwidth of your IF filter to suppress the lower sideband and adjust the BFO frequency until the beat note from the carrier was near zero frequency at which the pitch of speech and music should sound right with least distortion. To select the lower sideband, you would tune lower than station freq by the same amount and readjust the BFO.

My Kaito-Degen 1103 lies between the simpler radio and the DX-394. While microprocessor controlled, it does no auto tuning in SSB mode and provides no direct selection of Lower and Upper sidebands. While it has a pretty decent (for a cheap radio) narrow filter (narrower than the DX-394's!), when the radio is tuned to display the station frequency, that filter is centred on the carrier and equal amounts are passed from both sidebands. The BFO is adjustable over a range slightly larger than +/-1kHz and the main tuning tunes in 1 kHz steps so you can get some sideband suppression by tuning 1 kHz higher or lower and adjusting the BFO for zero beat/clearest signal. Off-tuning by 2kHz would be a better fit to the filter but is beyond the range of the BFO. Were it to have that range on such a small control, it would be twice as hard as the already touchiness to get close to zero beat. The DX-394 does not have an adjustable BFO; without modification, it can be off zero beat by a few tens of Hz.

Receiving a DSB-AM signal with the radio in SSB mode is also known as ECSS, Exalted Carrier Selectable Sideband, and can be advantageous in reducing the effects of fading, as well as interference in the suppressed sideband. But it requires a continuously variable BFO with stable transmitter frequency and receiver oscillators to attain near zero beat for best enjoyment. That

leads to automatic means of zero beating - and that's a whole other topic called Sync-AM (or Synch-AM) - join http://groups.yahoo.com/group/Synch_AM/ for more.

Tom

This is SCARY SHIT folks !!

Quoting from the above link:

"Among a fringe community of paranoids, aluminum helmets (tinfoil hats)
serve
as the protective measure of choice against invasive radio signals. We
investigate
the efficacy of three aluminum helmet designs on a sample group of four
individuals. Using a $250,000 network analyser, we find that although on
average all helmets attenuate invasive radio frequencies in either
directions (either emanating from an outside source, or emanating from
the cranium of the subject), certain frequencies are in fact greatly
amplified.
These amplified frequencies coincide with radio bands reserved for
government use according to the Federal Communication Commission (FCC).
Statistical evidence suggests the use of helmets may in fact enhance
the government's invasive abilities. We theorize that the government
may in fact have started the helmet craze for this reason..."

Jeebzus-H-Christ on a kaiser roll with cream cheeze folks !!!!
Perhaps the loons on domestic short-wave radio who have
been selling those grossly overpriced questionable gold coins, dollar
store LED keychain lights for $49.95 as "Berkie Illuminators"
and colloidal silver south pole magnetic piss-water as magic
curatives for baldness.....were right all along!

(Alex Jones must be whacking off like a chimpanzee with a bunch of
bananas in a glass cage at the Cleveland zoo right now.....)

Pretty good eh? I told you Beerfart pretends to kill file people but
doesn't. He didn't even last a week before he lost control of himself.
Beerfart can't do what his mouth says.

he also claims to be impervious to put downs..a real tough guy..but in
the background he posts multiple letters to people's internet providers,
claiming their clients are making illegal and unlawful postings. What a
low life lying scum bag and fraud.

I'm now on my third non existent 'kill filed for eternity' trek.

==========
Oddly enough, this famous WKRP episode was loosely based on a real event! Back in 1946 (some sources say 1945), Yellville, Arkansas inaugurated the ï¿½Turkey Trot Festivalï¿½ which included a wild turkey calling contest, a turkey target shoot, a Miss Drumsticks Pageant and oh yeah: a live turkey release from the roof of the courthouse. After a few years, someone thought it might be fun to actually toss the poor gobblers out of a low-flying airplane for the event. This repeated for a number of years until 1989 when a national animal-rights protest cast the event in a bad light and the "National Enquirer" splashed a photo of the event across the nation forcing promoters to abandon the turkey drop.

Nope, nearly all radios by the early 1930's were superhet.

Out of the mixer (sometimes referred to as the converter or 1st
detector) will be four frequencies. The fundemental frequency the set is
tuned to, the local oscillator frequency, and the sum and difference of
the two.

1560. Re: Am Station On USB Also ?

I think you are making this a bit more complicated than necessary. The
easiest way to keep track of AM and DSB is to look at the signal flow
diagrams. If you feed an audio signal with a DC offset into a mixer,
you get AM. If there is no DC offset, you get DSB.

It is common knowledge that governments have burried underground
transmission stations.
These beam up in the microwave range, and the hats focus (like a dish)
the radiation in the brain.

The recommended solution is to glue the hat on, and walk on your hands,
upside down.

I seem to recall Reagan being mercilessly pummeled
by people for his bad movies, his lack of intelligence,
his lack of control at the wheel, and his (seemingly)
overwhelming desire to go kick some Communist
ass that would drag us into WWIII. He was heckled
for being a talking head who occasionally misspoke
("We will begin the bombing in 10 minutes"), and
he was despised in the Hollywood community much
like Charlton Heston is today.

The difference between then and now is that we
can now see Reagan in the big picture, and we can see
his impact better than what we could see at that
time.

I, for one, am not going to compare the current
president to a previous one trying to figure out
who's better, because we don't have the benefit
of history yet. Now, as for a personal opinion of
the president, that's a different story; anyone can
have an opinion of the president, whether it's that
he's been abducted by aliens or he's the apex of
civilization (and everywhere in between).

380 Hz would seem to rule out any BC station. Sounds like what someone might do in my immediate neighborhood when I was in HS over 40 years ago - Putting 500 W AM on 840 into an end-fed 200 ft antenna and wiping out WHAS reception in Milwaukee. Could be a pirate w/o any programming. A little power goes a long way on 660.

QSB could occur when a low horizontal antenna with high vertical angles of radiation clash with the ground wave. So the source might be fairly close. Especially near dawn or sunset.

Americans to the Bush GOP . . . This is What We Think

MS. SMITH GOES TO WASHINGTON
by Shirley Smith

Congratulations to Democrats and also to those Republicans who voted with
the Democrats and who also want our Democracy back. Even if this treasonous
Bush GOP doesn't care what Americans think, they got a good dose of it
yesterday, anyway. The Bush GOP have a whole year to try and turn things
around in 2006. Two things the Democrats will have to watch out for and that
will be more "election fraud and campaign fraud." I hope the Democrats
around the Nation don't relax, because we will see more lies by Bush, and,
while he is lying, he will be turning the screws even tighter on Americans .
. . just like he and his GOP followers have been doing here at home and
around the world, especially in Iraq.

We can see how the Bush GOP think just by looking at Iraq. If they could get
away with that in America, they probably would give it a try . . . well, we
saw the heart of the Bush GOP in New Orleans. The Bush GOP thinks that the
military should be the resolution of everything. The Bush GOP thinks that if
they kill and punish and torture in Iraq, they will finally win the hearts
and minds of the Iraqi people by force. And, when the Iraqi people fight
back, they turn the killing of innocent people up a notch, such as what the
US did in Fallujah . . . but they will never "control" the hearts and minds
of the Iraqi people by killing and torturing them . . . that same behavior
has been experienced by the Iraqis from Saddam, and now from the occupying
terrorists who are also fighting the US and killing our soldiers.

They only have laid the groundwork for terrorists to move into Iraq . . .
those types who have much in common with the Bush GOP, who also are

killing
Americans and Iraqis. Yet, to hear Bush talk, he never mentions those terrorists who have moved into Iraq . . . they are referred to as "insurgents." It doesn't seem to matter who gets in front of US military power . . . a terrorist or an innocent Iraqi. The Bush GOP thinks that these
people will kneel to their power and eventually control these terrorists.
They forgot to take a good look at themselves in the process . . . whose controlling them?

California, I love you, and I am so proud of all of those people behind the
scenes who worked very hard and who stood up for what is right for them (Democrats and Republicans) and didn't allow the punishment of Arnold's ballot measures to win. Cynical Bush GOP tactics, in that Californians were
being put down by these propositions on the ballot and also having to pay
for them because they have a governor who doesn't listen to the people in
the same way the Bush GOP doesn't care to listen to the people or even those
who represent the people here in the US.

That's the treasonous Bush GOP in bright red letters that spell "Danger to
Democracy." Abuse of power and winning, any which way they can. It will come
as a surprise to me, if Arnold takes this lying down . . . he has the same
stubbornness or closed mind (I don't care what you think) that the Bush GOP
have when they put their ideas in front of the American people. He also has
the same drive for constantly campaigning for money so that he can push his
initiatives down Californians' throats.

But, these Democratic election wins will not cause the Bush GOP to care all
of a sudden what Americans want their country to be about . . . they will
probably go on lying to the faces of Americans and doing what they want behind the scenes. People should look for the same election fraud that has
happened in the past and be aware of any new tricks. Dishonesty will not be
discarded by this treasonous and corrupt Bush GOP . . . it will only become
more disguised.

I feel refreshed and renewed by this news today . . . like just coming
from
a brisk walk around this country. I'm sorry the gays lost their
initiative,
something I don't even think should have to be voted on, because, in my
mind, it comes with the Constitution and civil rights. But, it hasn't
been
that long ago when people could get killed just for "wanting" to marry
someone of a different color . . . so, hang in there.

Maybe it's not too late to save this country from the dictatorship of
the
treasonous Bush GOP, who was supposed to be working for the American
people,
instead of for themselves, and bring accountability back into US
democracy.

With fraud-proof elections, the power will always be with the people and
that is where it should be and when we save ourselves first (Democracy)
. .
. we can begin to look forward to enhancing other people's lives in this
wealthy nation instead of watching them become abused and punished and
some
even die early deaths due to that governmental punishment . . .

. . . that punishment includes illegal and treasonous invasions, and
saving
the lives of our military people by preventing any more illegal wars of
death and destruction might help to gain back some of the respect that
this
Nation has lost over the years, especially during these last four years.
This election tells us Americans that hope and our democracy are still
alive
. . . but, they not out of danger yet.

Thanks,

Shirley Smith

You'd think that God would protect our soldiers in the war against evil.
Maybe God was on his coffee break when over 2000 of our boys died there.

Just a thought about the R-5000: when I look at archives from rrsw about the '5000 I see many people commenting about it being a good receiver but "old technology." Except for lack of synch detection (which can be added through an SE-3) and any type of DSP (which, from what I've read and heard samples of in the NRD-545, isn't a perfect tool), what's so "old tech" about it? I still think its a great receiver for both dxing and program listening (nice audio).

well, you could always wear the hat on your ass, and it would block out the radiation from these "underground" sources.... but of course, this would open you to other radiation from other directions, unless you also wear one on your head. the best solution to looking "normal" here would be to line your grundies with tinfoil....

One important reason is that, in the real world, you can't have too much
gain in any one amplifier section, (in other words, on one frequency),
because the output of the amplifier can leak back to the input and the
circuit becomes an oscillator.

>?And what makes a linear device different?
>Are any commonly used radios linear devices?

The audio amplifier is designed to be a linear circuit. Another
word for heterodynes in an audio amplifier is "intermodulation
distortion".

> receiver for both dxing and program listening (nice audio).

It can mean old tech in many ways:

-The receivers were last made a while ago, and are
starting to need repairs due to age.

-Unlike newer kilobuck receivers, the R-5000
needed filters added to make it a complete receiver.

-The lack of synch detection and the requirement
of needing an SE-3 to add it makes the R-5000 not
quite the out-of-the-box receiver that the newer
ones are.

-The design for the R-5000 was done in the mid
80's, and didn't incorporate newer design elements
over the course of it's run (like more memories,
better computer control, etc).

That said, for my money, it's a good receiver
that's quite capable of holding it's own in the
DXing arena. The R-5000 and the IC-R71A
commonly fought it out for the DXers buck
back in the 80's and early 90's (pre-R8 and
pre-535). The R-5000 could go with up to
4 filters and had good sound, the IC-R71A
could pick up faint DX a smidge better but
that was balanced by poor audio. (Other's
opinions, not mine; I've never tried either...Yet.)

Ii like the looks of the Deluxe Shielding Dress Shirt. I wonder how that would go at airport security? Then there's a shorts. You'd be stripped to nothing but socks and still setting off alarms!

And the hat, wow. "Many people can actually sense the differences in the levels of "mind noise" from RF radiation. Provide your brain a quiet place without interference to your mental processes from RF radiation." I'd love to do a double blind test with placebo hats and see the results!

You pretty much nailed it. In practical terms, the differences between R-5000 and R-71 were matters of taste. Performance was about equivalent, each with as many plusses as the other, each with as many minuses as the other. If you were fluent in each one, they were the same radio on the desk.

In practical terms, today, there are some significant differences. R-71 is still relatively well supported by ICOM. R-5000...not so much. Displays are no longer avaiable for R-5000. And both require attention at this age. R-71 will need DC-DC converters rebuilt, display caps replaced, and trimmers on the PLL board replaced. And very likely the power supply board touched up because the regulator operates at such a high temperature, the solder crystallizes on the board. R-5000, will also need recapping, likely a display, and the some encoders are failing.

The future outlook is that a greater percentage of R-71's produced will still be in service than R-5000's, at least from the 2005 point of reference, so choosing carefully is very much a requirement if the user plans to put the radio into regular service.

It could be a synchronous detector. If the tone rapidly disappears as the pitch gets very low and the signal is clear and stays that way (for a stable signal), it is. What make and model is the radio?
Knowing that, someone would be able to answer your question definitely.

Tom

Well, what you say is a little puzzling...the BBC news item you quote is dated July 2004. Yet in December 2004, the Administration itself said "no WMDs". It's interesting that they [the gummint] didn't quote this article, rather than admitting that there were no WMDs.

To quote from your reference:

> Uranium [that was removed] would not be suitable for fashioning such a device [dirty bomb]

and continues:

> The 1,000 "sources" evacuated in the Iraqi operation included a "huge
> range" of radioactive items used for medical purposes and industrial
> purposes.

And the question begs to be asked: As a SOVEREIGN nation, why wouldn't Iraq be allowed to have medical and industrial "radioactive items"? Should their cancer patients be denied medical treatment?

As a philosophical point for discussion, why couldn't Iraq, as a *SOVEREIGN* nation, have WMDs, much as us, Britain, France, China, North Korea (now THAT'S scary) and other countries do? (as much as we might not like it).

It would appear that you are saying that some sovereign nations are more equal than others.

"George Bush lied": the leftist slander that refuses to die.

http://www.commentarymagazine.com/Production/files/podhoretz1205advance.html

Who Is Lying About Iraq?

Among the many distortions, misrepresentations, and outright falsifications that have emerged from the debate over Iraq, one in particular stands out above all others. This is the charge that George W. Bush misled us into an immoral and/or unnecessary war in Iraq by telling a series of lies that have now been definitively exposed.

What makes this charge so special is the amazing success it has enjoyed in getting itself established as a self-evident truth even though it has been refuted and discredited over and over again by evidence and argument alike. In this it resembles nothing so much as those animated cartoon characters who, after being flattened, blown up, or pushed over a cliff, always spring back to life with their bodies perfectly intact. Perhaps, like those cartoon characters, this allegation simply cannot be killed off, no matter what.

Nevertheless, I want to take one more shot at exposing it for the lie that it itself really is. Although doing so will require going over ground that I and many others have covered before, I hope that revisiting this well-trodden terrain may also serve to refresh memories that have grown dim, to clarify thoughts that have grown confused, and to revive outrage that has grown commensurately dulled.

The main "lie" that George W. Bush is accused of telling us is that Saddam Hussein possessed an arsenal of weapons of mass destruction, or WMD as they have invariably come to be called. From this followed the subsidiary "lie" that Iraq under Saddam's regime posed a two-edged mortal threat. On the one hand, we were informed, there was a distinct (or even "imminent") possibility that Saddam himself would use these weapons against us and/or our allies; and on the other hand, there was the still more dangerous possibility that he would supply them to terrorists like those who had already attacked us on 9/11 and to whom he was linked.

This entire scenario of purported deceit has been given a new lease on life by the indictment in late October of I. Lewis (Scooter) Libby, then chief of staff to Vice President Dick Cheney. Libby stands accused of making false statements to the FBI and of committing perjury in testifying before a grand jury that had been convened to find out who in the Bush administration had "outed" Valerie Plame, a CIA agent married to the retired ambassador Joseph C. Wilson, IV. The supposed purpose of leaking this classified information

to the press was to retaliate against Wilson for having "debunked" (in his words) "the lies that led to war."

Now, as it happens, Libby was not charged with having outed Plame but only with having lied about when and from whom he first learned that she worked for the CIA. Moreover, Patrick J. Fitzgerald, the special prosecutor who brought the indictment against him, made a point of emphasizing that

[t]his indictment is not about the war. This indictment is not about the propriety of the war. And people who believe fervently in the war effort, people who oppose it, people who have mixed feelings about it should not look to this indictment for any resolution of how they feel or any vindication of how they feel.

This is simply an indictment that says, in a national-security investigation about the compromise of a CIA officer's identity that may have taken place in the context of a very heated debate over the war, whether some person-a person, Mr. Libby-lied or not.

No matter. Harry Reid, the Democratic leader in the Senate, spoke for a host of other opponents of the war in insisting that
[t]his case is bigger than the leak of classified information. It is about how the Bush White House manufactured and manipulated intelligence in order to bolster its case for the war in Iraq and to discredit anyone who dared to challenge the President
.
Yet even stipulating-which I do only for the sake of argument-that no weapons of mass destruction existed in Iraq in the period leading up to the invasion, it defies all reason to think that Bush was lying when he asserted that they did. To lie means to say something one knows to be false. But it is as close to certainty as we can get that Bush believed in the truth of what he was saying about WMD in Iraq.

How indeed could it have been otherwise? George Tenet, his own CIA director, assured him that the case was "a slam dunk." This phrase would later become notorious, but in using it, Tenet had the backing of all fifteen agencies involved in gathering intelligence for the United States. In the National Intelligence Estimate (NIE) of 2002, where their collective views were summarized, one of the conclusions offered with "high confidence" was that

Iraq is continuing, and in some areas expanding its chemical, biological, nuclear, and missile programs contrary to UN resolutions.

The intelligence agencies of Britain, Germany, Russia, China, Israel, and-yes-France all agreed with this judgment. And even Hans Blix-who headed the UN team of inspectors trying to determine whether Saddam had complied with the demands of the Security Council that he get rid of the weapons of mass destruction he was known to have had in the past-lent further credibility to the case in a report he issued only a few months before the invasion:

The discovery of a number of 122-mm chemical rocket warheads in a bunker at a storage depot 170 km southwest of Baghdad was much publicized. This was a

relatively new bunker, and therefore the rockets must have been moved there in the past few years, at a time when Iraq should not have had such munitions. . . . They could also be the tip of a submerged iceberg. The discovery of a few rockets does not resolve but rather points to the issue of several thousands of chemical rockets that are unaccounted for.

Blix now claims that he was only being "cautious" here, but if, as he now also adds, the Bush administration "misled itself" in interpreting the evidence before it, he at the very least lent it a helping hand.

So, once again, did the British, the French, and the Germans, all of whom signed on in advance to Secretary of State Colin Powell's reading of the satellite photos he presented to the UN in the period leading up to the invasion. Powell himself and his chief of staff, Lawrence Wilkerson, now feel that this speech was the low point of his tenure as Secretary of State. But Wilkerson (in the process of a vicious attack on the President, the Vice President, and the Secretary of Defense for getting us into Iraq) is forced to acknowledge that the Bush administration did not lack for company in interpreting the available evidence as it did:

I can't tell you why the French, the Germans, the Brits, and us thought that most of the material, if not all of it, that we presented at the UN on 5 February 2003 was the truth. I can't. I've wrestled with it. [But] when you see a satellite photograph of all the signs of the chemical-weapons ASP-Ammunition Supply Point-with chemical weapons, and you match all those signs with your matrix on what should show a chemical ASP, and they're there, you have to conclude that it's a chemical ASP, especially when you see the next satellite photograph which shows the UN inspectors wheeling in their white vehicles with black markings on them to that same ASP, and everything is changed, everything is clean. . . . But George [Tenet] was convinced, John McLaughlin [Tenet's deputy] was convinced, that what we were presented [for Powell's UN speech] was accurate.

Going on to shoot down a widespread impression, Wilkerson informs us that even the State Department's Bureau of Intelligence and Research (INR) was convinced:

People say, well, INR dissented. That's a bunch of bull. INR dissented that the nuclear program was up and running. That's all INR dissented on. They were right there with the chems and the bios.

In explaining its dissent on Iraq's nuclear program, the INR had, as stated in the NIE of 2002, expressed doubt about
Iraq's efforts to acquire aluminum tubes [which are] central to the argument that Baghdad is reconstituting its nuclear-weapons program. . . . INR is not persuaded that the tubes in question are intended for use as centrifuge rotors . . . in Iraq's nuclear-weapons program.

But, according to Wilkerson,
The French came in in the middle of my deliberations at the CIA and said, we have just spun aluminum tubes, and by God, we did it to this RPM, et cetera, et cetera, and it was all, you know, proof positive that the aluminum tubes

were not for mortar casings or artillery casings, they were for centrifuges. Otherwise, why would you have such exquisite instruments?

In short, and whether or not it included the secret heart of Hans Blix, "the consensus of the intelligence community," as Wilkerson puts it, "was overwhelming" in the period leading up to the invasion of Iraq that Saddam definitely had an arsenal of chemical and biological weapons, and that he was also in all probability well on the way to rebuilding the nuclear capability that the Israelis had damaged by bombing the Osirak reactor in 1981.

Additional confirmation of this latter point comes from Kenneth Pollack, who served in the National Security Council under Clinton. "In the late spring of 2002," Pollack has written,

I participated in a Washington meeting about Iraqi WMD. Those present included nearly twenty former inspectors from the United Nations Special Commission (UNSCOM), the force established in 1991 to oversee the elimination of WMD in Iraq. One of the senior people put a question to the group: did anyone in the room doubt that Iraq was currently operating a secret centrifuge plant? No one did. Three people added that they believed Iraq was also operating a secret calutron plant (a facility for separating uranium isotopes).

No wonder, then, that another conclusion the NIE of 2002 reached with "high confidence" was that
Iraq could make a nuclear weapon in months to a year once it acquires sufficient weapons-grade fissile material.(1)

But the consensus on which Bush relied was not born in his own administration. In fact, it was first fully formed in the Clinton administration. Here is Clinton himself, speaking in 1998:

If Saddam rejects peace and we have to use force, our purpose is clear. We want to seriously diminish the threat posed by Iraq's weapons-of-mass-destruction program.

Here is his Secretary of State Madeline Albright, also speaking in 1998:

Iraq is a long way from [the USA], but what happens there matters a great deal here. For the risk that the leaders of a rogue state will use nuclear, chemical, or biological weapons against us or our allies is the greatest security threat we face.
Here is Sandy Berger, Clinton's National Security Adviser, who chimed in at the same time with this flat-out assertion about Saddam:

He will use those weapons of mass destruction again, as he has ten times since 1983.

Finally, Clinton's Secretary of Defense, William Cohen, was so sure Saddam had stockpiles of WMD that he remained "absolutely convinced" of it even after our failure to find them in the wake of the invasion in March 2003.

Nor did leading Democrats in Congress entertain any doubts on this score. A few months after Clinton and his people made the statements I have just quoted, a group of Democratic Senators, including such liberals as Carl Levin, Tom Daschle, and John Kerry, urged the President

to take necessary actions (including, if appropriate, air and missile strikes on suspect Iraqi sites) to respond effectively to the threat posed by Iraq's refusal to end its weapons-of-mass-destruction programs.

Nancy Pelosi, the future leader of the Democrats in the House, and then a member of the House Intelligence Committee, added her voice to the chorus:

Saddam Hussein has been engaged in the development of weapons-of-mass-destruction technology, which is a threat to countries in the region, and he has made a mockery of the weapons inspection process.

This Democratic drumbeat continued and even intensified when Bush succeeded Clinton in 2001, and it featured many who would later pretend to have been deceived by the Bush White House. In a letter to the new President, a number of Senators led by Bob Graham declared:

There is no doubt that . . . Saddam Hussein has invigorated his weapons programs. Reports indicate that biological, chemical, and nuclear programs continue apace and may be back to pre-Gulf war status. In addition, Saddam continues to redefine delivery systems and is doubtless using the cover of a licit missile program to develop longer-range missiles that will threaten the United States and our allies.

Senator Carl Levin also reaffirmed for Bush's benefit what he had told Clinton some years earlier:

Saddam Hussein is a tyrant and a threat to the peace and stability of the region. He has ignored the mandate of the United Nations, and is building weapons of mass destruction and the means of delivering them.

Senator Hillary Rodham Clinton agreed, speaking in October 2002:

In the four years since the inspectors left, intelligence reports show that Saddam Hussein has worked to rebuild his chemical- and biological-weapons stock, his missile-delivery capability, and his nuclear program. He has also given aid, comfort, and sanctuary to terrorists, including al-Qaeda members.

Senator Jay Rockefeller, vice chairman of the Senate Intelligence Committee, agreed as well:

There is unmistakable evidence that Saddam Hussein is working aggressively to develop nuclear weapons and will likely have nuclear weapons within the next five years. . . . We also should remember we have always underestimated the progress Saddam has made in development of weapons of mass destruction.

Even more striking were the sentiments of Bush's opponents in his two campaigns for the presidency. Thus Al Gore in September 2002:

We know that [Saddam] has stored secret supplies of biological and chemical weapons throughout his country.

And here is Gore again, in that same year:

Iraq's search for weapons of mass destruction has proven impossible to deter, and we should assume that it will continue for as long as Saddam is in power.

Now to John Kerry, also speaking in 2002:

I will be voting to give the President of the United States the authority to use force-if necessary-to disarm Saddam Hussein because I believe that a deadly arsenal of weapons of mass destruction in his hands is a real and grave threat to our security.

Perhaps most startling of all, given the rhetoric that they would later employ against Bush after the invasion of Iraq, are statements made by Senators Ted Kennedy and Robert Byrd, also in 2002:

Kennedy: We have known for many years that Saddam Hussein is seeking and developing weapons of mass destruction.

Byrd: The last UN weapons inspectors left Iraq in October of 1998. We are confident that Saddam Hussein retains some stockpiles of chemical and biological weapons, and that he has since embarked on a crash course to build up his chemical- and biological-warfare capabilities. Intelligence reports indicate that he is seeking nuclear weapons.(2)

Liberal politicians like these were seconded by the mainstream media, in whose columns a very different tune would later be sung. For example, throughout the last two years of the Clinton administration, editorials in the New York Times repeatedly insisted that

without further outside intervention, Iraq should be able to rebuild weapons and missile plants within a year [and] future military attacks may be required to diminish the arsenal again.

The Times was also skeptical of negotiations, pointing out that it was

hard to negotiate with a tyrant who has no intention of honoring his commitments and who sees nuclear, chemical, and biological weapons as his country's salvation.

So, too, the Washington Post, which greeted the inauguration of George W. Bush in January 2001 with the admonition that
[o]f all the booby traps left behind by the Clinton administration, none is more dangerous-or more urgent-than the situation in Iraq. Over the last year, Mr. Clinton and his team quietly avoided dealing with, or calling attention to, the almost complete unraveling of a decade's efforts to isolate the regime of Saddam Hussein and prevent it from rebuilding its weapons of mass destruction. That leaves President Bush to confront a dismaying panorama in the Persian Gulf [where] intelligence photos . . . show the reconstruction of factories long suspected of producing chemical and biological weapons.(3)

All this should surely suffice to prove far beyond any even unreasonable doubt that Bush was telling what he believed to be the truth about Saddam's

stockpile of WMD. It also disposes of the fallback charge that Bush lied by exaggerating or hyping the intelligence presented to him. Why on earth would he have done so when the intelligence itself was so compelling that it convinced everyone who had direct access to it, and when hardly anyone in the world believed that Saddam had, as he claimed, complied with the sixteen resolutions of the Security Council demanding that he get rid of his weapons of mass destruction?

Another fallback charge is that Bush, operating mainly through Cheney, somehow forced the CIA into telling him what he wanted to hear. Yet in its report of 2004, the bipartisan Senate Intelligence Committee, while criticizing the CIA for relying on what in hindsight looked like weak or faulty intelligence, stated that it

did not find any evidence that administration officials attempted to coerce, influence, or pressure analysts to change their judgments related to Iraq's weapons-of-mass-destruction capabilities.

The March 2005 report of the equally bipartisan Robb-Silberman commission, which investigated intelligence failures on Iraq, reached the same conclusion, finding

no evidence of political pressure to influence the intelligence community's pre-war assessments of Iraq's weapons programs. . . . [A]nalysts universally asserted that in no instance did political pressure cause them to skew or alter any of their analytical judgments.

Still, even many who believed that Saddam did possess WMD, and was ruthless enough to use them, accused Bush of telling a different sort of lie by characterizing the risk as "imminent." But this, too, is false: Bush consistently rejected imminence as a justification for war.(4) Thus, in the State of the Union address he delivered only three months after 9/11, Bush declared that he would "not wait on events while dangers gather" and that he would "not stand by, as peril draws closer and closer." Then, in a speech at West Point six months later, he reiterated the same point: "If we wait for threats to materialize, we will have waited too long." And as if that were not clear enough, he went out of his way in his State of the Union address in 2003 (that is, three months before the invasion), to bring up the word "imminent" itself precisely in order to repudiate it:

Some have said we must not act until the threat is imminent. Since when have terrorists and tyrants announced their intentions, politely putting us on notice before they strike? If this threat is permitted to fully and suddenly emerge, all actions, all words, and all recriminations would come too late. Trusting in the sanity and restraint of Saddam Hussein is not a strategy, and it is not an option.

What of the related charge that it was still another "lie" to suggest, as Bush and his people did, that a connection could be traced between Saddam Hussein and the al-Qaeda terrorists who had attacked us on 9/11? This charge was also rejected by the Senate Intelligence Committee. Contrary to how its findings were summarized in the mainstream media, the committee's report

explicitly concluded that al Qaeda did in fact have a cooperative, if informal, relationship with Iraqi agents working under Saddam. The report of the bipartisan 9/11 commission came to the same conclusion, as did a comparably independent British investigation conducted by Lord Butler, which pointed to "meetings . . . between senior Iraqi representatives and senior al-Qaeda operatives."(5)

Which brings us to Joseph C. Wilson, IV and what to my mind wins the palm for the most disgraceful instance of all.
The story begins with the notorious sixteen words inserted-after, be it noted, much vetting by the CIA and the State Department-into Bush's 2003 State of the Union address:

The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa.
This is the "lie" Wilson bragged of having "debunked" after being sent by the CIA to Niger in 2002 to check out the intelligence it had received to that effect. Wilson would later angrily deny that his wife had recommended him for this mission, and would do his best to spread the impression that choosing him had been the Vice President's idea. But Nicholas Kristof of the New York Times, through whom Wilson first planted this impression, was eventually forced to admit that "Cheney apparently didn't know that Wilson had been dispatched." (By the time Kristof grudgingly issued this retraction, Wilson himself, in characteristically shameless fashion, was denying that he had ever "said the Vice President sent me or ordered me sent.") And as for his wife's supposed non-role in his mission, here is what Valerie Plame Wilson wrote in a memo to her boss at the CIA:

My husband has good relations with the PM [the prime minister of Niger] and the former minister of mines . . . , both of whom could possibly shed light on this sort of activity.

More than a year after his return, with the help of Kristof, and also Walter Pincus of the Washington Post, and then through an op-ed piece in the Times under his own name, Wilson succeeded, probably beyond his wildest dreams, in setting off a political firestorm.

In response, the White House, no doubt hoping to prevent his allegation about the sixteen words from becoming a proxy for the charge that (in Wilson 's latest iteration of it) "lies and disinformation [were] used to justify the invasion of Iraq," eventually acknowledged that the President's statement "did not rise to the level of inclusion in the State of the Union address." As might have been expected, however, this panicky response served to make things worse rather than better. And yet it was totally unnecessary-for the maddeningly simple reason that every single one of the sixteen words at issue was true.

That is, British intelligence had assured the CIA that Saddam Hussein had tried to buy enriched uranium from the African country of Niger.
Furthermore-and notwithstanding the endlessly repeated assertion that this assurance has now been discredited-Britain's independent Butler commission concluded that it was "well-founded." The relevant passage is worth quoting

at length:

a. It is accepted by all parties that Iraqi officials visited Niger in 1999.
b. The British government had intelligence from several different sources indicating that this visit was for the purpose of acquiring uranium. Since uranium constitutes almost three-quarters of Niger's exports, the intelligence was credible.
c. The evidence was not conclusive that Iraq actually purchased, as opposed to having sought, uranium, and the British government did not claim this.

As if that were not enough to settle the matter, Wilson himself, far from challenging the British report when he was "debriefed" on his return from Niger (although challenging it is what he now never stops doing (6)), actually strengthened the CIA's belief in its accuracy. From the Senate Intelligence Committee report:

He [the CIA reports officer] said he judged that the most important fact in the report [by Wilson] was that Niger officials admitted that the Iraqi delegation had traveled there in 1999, and that the Niger prime minister believed the Iraqis were interested in purchasing uranium.

And again:

The report on [Wilson's] trip to Niger . . . did not change any analysts' assessments of the Iraq-Niger uranium deal. For most analysts, the information in the report lent more credibility to the original CIA reports on the uranium deal.

This passage goes on to note that the State Department's Bureau of Intelligence and Research-which (as we have already seen) did not believe that Saddam Hussein was trying to develop nuclear weapons-found support in Wilson's report for its "assessment that Niger was unlikely to be willing or able to sell uranium to Iraq." But if so, this, as the Butler report quoted above points out, would not mean that Iraq had not tried to buy it-which was the only claim made by British intelligence and then by Bush in the famous sixteen words.

The liar here, then, was not Bush but Wilson. And Wilson also lied when he told the Washington Post that he had unmasked as forgeries certain documents given to American intelligence (by whom it is not yet clear) that supposedly contained additional evidence of Saddam's efforts to buy uranium from Niger. The documents did indeed turn out to be forgeries; but, according to the Butler report,

[t]he forged documents were not available to the British government at the time its assessment was made, and so the fact of the forgery does not undermine [that assessment].(7)

More damning yet to Wilson, the Senate Intelligence Committee discovered that he had never laid eyes on the documents in question:

[Wilson] also told committee staff that he was the source of a Washington Post article . . . which said, "among the envoy's conclusions was that the

documents may have been forged because 'the dates were wrong and the names were wrong.'" Committee staff asked how the former ambassador could have come to the conclusion that the "dates were wrong and the names were wrong" when he had never seen the CIA reports and had no knowledge of what names and dates were in the reports.

To top all this off, just as Cheney had nothing to do with the choice of Wilson for the mission to Niger, neither was it true that, as Wilson "confirmed" for a credulous New Republic reporter, "the CIA circulated [his] report to the Vice President's office," thereby supposedly proving that Cheney and his staff "knew the Niger story was a flatout lie." Yet-the mind reels-if Cheney had actually been briefed on Wilson's oral report to the CIA (which he was not), he would, like the CIA itself, have been more inclined to believe that Saddam had tried to buy yellowcake uranium from Niger.

So much for the author of the best-selling and much acclaimed book whose title alone-The Politics of Truth: Inside the Lies that Led to War and Betrayed My Wife's CIA Identity-has set a new record for chutzpah.

But there is worse. In his press conference on the indictment against Libby, Patrick Fitzgerald insisted that lying to federal investigators is a serious crime both because it is itself against the law and because, by sending them on endless wild-goose chases, it constitutes the even more serious crime of obstruction of justice. By those standards, Wilson-who has repeatedly made false statements about every aspect of his mission to Niger, including whose idea it was to send him and what he told the CIA upon his return; who was then shown up by the Senate Intelligence Committee as having lied about the forged documents; and whose mendacity has sent the whole country into a wild-goose chase after allegations that, the more they are refuted, the more they keep being repeated-is himself an excellent candidate for criminal prosecution.

And so long as we are hunting for liars in this area, let me suggest that we begin with the Democrats now proclaiming that they were duped, and that we then broaden out to all those who in their desperation to delegitimize the larger policy being tested in Iraq-the policy of making the Middle East safe for America by making it safe for democracy-have consistently used distortion, misrepresentation, and selective perception to vilify as immoral a bold and noble enterprise and to brand as an ignominious defeat what is proving itself more and more every day to be a victory of American arms and a vindication of American ideals.
-November 7, 2005

NORMAN PODHORETZ is the editor-at-large of COMMENTARY and the author of ten books. The most recent, The Norman Podhoretz Reader, edited by Thomas L. Jeffers, appeared in 2004. His essays on the Bush Doctrine and Iraq, including "World War IV: How It Started, What It Means, and Why We Have to Win" (September 2004) and "The War Against World War IV" (February 2005).

1 Hard as it is to believe, let alone to reconcile with his general position, Joseph C. Wilson, IV, in a speech he delivered three months after the invasion at the Education for Peace in Iraq Center, offhandedly made the

following remark: "I remain of the view that we will find biological and chemical weapons and we may well find something that indicates that Saddam's regime maintained an interest in nuclear weapons."
2 Fuller versions of these and similar statements can be found at http://www.theconversationcafe.com/forums/archive/index.php/t-3134.htmland. Another source is http://www.rightwingnews.com/quotes/demsonwmds.php.
3 These and numerous other such quotations were assembled by Robert Kagan in a piece published in the Washington Post on October 25, 2005.
4 Whereas both John Edwards, later to become John Kerry's running mate in 2004, and Jay Rockefeller, the ranking Democrat on the Senate Intelligence Committee, actually did use the word in describing the threat posed by Saddam.
5 In early November, the Democrats on the Senate Intelligence Committee, who last year gave their unanimous assent to its report, were suddenly mounting a last-ditch effort to take it back on this issue (and others). But to judge from the material they had already begun leaking by November 7, when this article was going to press, the newest "Bush lied" case is as empty and dishonest as the one they themselves previously rejected.
6 Here is how he put it in a piece in the Los Angeles Times written in late October of this year to celebrate the indictment of Libby: "I knew that the statement in Bush's speech . . . was not true. I knew it was false from my own investigative trip to Africa. . . . And I knew that the White House knew it."
7 More extensive citations of the relevant passages from the Butler report can be found in postings by Daniel McKivergan at www.worldwidestandard.com. I have also drawn throughout on materials cited by the invaluable Stephen F. Hayes in the Weekly Standard.

The 1108 is supposed to have a sync detector not the 1105 as far as I can tell.

In fact, that keypad was one of the reasons I went with R-71.

Agreed. It does not even have SSB reception so it is highly doubtful that it would have the complexity of a Sync-AM detector, and not promote that fact! If it is actually making a heterodyne on each AM station as you tune it in, it would seem to be defective. If it is only on some, then the tone is probably caused by image frequencies from other stations - a weakness of the receiver design.

They're modules.

Most of them have one or two small PC boards. IIRC one of them has 3 boards in it. Each subsection is shielded from its neighbors.

This attention to detail resulted in a radio that's very hot, but also very easy on the ears.

1655. Listen to scanners.

Can someone send me a link to listen to a scanner over the internet? I am looking for a stream that will work with winamp or windows media player. They work best with a screen reader, thanks.

I have a book I can dig up on all those obscure military radios that has estimated prices. However, there is little to be gained to buying military gear other than for collector purposes. Most people get Racals, but really, it would make more sense to buy a AR7030 plus.

Mil gear is good if you need it rugged (shock), extended temperature, etc. Now most mil gear have good filters, but there is nothing preventing you from putting good filters in the AR7030. It can handle two extra filters. I put in two crystal filters (cw and sideband). I suppose if you just have to have a Collins filter, you can buy the mil gear.

I'm sure you have see this beast
http://www.dxing.com/rx/ra6790.htm
I've seen them go for about a thousand at the local flea market. If memory serves me right, the keyboard are a flexible membrane type that is not very reliable. Remember, these radios are pushing 20 years.

If you want "cool", pick up an old selective level meter and use it as a radio.

Between Cuhulin's girth, his alcohol consumption and his gas output, igniting him would probably level the town! Not a pleasant mess for anyone to have to clean up.

Having a GED allows you only to write monosyllabically? What's with the Mom fetish? Your wife came to her senses and kicked you out?

You called it right on the money! It's good to know that the Swish Beerfarts of the world are so predictable! The way I see it is that Swish doesn't know how to use a kill file in the first place and that it is certainly beyond his GED training. We've got Forest D-Ex-Ace and Bubba Swish Beerfart in the group!

The military must have some money to re-educate guys such as these two!

Back when I lived in a dorm, a group of us nicknamed one guy as "Hoover". He never got anything either. Thanks for confirming who is who!

So why hasn't that material come into action yet? If I was a despotic dictator with that kind of killpower, I'd certainly arrange for the material to fall into the hands of someone capable of continuing the fight after I had been removed from power. CWs don't have an infinite lifespan; it's the old use it or lose it scenario. And I have yet to hear of the jihadists using those kinds of weapons in Iraq.

<http://www.lazygranch.com/images/a51pan/september2005/tower.jpg>

I'm working on a new area 51 panorama and noticed this tower. It the striped object in the foreground. I wonder if this is the non-directional beacon PYD? It could be weather instrumentation, but the tower does have a shack nearby.

I don't need a job. I love spending spare time bashing the folks from
Canaduh! You know, the land of spineless jellyfish (think John
Barnyard and m Fool) and draft dodgers. Oh yes, don't let me forget,
vacation home of whiny French ass holes.

What wife? That question does beg another though. Do you think that
mFools mom would be dead now if she indeed had some real medical care
and not that crap from Canaduh? I mean, do they have real docs there
or are they still using leeches? Or maybe it was just a case of
Euthanasia. Whatever the case, I guess we will never know will we?

1671. Sony 2001 for sale

Newsgroup: rec.radio.shortwave
Date: 2005-11-12 10:06:40 UTC
From: Meter <gbmw1@bluebottle.com>
Message-ID: <Q8jdf.1786$Gz1.1173@newsfe3-win.ntli.net>
Source record: 48520

I have decided to part with my Sony ICF-2001D. It is in excellent working order and near mint condition. I have had this radio from new, (I am a non-smoker so no smell on it :-))) and have used it only as a bedside radio. It has the original box and accessories that came with it. I only ever tune in to BBC Radio 4 at night on it, so that is why I decided to sell it. I have a few other ordinary radios that can get radio 4.
I do not like ebay, the fees are too high and a lot of people mess you about.
So if anybody would like to buy this radio, please make me an offer. I would be willing to ship this radio worldwide, but check with me first, so I can get the postage costs for you. I am in the UK
take care
Meter

Message-ID: <11nc8137u5hj8ec@corp.supernews.com>
Source record: 48535

I have the MFJ 492 MENU DRIVEN MEMORY KEYER (with extra memory added) and I use it with the Bencher Hex key. I bought it from Universal-Radio.

The problem I have is the on and off button does not stay in the on position. It has a push button. So I have to open up the cover and use a tweezzer to guild a little spring to keep it in the on position.

Also, I notice that each time I turn the unit on, I have to spend a lot of time setting up the speed, sidetone, weight and paddle reverse all over again.

I am not sure what weight is for?

It seems that the unit does not remember these settings after I turn it off and on again.

If I wanted to send CW over a radio, can I use this unit?

I hope that I will be happy with this unit.

The Bencher Hex key is nice to use, but it did not come with a plug. But I had one anyway. The wiring is complicated, but I now have it right. However, I need to find a way to have the di on the left and the dah on the right side.

The instruction for the Hex key should of come with a diagram.

As in the important ''IP3'' measurement which shows how well the parts
that are supposed to be linear are behaving.

I own a very old Morse Code Key.It was made in New York City,I think it dates back to the 1920's or 1930's.It has an oval shaped little metal plate on it with an emlem/picture of a bumble bee stamped into the plate,it is sort of a complicated (to me anyway) Morse Code Key with a bunch of little knob adjustments on it.The Key's paddle works from side to side,not up and down.I bought it about ten years ago at the old Goodwill store that used to be on Palmyra Street in beautifull down town Jackson.It is one of the nicest looking Morse Code Keys I have ever seen before.It isn't for sale or trade either.Maybe I can find a picture on the internet of what my old Morse Code Key looks like.

There is a strange signal at 6445 kHz that is often
heard here. (Southern California)
It is on now.

It sounds like a repetitive calliope tune of a couple
bars with a helicopter sound along with it.
Anybody know what this is?

But according to the interpretation of the Constitution he can indeed be legally President of the United States.

At the time of his birth the Panama Canal Zone was US Territory.

(I do not endorse John McCain for President of the United States. He's just a little to much like John "Fraud" Kerry and Teddy "The Swimmer" Kennedy.)

Subject:
Bush Resurrects An Old Lie

http://thinkprogress.org/2005/11/11/iraq-intel/

Bush Resurrects False Claim That Congress Had "Same Intelligence" On Iraq

In his speech today, President Bush claimed that members of Congress who voted for the 2002 Iraq war resolution "had access to the same intelligence" as his administration.
http://www.whitehouse.gov/news/releases/2005/11/20051111-1.html

This is patently false.

Nevermind that much of the intelligence offered to the public and to Congress was inaccurate and misleading, or that according to the Downing Street memo and other documents, such intelligence was likely intentionally "fixed."

It is simply not true to state that Congress received the "same intelligence" as the White House:

FACT -- Dissent From White House Claims on Iraq Nuclear Program Consistently Withheld from Congress:

[S]everal Congressional and intelligence officials with access to the 15 assessments [of intel suggesting aluminum tubes showed Iraq was reconstituting its nuclear program] said not one of them informed senior policy makers of the Energy Department's dissent.

They described a series of reports, some with ominous titles, that failed to convey either the existence or the substance of the intensifying debate." [NYT, 10/3/04]

http://www.nytimes.com/2004/10/03/international/middleeast/03tube.html?ei=5090&en=2e1cdcc5b66e0332&ex=1254456000&partner=rssuserland&pagewanted=print&position=

FACT -- Sen. Kerrey: Bush "Has Much More Access" to Intel Than Congress:

Former Sen. Bob Kerrey (D-NE), ex-Senate Intelligence Committee vice chairman:
"The president has much more access to intelligence than members of Congress does. Ask any member of Congress. Ask a Republican member of Congress, do you get the same access to intelligence that the president does? Look at these aluminum tube stories that came out the president delivered to the Congress -- 'We believe these would be used

for centrifuges.' -- didn't deliver to Congress the full range of objections from the Department of Energy experts, nuclear weapons experts, that said it's unlikely they were for centrifuges, more likely that they were for rockets, which was a pre-existing use. The president has much more access to intelligence than any member of Congress." [10/7/04]
http://transcripts.cnn.com/TRANSCRIPTS/0410/08/ltm.01.html

FACT -- Rockefeller: PDBs, CIA Intel Withheld From Senate:

Ranking minority member on the Senate Intelligence Committee Jay Rockefeller (D-WV):

"[P]eople say, 'Well, you know, you all had the same intelligence that the White House had.' And I'm here to tell you that is nowhere near the truth. We not only don't have, nor probably should we have, the Presidential Daily Brief. We don't have the constant people who are working on intelligence who are very close to him. They don't release their -- an administration which tends not to release -- not just the White House, but the CIA, DOD [Department of Defense], others - they control information. There's a lot of intelligence that we don't get that they have." [11/04/05]
http://mediamatters.org/items/200511080006

FACT -- War Supporter Ken Pollack: White House Engaged in "Creative Omission" of Iraq Intel:

In the eyes of Kenneth Pollack, "a Clinton-era National Security Council member and strong supporter of regime change in Iraq," "the Administration consistently engaged in 'creative omission,' overstating the imminence of the Iraqi threat, even though it had evidence to the contrary. 'The President is responsible for serving the entire nation,' Pollack writes. 'Only the Administration has access to all the information available to various agencies of the US government -- and withholding or downplaying some of that information for its own purposes is a betrayal of that responsibility.'"
[Christian Science Monitor, 1/14/04]
http://www.csmonitor.com/2004/0114/dailyUpdate.html?s=entt

FACT -- White House Had Exclusive Access to "Unique" Intel Sources:

"The claim that the White House and Congress saw the 'same intelligence' on Iraq is further undermined by the Bush administration's use of outside intelligence channels. For more than year prior to the war, the administration received intelligence assessments and analysis on Iraq directly from the Department of Defense's Office of Special Plans (OSP), run by then-undersecretary of defense for policy Douglas J. Feith, and the Iraqi National Congress (INC), a group of Iraqi exiles led by Ahmed Chalabi." [MediaMatters, 11/8/05] http://mediamatters.org/items/200511080006

> Displays are no longer avaiable for R-5000. And both require attention
> at this age. R-71 will need ......

Two points missed:

1. The R-71 has it's microprocessor's programing on a battery backed up
RAM chip. When the battery fails, the radio is dead until it is
reprogramed. Someone sold an update kit, I have no idea if they
are still available.

The other question is how much longer will ICOM be able to reprogram
the current chips? One would hope they keep that equipment around
but old computers fail, programs no longer run after operating
system updates etc.

2. The R-5000's had a problem with the rubber potting compound on the PLL
board. A nasty job, the easy way is to unsolder ALL of the components,
scrape out the left over compound and install new components.

As the components become hard to replace, a repair will be to use a
tweezer and dental pick to remove all the compound by hand, hoping that
you do not damage anything and nothing was corroded to the point of
being unuseable.

I did it that way, and if it was not for the fact that the cost of
shipping each way to a competent repair person was more than the
cost of them repairing it, I would not have.

Geoff.

Weather permitting I'll be going from Tulsa, OK to the Ft. Wayne Ind.
hamfest on Nov. 18 & 19 as I've got to reduce my ham gear collection. I
plan on bringing as many heavy items that I can get in the car because I
don't want to eBay them as they're too much trouble to pack. I'll bring
whatever I can that generates interest via this email. I'd like to rent a
van but that's $150.00 more expense and I figure it'll cost me $500 to go!
Most of the stuff has been in storage for about 10 years and most of it
worked when put up. I haven't priced the stuff yet but I want to get as
much as I can reasonably close to going market price, so I can get my
expenses back. If I can't I'll bring it back and eBay the stuff.
Here's what I have:
Several Collins 75A-1, 75A-2, 75A-3 and 75A-4.
A heavily moded 75A-4,
A 30L-1, and 30S-1 but the 30S will take too much space.
And a couple of R-390A and 651S-1
Drake L4B, L7, L75.
Hammurlund HQ-170 I have 2, one has a clock, HQ-180 with clock
Heathkit HL-2200, SB 220, SB-200, SS-9000
Hallicrafters SX-28, SX-62, HT-33B, R45/ARR-7 I have several 28s
Gonset 3323
Swan linears Mark I, Mark II and 6B
National NC-183D, NC-303, NC-400.
Since I'm not getting a van I'll bring only 8 to 10 and try to maximze my
cash.
I plan to drive up in 2 days leaving Tulsa Nov. 17 and going via
Springfield, MO, St. Louis, Indianapolis and Ft. Wayne and could meet
anywhere along the way.
Let me know.
tnx

What you see is what I got.

Do you have a good web page with NDB photographs? The reason I thought
this might be the NDB is by this photograph:
http://www.astro.hr/ucionica/tom/ndb/ndb.jpg

The one NDB I saw close up used two poles and wire between them.

Yes, this is true. However, the Bushies are really overburdened
creating new lies, so they have to resurrect old ones once in a while.
Once Rove's ass is in jail, the Bushies will have to farm out the lies
to the Swift Boat Liars. This of course will be done with a no-bid
contract, as the Swift Boat Liars are without equal.

Sounds good to me.GOD made Turkeys for eating.Although it's a little early yet,Happy Turkey Day everybody!

Advice for BYU Professor regarding WTC Demolition.Middle isle at www.rense.com
The good Professor wants a piece of WTC steel/metal to analize.Well,those great folks the Teutul's at American Chopper put a WTC rivet on a Motorcycle they built. www.orangecountychoppers.com and some of that WTC steel (about 24 tons of it) is in Pascagoula,Mississippi at Northrop Grumman where they are building the new USS New York Ship.The WTC steel is to be incorporated into the nose section of the new USS New York Ship.I suppose Northrop Grumman Ship building company in Pascagoula has already tested that steel and melted it down by now.All of that WTC metal did not get shipped off to China or wherever it went.The new USS New York Ship sets sail in 2007.USS New York Ship's Motto will be,Never Retreat,Never Surrender.

There are no surrender monkeys here in Mississippi,I guarantee y'all that.

> are still available.

This comes up every time R-71 is mentioned. I had mine for more
than 10 years, and it was used when I bought it. Still had the original
battery when I sold it. And the guy that bought it reports that it's
still working. I spoke to Bellevue about this, and the head tech there
said he's never replaced a battery that was not working. A lot of users
have them replaced because they're nervous about it. Others have them
replaced while in for other work. But he's never replaced a battery
because it was dead. The worst he's seen is replacemnt jobs that were
botched by users, and had to be reprogrammed. This conversation took
place a couple of years ago, so I don't know if his claim has changed.
The point is that this issue can be more or less a non issue depending
on users' diligence.

>
> The other question is how much longer will ICOM be able to reprogram
> the current chips? One would hope they keep that equipment around
> but old computers fail, programs no longer run after operating
> system updates etc.

Also a non issue. As long as they support the radio, they will be
reprogramming RAM. But it does afford the opportunity to mention the
number of amateur users who have learned to reprogram this radio, and
who can offer their help. Do a web search. Or they show up in RRS, from
time to time.

The Willco board is still available, though the numbers are
limited, as the chips used are no longer available.

i know it's not nice to poke fun, but they are the french. we saved
their ass twice.
why should we do it again? i'm trying to be serious here...lol

Drifter..

*on*the*fringe*of*Pittsburgh*

<start-here>
President Bush has authorized the Joint Chiefs to begin drawing up a
battle
plan to pull France's ass out of the fire again. Facing an apparent
overwhelming force of up to 400 pissed off teenagers Mr.Bush doubts
France's
ability to hold off the little pissants. "Hell, if the last two world
wars
are any indication, I would expect France to surrender any day now",
said
Bush.

Joint Chiefs head, Gen. Peter Pace, warned the President that it might
be
necessary to send up to 5 Marines to get things under control. The
general
admitted that 5 Marines may be overkill but he wanted to get this thing
under control within 24 hours of arriving on scene. He stated he was
having
a hard time finding even one Marine to help those ungrateful bastards
out
for a third time but thought that he could persuade a few women Marines
to
do the job before they went on pregnancy leave.

President Bush asked Gen. Pace to get our Marines out of there as soon
as
possible after order was restored. He also reminded Gen. Pace to make
sure
the Marines did not take soap, razors, or deodorant with them. The least
they stand out the better.

Miso,

FWIW, what you suspecto to be a NDB does resemble the one at the airport
I work at. Admittedly, that isn't a great photo. As for the other NDB,
I've never seen that kind before.

That 30 year old brunette woman next door to me caught another cat in that Litiz wire animal trap cage this afternoon.She hauled off a cat she caught in that cage to the animal shelter or somewhere this morning that she caught yesterday.That makes eight cats she has hauled off so far.I know there is at least one more cat to be caught.I own two old Litiz wire cage traps,I am going to dig them out tomorrow.This neighborhood I live in is going to be rid of them nasty filthy cats running around,and it's going to stay that way too.

Old news, which does not support your assertion.

Tuwaitha had been under IAEA seal since 1991, and was secure from anyone's use until Bush ordered the IAEA out. Then locals broke in, poured the yellowcake out on the ground (contaminating it for a very long time to come) and started using the containers to store water and food and such.[2] We can look forward to a lot of cancers in that area because of Bush's unnecessary invasion.

Yellowcake ain't worth shit to make nukes out of unless you have a significant and easily identifiable and detectable processing capacity, which Saddam did not have. Any capacity he may have had before 1991 had been severely degraded in the years since.[3]

[1] <http://www.iaea.org/NewsCenter/PressReleases/2003/prn0304.shtml>

[2] <http://electroniciraq.net/news/printer1656.shtml>

[3] From <http://www.cia.gov/cia/reports/iraq_wmd_2004/chap4.html>:

Iraq Survey Group (ISG) discovered further evidence of the maturity and significance of the pre-1991 Iraqi Nuclear Program but found that Iraq's ability to reconstitute a nuclear weapons program progressively decayed after that date.

* Saddam Husayn ended the nuclear program in 1991 following the Gulf war. ISG found no evidence to suggest concerted efforts to restart the program.

* Although Saddam clearly assigned a high value to the nuclear progress and talent that had been developed up to the 1991 war, the program ended and the intellectual capital decayed in the succeeding years.

[Also see Table 3, detailing Iraq's pre-1991 nuclear facilities and how they had mostly been destroyed and/or sealed since 1991.]

news:Xns970BA53DBEAF2a216b130c132d203@216.77.188.18:

> When do you think you can get around to providing a quote of
> Bush's to show that he knowingly and willingly lied about
> pre-war intel regarding Iraq or Al Qaeda?

Let's start with the most bald-faced and unquestionable lie:

"[T]he fundamental question is, did Saddam Hussein have a weapons
program? And the answer is, absolutely. And we gave him a chance
to allow the inspectors in, and he wouldn't let them in."
<http://www.whitehouse.gov/news/releases/2003/07/20030714-3.html>

In fact, Hans Blix had inspectors on the cround from Nov. 2002 to
March 2003, when the impending invasion forced them to leave.

Bush was lying. Saddam HAD let the inpectors in, in compliance
with UNSCR 1441. And the inspectors were only months away from
determining that Saddam had no viable WMD programs[1], as the Duelfer
report later confirmed, which is probably the reason for Bush's
rush to war without UN authorization, in violation of the terms of
UNSCR 1441.

The 2003 State of the Union Message is replete with lies.

I'll just pick the most obvious one.

"The British government has learned that Saddam Hussein recently
sought significant quantities of uranium from Africa."

In fact, the Niger documents on which this claim was based were
already known at the time to be doubtful, and were later
proven to have been forged. From <http://shorterlink.com/?VCHOG6>:

CIA Director George J. Tenet successfully intervened with
White House officials to have a reference to Iraq seeking
uranium from Niger removed from a presidential speech last
October, three months before a less specific reference to
the same intelligence appeared in the State of the Union
address, according to senior administration officials.

Tenet argued personally to White House officials,
including deputy national security adviser Stephen Hadley,
that the allegation should not be used because it came from
only a single source, according to one senior official.
Another senior official with knowledge of the intelligence
said the CIA had doubts about the accuracy of the documents

underlying the allegation, which months later turned out to be forged.

You want more? There are plenty more.

[1] From <http://www.un.org/Depts/unmovic/SC7asdelivered.htm>:

Inspections in Iraq resumed on 27 November 2002. In matters relating to process, notably prompt access to sites, we have faced relatively few difficulties and certainly much less than those that were faced by UNSCOM in the period 1991 to 1998. This may well be due to the strong outside pressure.

[...]

How much time would it take to resolve the key remaining disarmament tasks? While cooperation can and is to be immediate, disarmament and at any rate the verification of it cannot be instant. Even with a proactive Iraqi attitude, induced by continued outside pressure, it would still take some time to verify sites and items, analyse documents, interview relevant persons, and draw conclusions. It would not take years, nor weeks, but months.

M 7 CS,

The Tower itself may be an omni-directional NDB Antenna.

The so called Top Hat may be a separate VHF UHF Antenna
that is simply using the Tower as an elevated support.

Yeah, we do think. And, in your case, we laugh at you. Fortunately, your kind is a dying breed. What breed of dinosaur do you want to be? You're not too swift, so you can't be a velociraptor. You aren't fierce which means you can't be a T-Rex. Hell, dinosaurs had some substance to them and you don't! D-Ex-Acetrilobite it is! Enjoy it, you old fossil!

You still posing as young girl looking for doggie action? You still peeping at your neighbours that you consider to be your sex toys? Tried to cheat any thrift stores recently? Why is it that a few military and ex-military degenerates, such as yourself, like to post about their perverse desires?

The bulk of your military experience, as seen through your posts, consists of schlepping around crates of ammo and getting STDs from Vietnamese women. Truly heroic! Are you bucking for the Distinguished Service Crabs Award?

You and Swish Beerfart would go well together!

Justice,

Like I posted earlier. I side a follow-up side-by-side
with the Sangean WR-1 "Wood Radio One" and the
Zenith Hi Performance Tuned RF AM/FM Radio Model
E430W. IMHO - The Zenith 'tuned' better Heard More
AM and FM Radios Stations; plus it Sounded better.

This is the eBay Auction for the :
Zenith Solid State FM-AM Radio Receiver Model E430 with
Operating Guide that I Won for $4.99 plus $13.00 Shipping
for a Total Price of $17.99
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5819780171

NOTE - The Sangean WR-1 "Wooden Radio One" cost $99.88
plus $7.59 at J&R Music and Computer World (J&R.Com)
http://www.jr.com/JRProductPage.process?Product=3979045

http://www.universal-radio.com/catalog/spcialty/4394.html
http://www.sangean.com/download/WR-1_381K601.pdf

Review of Sangean's newest Radio, the WR-1 "Wooden Radio"
http://www.radiolabs.com/Articles/woodradio.html
http://www.radiolabs.com/Articles/woodradio2.html
featured on RadioLabs: Wednesday, August 20, 2003
- by Chris Justice

I must agree that the Sangean Wooden Radio One" WR-1
is the better 'tuning' Radio for AM Reception; then both the
Bose and Cambridge Sound Works higher priced radios.
But the Zenith Hi Performance Tuned RF AM/FM Radio
Model # E430W is better then the Sangean.

I know you have problems with facts but the overall avoidable medical fatalities is lower for Canada than the USA. And it is lower for quite a number of individual areas. In other words, you best send your doctors back to learn the basics!

http://www.uic.edu/sph/prepare/courses/ph410/resources/avoidmort.pdf

Now you can go back to cleaning the latrines.

When I joned the Army on October 28,1962,I was getting 78 dollars and pocket change each month as a buck Private.When I was a PFC (Private First Class) I was getting one hundred and twenty five dollars and pocket change each month.When I was a Specialist Fourth Class,(same rank as Corporal which was two stripes,but I wore a patch on my sleeves with an Eagle on my patches) I was getting (I don't remember exactly how much for some reason) about two hundred and fourteen dollars and pocket change each month.(them Vietnamese helpers of ours would say,Ohhhhh,too much money!,I always told them,Not enough money!) Combat pay (extra pay) in Vietnam in 1964 amounted to an extra forty dollars each month.

CBC radio had the Randy Bachman show on tonight, He played Johnny Cash's version of 'Heart of Gold. A very well done rendition by one of the all time greats.

==========

"Heart of Gold" from 1972's Harvest is Neil Young's only number one hit single in his long musical career. The song, on the surface, seems to be a plea for the redemption of all-conquering love. With James Taylor and Linda Ronstadt singing backup, the song was a made for radio hit waiting to happen. And amazingly, the song continues to be among the most requested and performed in concert.

http://www.thrasherswheat.org/hogneil.htm

==========

http://www.randybachman.com/index.php?choice=7

Mister Bachman is well remembered for his work in The Guess Who and Bachman Turner Overdrive.

1825. (OT) : The Big Lie Concerning Iraq Was Saddam Husseins ! [Was : Who Is Lying About Iraq ?]

Newsgroup: rec.radio.shortwave
Date: 2005-11-13 06:21:52 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1131862912.745886.196410@g14g2000cwa.googlegroups.com>
Source record: 48626

The Big Lie Concerning Iraq Was Saddam Husseins [.]

First - Saddam Hussein in-fact did use WMDs against his own people
and in the Iraq-Iran War - That Is A Matter of History.

Second - Saddam Hussein in-fact did have an active WMD Program
as proved by the Years of UN Inspections that did in-fact
Located and Destroy Tons of WMDs and WMD Materials.

Third - The UN Inspectors could NOT Say whether Saddam Hussein
had in-fact Destroyed All of His WMDs and Completely Dismantled
His WMD Programs.

Fourth - Saddam Hussein continued to 'promote' and 'create'
activities that made it appear that He in-fact had a "Secret"
WMD Program and therefore [Hidden] WMDs still in His
Possession and/or Under His Direct Control to be Used
at His Command.

Note - The Very Real Facts of History and the Results of Prior
UN Inspections made this LIE that Saddam Hussein was
Promoting an "Instrument-of-Terror" between Saddam Hussein
and the Rest-of-the-World.

Fifth - I was only after Iraq was Pacified and more in-depth
Inspections were made was it then revealed that Saddam
Hussein's WMD Program was a House-of-Cards (A Charade)
that he used to try and deceive the Rest-of-the-World; to
retain is Power and Prestige.

Sixth - There is still some 'questions' about what went over
the border to Syria and other countries.

Seventh - Per Colin Powell speaking about the Iraq Problem Today
- Once You Broke It - You Own It and You Fit It !

Eight - The Psychosis of Long Term Intelligence Gathering and
Reporting which results in Greater and Greater Expectations.
* The More You are At the Game
* The More You Think You Know
* Base Upon Facts and Assumptions {Self Evident Truths}
Which Are Rightly or Wrongly the Foundation of : What You Believe
To Be The Current Situation Today and for the Near Term Future.
The Nature of Most Intelligence Organizations is to Promote and
Perpetuate these "Self Evident Truths" which help to sustain and
grow 'the organization'.

and therein lies the truth ~ RHF

(Crapolla.) Not surprising since it doesn't exist.
Typo. It should be:

alt.binaries.alt

(Although it is still true that some servers don't carry
certain binaries groups. If anyone interested should
not be able to reach alt.binaries.alt but be able to
reach some other binaries group, let me know.)

I bought some used stereo speakers at a carport sale for $5. They are three way speakers about one foot tall and eight inches tall. I use one of these and it sounds pretty good to me. I have an Icom 718 (similar to R75) which has plenty of power to drive the speaker. I listen at about 35% volume. I have the radio shack speakers too which aren't bad but they're no where close to the speakers I bought at the carport sale. I would shy away from computer speakers that have their own amplifier. The amps are usually garbage and have high distortion rates. Radio shack used to sell various speakers but I'm not sure what they sell these days.

Grow a brain, Woger. According to the Admin of Nimbusters Lloyd hasn't
post to Nimbusters since April. Lloyd imposters are joining your
retarded ass in Cocksuckers.
It still reads: Cocksucker's Lounge, Wogers Realm.

Message-ID: <ExHdf.7915$2y.4722@newsread2.news.atl.earthlink.net>
Source record: 48634

Location east Tennessee USA
(mid-southeast part of US)
Eastern Standard Time zone

If using a good portable SW radio, what frequencies can
I hope to get for Radio Australia and RNZI during the local
late afternoon through evening hours?

UTC 2100 - 0400 approximately

I get RA 9580kHz really well during local early morning hours
and RNZI 9885 was coming in great this morning. I want to hear
them at night (my time) also.

Mr. Davies is (still) cordially invited to Sunday morning service at Kirby Road Baptist Church in Memphis. Starting time is 11am. Come a little early for coffee and fellowship.

A warm, multi-racial welcome awaits him.

After all these months, the young "sistahs" have an enduring interest in making his acquaintance.

They must have heard some really good things about profit Stair's cavortations.

The unbelievable part in all of this is that so many were taken in by such a cheap and shallow ploy.
Proof positive of the effect of public schooling and the seemingly hypnotic power of the mass media.
Clinton was touted as being a powerful speaker, I found him to be transparent and disingenuous from day one.
Bush comes across as arrogant, naive, bumbling and uninformed on the issues.
Such is the way of recent past, present and future national elections I suppose, that the its not about electing the (perceived) best person but rather unelecting the lesser of two evils.

You have an 8 oz glass of poison sitting on the table and a 2 oz glass of poison sitting there too, why in the world would anyone in their right mind drink the 2 oz glass?

I'd pour both down the drain, throw the glasses away, and get on with the business of running my life.

It is the height of hypocrisy that the only entity to have used nuclear weapons against another would attempt to dictate the behavior of others in this regard.
Face it, the last entity on the face of the earth to be trusted with the possession of nuclear weaponry is the US gov't as it has proven time and time again it is incapable of responsibility more than would be allowed to an infant. Everything it touches turns to shit.

All military personel are under contractual obligations so it is
questionable as to whether Bush fulfilled that obligation.
Normally there are legal ramifications to this sort of thing, unless the
system is flawed.

What freq does his group hang out on?
Perhaps they should go to 14.313 as the un-confirmed
'reports' says the recent tornado in evansville
has blown the "kooky jooish injun" off the air
for the forseeable future. Oh well, one less ham
radio nutcase to listen to on 20. Come to think of it
I ain't heard the slack-jawed moron weed-whacker
pilot from ga in a few weekends or his babbling cohort
from mn either. Are they gone too? Come to think of it
even the "great liberty net" was MIA from 75 meters
last night also. What gives? Are they all droppin like
flies in the fall season? I really missed hearing the
Ypsilanti kookenschlong last evening. Ole gnq really is
a class-1 fruitcake and a dyed-in-the-wool larouche
supporter also who's elevator don't go to the top floors.
If you never heard him pontificate you're missing some
great humor folks, nuttier than a nest of cukoo-cukoo
birds on april the 1st.

Bush appears to be afraid of horses. He snubbed the President of
Mexico very badly once because he wouldn't go riding.

''At the presidents' last get-together, in February at Fox's ranch in
the central state of Guanajuato, there were several embarrassing
hiccups. When Fox invited his fellow rancher to go horseback riding,
Bush unexpectedly declined. And when Fox tried to give Bush a
custom-made horse saddle, Bush rejected the gift as excessive.''

I cleaned the contacts on a R-5000 I sold. Worked great. It wasn't that
hard. The funny thing is the 5000 I've had for twelve years has never had
key bounce but I never use it anyway because RxPlus comp control is how I
enter freqs.

The liberals wont let this go will they.

They continue to try and promote this crap.

Somehow the White house was able to manipulate intelligence reports from
6 different countries.

If they were that capable then we would not have all of the
international problems we have now.

The number of conversions in a receiver means nothing. It's the detail
behind it that counts.

When Howard Armstrong came up with the superheterodyne receiver during or
right after WWI, tubes were pretty non-existent in terms of specs. You needed
to convert radio to a lower frequency to get any sort of amplification. So
all superhets in the early days went to a lower frequency.

But then they realized a problem with that. Every time two frequencies
are heterodyned together, the sum and the difference result. This means
that there is an image frequency, ie one that is incidental to the
heterodyning but which you you don't want. If your IF frequency is
455KHz, and you want to receive WWV at 10MHz, there will also be an
image twice the IF frequency away (higher or lower depending on
whether the receiver's local oscillator is higher or lower than the
signal frequency).

To get rid of that image frequency, you need the front end to be
selective enough to knock it out. At low frequencies, like the AM
broadcast band, it's easy, because the image is distant from the
desired signal by a fair amount. But as you move into the shortwave
frequencies, that 455KHz becomes a smaller and smaller percentage of the
signal frequency, and it becomes harder to get rid of the image. There
were all kinds of cheap receivers in the past (and maybe even today) that
had 455KHz IFs and you'd see reviews and they'd say "basically there is
no image rejection on the 20 to 30MHz band. The only way to stay with
455KHz and get good image rejection is to add more tuned circuits at
the front end, which some receivers like the HRO, did.

You can raise the IF frequency to improve image rejection. If you've
got a 9MHz IF, then you can get by with fairly little front end selectivity,
because the image is 18MHz away from the signal you want to tune. It's
easy to reject a signal that far off.

But for quite some time, this wasn't possible because nobody could make filters that high up. So the double-conversion receiver came into use. Convert the signal down to a not too low frequency, to improve image rejection, but then convert down to the usual 455KHz after that to get good selectivity. If you have enough selectivity at the first IF so it can reject a signal 910KHz away (and this is relatively easy for a fixed IF where you don't have to tune a bunch of tuned circuits at the same time across the band), then you've mostly solved the image rejection problem.

The double conversion in this case is just a workaround, to get good image rejection, but also good selectivity with the second IF frequency.

When double conversion first hit, they'd often do a mix, where the receiver would be single conversion to 455KHz on the lower bands, and then a stage of selectivity at 2 or 3MHz would kick in on the higher band(s) where it was needed, before another conversion to 455KHz. These still used a tuneable local oscillator on the first mixer.

Of course, one whole layout of double conversion was to make the first local oscillator crystal controlled. Then you'd have what amounted to a tuneable receiver with a 455KHz IF, that tuned a fixed range, often 500KHz. It would tune something like 3 to 3.5MHz, and the first conversion would convert the desired signals to that range. One disadvantage of this is that you needed a crystal for every 500KHz or whatever the tuneable portion tuned. (Sometimes it got far worse, with the receiver tuning 200KHz at a time.) On the other hand, the advantage of this scheme was that by having the receiver tune a small segment of the spectrum, and only tune that 3 to 3.5MHz band, you could afford to make it linear tuning, and could afford to calibrate it well. So these receivers brought in a level of tuning accuracy that often hadn't been seen before.

There is another problem with conversion besides images. Every conversion decreases the immunity to overload, adds complication, and adds another oscillator that if not carefully shielded and layed out, will cause spurious responses.

So starting in the late fifties and early sixties, a new wave of single conversion receivers hit. Crystal filters came along, that offered good selectivity in the HF range, 9MHz being a common frequency. That gave good selectivity and allowed for good image rejection with only one IF frequency. Instead of having the ultimate selectivity way down the signal chain, you could place it right after the first mixer, leaving a stage or two before that good crystal filter. (Since the stages after the crystal filter only had to see what was within the bandwidth of that filter, it took a really strong signal to overload anything after that filter, while in some of the previous examples many stages would be seeing a lot of signal.)

Of course there were problems with that scheme. If the IF is in the spectrum you want to receive, it can't be used around that frequency. So there'd be a small gap around the IF frequency that you couldn't really use the receiver. Also, crystal filters tend to be expensive,

so if you wanted a lot of different bandwidths, it may not have
been the best choice.

So you'd still see double conversion, with a good filter at the first
IF in the HF range, but as wide as the widest bandwidth you want,
and then a conversion to 455KHz or whatever where you could get more
of a range of filters. Or convert down to 50KHz, as Drake did, where
you could design good filters with relatively cheap LC circuits.

But then we also saw branch of receiver design where the first
IF would be above the signal frequency. IN the case of the shortwave
receiver, that puts it above 30MHz. That makes the image so far away
that front end tuning could really be cut down, with the real factor
being that the first mixer would see plenty of signals the receiver
isn't interested in, and could be prone to overload. Some designs
even went to a low pass filter at the front end, cutting off at
30MHz so the front end needed no tuning but saw nothing above 30MHz
where the image would be.

But once you place the IF in the 40Mhz or higher range, you've lost
the ability to build good filters. Either design limitations or cost
mean that you don't see narrow filters up there. More like 15KHz wide
or more, not really useful for shortwave listening. So there
was a move back to double conversion, with the second IF providing
the ultimate selectivity. Back to some of the tradeoffs of double
conversion, but at least image rejection was generally gone. This
wave of receivers caused other design decisions. Since the local
oscillator now had to be higher than 30MHz, stability really became
an issue, and that meant synthesized tuning took over. (Another
way of looking at it might be that you couldn't easily go to such
a high first IF unless you used synthesizer.)

And of course, conversions have also been used to add features
to a receiver, such as passband tuning.

So talking about double or triple conversion means nothing. You need
to talk about the actual IF frequency or frequencies, and the front
end selectivity, and whether the conversion is added for extra feature
or to get a basic thing.

For RNZI, try 15720 near the end of your time block.

For RA, GOOD LUCK ;-(. The best bet is 17795 at 23:00-02:00.
For the summer, 21740 might have got you a signal, 22:00
to 00:00. Now, probably not. 15515 is variable and weak.
And 15240 has a lot of interference from the Chinese on 15235.
And I never find a decent signal on 12080 when I try.

They've got a new (October 2005) .pdf file available for download
that has time schedules for each target region. In this case,
North America uses the Central/South Pacific.

Coming in S3 here in Seattle (Sunday 18:29 UTC).

Strange sounding stuff.

It could be a weather fax. If you send out a picture with
a grid of lines on it, you could get that helicopter effect.
There's an occasional 2 (?) Hz, scritch scritch that you get
with a WEFAX at 120 lines per minute.

More likely, some new digital mode.

Not near as stupid as you. Strike one: I am not in the Dallas/Fort Worth area. Texas but
not anywhere near Dallas, asshole. Strike Two: I am not Geno. Last I heard Geno lived
in Oklahoma City. Care for Strike three, dipshit?

Oh wait, being a cocksucker I do believe you had one strike to begin with.

Traceroute to the IP address of your present post:

"traceroute 216.212.102.214 (dialup102-214.birch.net)
...
9 0.so-7-0-0.XL1.DFW13.ALTER.NET (152.63.103.218)
10 POS6-0.GW1.DFW13.ALTER.NET (152.63.103.85)
11 birch-dfw-gw.customer.alter.net (157.130.170.2)
12 host127-26.birch.net (216.212.127.26)
13 * * *"

See that alter.net Birch gateway at Dallas/Fort Worth? After that,
the trace goes into a birch.net dialup server in the area. Maybe
you'd better try out your bogus story on someone who can't do a
traceroute.

> not anywhere near Dallas, asshole. Strike Two: I am not Geno. Last I
> heard Geno lived (*)

You know, I don't give a flying fsck who you are, but you ARE in the
DFW network area. And Dallas is just a few hours south of Ok City.

> in Oklahoma City. Care for Strike three, dipshit?

> Oh wait, being a cocksucker I do believe you had one strike to begin
> with. (**)

My original response was to your idiotic claim that I was talking
about NIM Busters when I was in fact talking about a Usenet post. That
was the giant brain fart that you just ignored once again, and that is
how you managed to look so completely foolish in your original post.

Conversation terminated.

------(footnotes)------
(*) Whether Geno "lived" or not is a matter hotly debated by quality
of life experts, many of whom claim that living in prison is not the
usual indicator of a full and happy life. Martha Stewart disagrees.

(**) This devastating comeback apparently taken from the DeVry
Correspondence School's mail order debate handbook, chapter 33,
authored by its distinguished alumnus, Woger Wiseman.

Yes, it had some great writers and the actors to deliver
them. Too bad moving the night of the broadcast
killed the show in it's last year, but at the same time,
it could have gotten really old and died a lingering
death.

Every once in a while, I still get stopped on the
streets downtown asking where WKRP had it's
offices. My stock answer: "There was a WKRC
and a WKRQ (both are still there, too) but no WKRP
in Cincy." Although they did take some elements
of the old WNOP, the show really wasn't specific to
Cincy. If they really wanted to make it uniquely
Cincinnati, the writers would have taken WNOP's
operation on a houseboat in the Ohio River. Of
course, they'd have to use jazz as the format,
but still...

arggh i meant the sounds sweet speaker http://www.soundssweet.com

jim just looking for a little larger speaker to reduze the listener
fatigue i get from the tiny internal on the R75..might just go with
a larger comp speakers afterall.

I've always thought that Martha was hot, so when she was put in prison
here in west virginia I left Glendale and drove over for a conjugal
visit. They wouldn't let me in because they said you have to be
married to the woman you're going to visit, but I think it was all a
big fat lie. I bet Martha didn't even know I was at the gate.

after that glowing report im back to being open to the sounds sweet
speaker haha. i was torn between the ss speaker or the ICOM SP-20 which
is considerably more expensive and seems to have more advantages
for utility/hams ops. im more of a broadcast listener which seems to
lead me toward to the ss especially after readin the eham reviews after
reading your post. thx for sharing ur experience with the ss!

regards

Is there a web site out there that bring's it down to the basics?? I want to build an antenna for my portable YB400 but do not understand what a balun or turner is or what it does. I also need to find out if my small back yard is large enough for an antenna. What is overload and how do I prevent it...

...stuff like that

Thanks

EF

If your running a cheap rig like the YB-400 a 10 to 20 foot single wire out of the antenna jack will be more than satisfactory. It's not much of a rig as far as DXing goes

It's sort of like showing up at the Grand Nationals Drag Race in a stock YUGO!

You dont need a balun or a tuner....A tuner can be replaced with longer or shorter wires.

I agree with the above posts.....they are right on the money. About
that advertisement.....I did see something like that with one of the
Eton radios (was it the S-350?). I think, unless they are using an I.F. much
higher than 455kHz, they are advertising the design deficiency as a merit,
instead of what it really is. You would need quite a bit of selectivity in
the stages ahead of the mixer in order to provide adequate image rejection.
An interesting point.....instead of going to a double conversion scheme in
the Zenith R-7000 (not to be confused with the American made Royal 7000) the
designer chose to continue with a single conversion scheme but changed the
I.F. to 10.7MHz for all tuning ranges. Not a bad radio.

Pete

Absolutle nothing, in fact single conversion sucks unless it is an up
conversion, and even then, mixer noise will wipe out reception above
about 10Mhz absent a good tuned RF amplifier in front. Of course
providing 3-5 Khz selectivity at 40Mhz tends to be a bit challenging.
Q on the order of 10,000......

Single Conversion with a 455khz IF strip doesn't have problems with
bandwidth, but image rejection in the SW bands sucks big time.

I had a bad ass S-40B about 15 years ago. I fully restored it to way
better than specs (I think. I tune old tube radios by ear with
atmospheric noise.) Made a calibration chart for it and thoroughly
enjoyed it. Gave it away.

I 'd buy something like this at a garage sale and throw away the
elecronics. I use an AIWA 4'' speaker in a big plastic box and it
sounds quite good. Avoid 2-way speakers. The tweeters don't help.

A Russian General and French General were prepairing to go into battle. The Russian General instructed his valet to get him his bright red coat with all his medal and decorations on it. The French general asked, "why do you want your bright red jacket, it will stand out and you will surely be shot." The Russian General said, "because my troops will be able to see me in the thick of battle, and if I get shot the blood will not show against the red and that will give them courage and inspire them to fight at their best". The French General called to his valet, "Marcel, bring me my brown pants".

Sorry for the dumb post of the day, but, here goes anyway:

LSB should be used for freq's from ? to ? (ie: 10000 and lower)

USB should be used for freq's from ? to ? (ie: 10000 and higher)

Thanks for any answers.

That's the general rule of thumb for Amateur Radio use. However, most utility type stations use USB throughout the spectrum.

We all have our preferences ..... having tried a couple
different speakers I've settled on an RCA/RatShack 40-5000. It is a
two way speaker though it's not overly 'bright' and reproduces voice
quite nicely. It was about $20 and an improvement over the larger
two-way I was using (formerly a rear speaker in the home theater) and
a 3-4 inch wide range speaker I had tried. For kicks I tried the
amplified speakers from my computer and wasn't impressed - your
mileage will vary. In the end, most any external speaker you add
will sound better than the stock speaker.

I think you're being a tad melodramatic there.

This battle between the cool people and the fascistas has been going
on for many centuries. They do what they do and we resist. They are
the Red Coats. They are the Empire.

Isn't that what you're doing against GWB as
well by characterizing him as a Nazi, a
degenerate and evil incarnate? If it's good
for one side, it's good for the other.

The compass points both ways.

That's for Amateurs, AFAIK. LSB below 10 mHz, USB above.

Utilities Voice are primarily USB regardless of the frequency, but not exclusively. There are some stations that use both USB and LSB at the same time.

Frogman,

This is the same radio as the DX-398 once offered by Radio Shack. You should be able to order the part from them. It hasn't been discontinued that long....I know people who have bought replacement parts from them on this model recently.

9 Mhz really -- above that USB
Below 9 Mhz LSB

For Amateur Radio Bands - yes except the newly opened 60M band (5332 kHz to 5405 kHz) -- uses USB

For SW Bands most are USB

If you want to know why -- see URL:
http://ac6v.com/73.htm#LSB
--
CL -- I doubt, therefore I might be !

Nope - BBC is between Messick and Quince. Nice little church, though.

KRBC is way out Kirby almost at Raines Rd.

A very different demographic makeup, if you know what I mean.

IE more "sistahs" to choose from.

What part of the antenna is broken? Perhaps it can easily be repaired with a little soldering.If not,look around for any kind of similar shape and size antenna.Maybe an old rabbit ears tv antenna might work.It's a thought anyway.Visit some thrift stores in your area and see if there are any old junk radios there that might have an antenna that might work ok.Ordering a replacement antenna might cost you a bunch of money.I think I remember somebody in this news group once griped about the price of a replacement antenna he was looking at on the internet.Do a search for,Replacement Antennas for Radios.

Why would up conversion mixer noise wipe out reception above 10 MHz? How would the presumed mixer noise problem be fixed by a further conversion?

> Of course
> providing 3-5 Khz selectivity at 40Mhz tends to be a bit challenging.

That's true enough with inexpensive receivers which relied on a single (de)tuned circuit for RF selectivity. But the better receivers would cascade two or more tuned stages, isolated with RF amplifiers.

>

Nope, either 10910 kHz or 9090 kHz, i.e. 10000 kHz plus or minus 2*455 kHz.
The LO is at 10000 kHz plus or minus the i.f. of 455 kHz. If it's at 10455
kHz, a signal at 10910 kHz will also mix to produce a 455 kHz i.f.; if 9545
kHz, a signal at 9090 kHz will also mix to 455 kHz.

And they say the same about you. Big deal.
I'm not the one hung up about it on either end,
because I really don't feel that my taking sides on
the left vs. right argument will do anything to
me except give me high blood pressure.

But apparently it's a big deal to you, because
you seem to think that because I didn't vote the
way you wanted me to (I voted third party), I
enabled what you consider to be the evil empire.
My thinking is simple: you want me to vote for
you, you'd better have clear ideas that I agree
with. If you don't, I take my vote elsewhere.
I outgrew the bogeyman stories as a child, so
the grim tales of the end of the world or 1984 or
Nazi America or terrorists running amok in
downtown Des Moines don't scare me much.

How do you train someone who only has a GED??? I guess cleaning latrines was taxing him to his limits.

Yep, the mythical 'eternal kill file' didn't seem to last too long. It's one of the great lies that he believes in. The other one is that 'we're doing it to bring democracy to Iraq'.

DX Ace - Now Here Is Where We Have A Disagreement.

The Liberal {Left-Wing} Democrat Party of the USA views
the Masses of 'common' people as the Great Un-Washed
(and Un-Knowing) in Need of Their Enlightened Leadership.

These ELITIST who make-up the Liberal {Left-Wing}
Democrat Party of the USA : Consider Themselves as
the Ultra-Washed (and Uber-Knowing) to the extent
that Only They by the Fact that they are Self-Endowed
with the Necessary Enlightenment by Shear Logic are
the Anointed Few Who are Ordained to Lead the Many.

The Political Cadre of the Democrat Party of the USA are
OverLords and Masters of the New World {Socialist} Order . . .
Why - Because the are One World Liberal "Elitist" Socialists
[The OWLES]
* One World {A United Humanity} is Ok.
* Being Liberal (or thinking you are) is Not a Sin.
* Socialism {The Public Collective Good} has it place in an Order
Society.
ELITISM by the Few Over the Many Corrupts All of the Above.
[The Power Driven "Elite" Who Quest For Domination Over Others.]

And They Shall Reign Forever and Ever,
OverLord of OverLords ! and Master of Masters !
And They Shall Reign Forever and Ever,
OverLord of OverLords ! and Master of Masters !
Hallelujah ! What's It To You ?
Hallelujah ! What's It To You ?
Hallelujah ! What's It To You ?
Hallelujah ! What's It To You ?
Hallelujah ! What's It To You ?

Ryan,

READ - Speakers : External Speakers for the Icom IC-R75
http://groups.yahoo.com/group/icomr75/message/10780
External Speaker for the Icom IC-R75 Receiver
- You Can Hear It !
- Most Often Recommended External Speakers for the Icom IC-R75.
- That were Suggested as working well with the Icom IC-R75
by the Members of ths eGroup.

To Answer Your Question :
I have the Sounds Sweet Speaker and have used it with the both
the Icom IC-R75 Receiver and the Kenwood R-5000 Receiver.

The Audio Output Power of both Radios will Drive the large 8"
Sounds Sweet Speaker Loud enought to Fill an Entire Room
with Sound : Wall-to-Wall and Floor-to-Ceiling.

Having said all that - I generally use a smaller RCA Speaker
that was sold by RadioShack with my Icom IC-R75.
(This Speaker is now Discontinued.)

RCA 20-Watt Full Range Mini-Speaker
Radio Shack Cat # 40-5024
http://groups.yahoo.com/group/icomr75/message/2031
http://groups.yahoo.com/group/icomr75/message/769
A Shielded Full Range 4" Speaker. It is a Black 5" Cube.

All are Welcome to Join the Icom IC-R75 Group on YAHOO !

I stand corrected. I was thinking of beating it down to baseband.

The low side mixer will reverse the spectrum.

2017. Dems Whine Against Kingston Rally

Newsgroup: rec.radio.shortwave
Date: 2005-11-14 09:09:04 UTC

http://antiracistlosers.blogspot.com/2005/11/pols-whine-against-kingston-rally.html

Pols Whine Against Kingston Rally
With less than a week to go before Hal Turner's "March Against Violence" rally gets underway, whiners and anti-racist losers have been brewing up a snivelstorm against the rally and the conservative Republican Internet radio host.

Indeed, every single mainstream media article on the Kingston, NY, protest against Black-on-White crime, undoubtedly written by left-wing Marxist types, has branded Turner a "white supremacist." Various anti-racist loser groups plan to counter demonstrate that day, in a buildup some have compared to that of last month's race-riot in Toledo, Ohio. To avoid a similar catastrophe, Democrat mayor James Sottile has urged residents to stay away from the November 19th rally. Other Democrat legislators, including Frank Dart and Susan Zimet, are urging a peaceful counter-demonstration and will even attend Turner's rally to show their "opposition to racial intolerance." Even students at Kingston High, the setting for the protest, report being warned by their teachers to stay away from the area that day. The Kingston legislature has declared November 19th "Tolerance Day" and has asked all churchbells be rung at 12 noon, the intended start of the anti-violence rally.

With all the reports about Turner being a "white supremacist" and Zimet's drawing a controversial comparison with her own family's experience with real, honest-to-goodness nazis, the true root cause of the rally has been drowned out in all the whining. 14-year old Robby Hedrick, who is White, was savagely beaten by 16-year old Joseph Williams, who is Black and more than twice Robby's size. As a result of the attack, Robby has had three bones in his face broken, including the 'orbit' bone, leaving a large hole between his eye socket and his sinus cavity. Doctors have told Robby's mother that her son will have permanent vision problems. Robby's friend, who is also White, was also beaten during the attack by another Black boy.

After her son's beating, Mrs. Hedrick began getting contacted by other White mothers in the area who told of similar, racially-motivated attacks committed by African-American youth against their White children. As of this writing, four White children have been brutally attacked by Black youth. In each case, the local school and authorities downplay the incidents, even outright lying that the attacks did not occur on school grounds.

To add insult to injury, Mrs. Hedrick was told by teachers, students and even nurses at the hospital her son was in that he somehow "got

what he deserved," even though he obviously had done nothing to provoke the hate-filled attack.

With these facts in view, one can hardly understand how Alderman Clinton Brown, a Democrat and African-American, can keep a straight face when he says " I don't buy into the fact that it is that bad at the high school." Perhaps Brown would not be so cool-headed if it were a Black boy whose face was shattered in three places.

Sottile, Dart, Zimmet say they are "directly in opposition to racial intolerance." These politicians must be thicker than a brick wall in not understanding that the November 19th rally is "directly in opposition to racial intolerance." Either that, or they are too busy patronizing their far-left hippie constituancy in near Woodstock. In a sane world, these pols should be marching arm-in-arm with Hal Turner and all those coming to oppose the vile racial intolerance that caused Robby Hedrick and three other White children to be so brutally beaten. By opposing this rally, the anti-racists and politicians are saying the approve of and endorse black-on-white crime.

Hummm...I guess she's practicing up on the code? "That being the
novice CW band"... I'll have to listen up for her...I think she got
into
ham radio cuz of Chet Atkins, but not totally sure...I'm pretty sure
she was around him quite a bit, and thats probably where she got
into it I bet.. There are a few other Nashville hams too.. Ronnie
Milsap
is one.. He was on 75m a good bit back in the 80's. We used to call
him Ronnie Milspec....:/
